Nietzsche,2021-10-14 Human All Too Human Friedrich Nietzsche Human All Too Human A Book for Free Spirits German Menschliches Allzumenschliches Ein Buch f r freie Geister is a book by 19th century philosopher Friedrich Nietzsche

originally published in 1878 A second part Assorted Opinions and Maxims *Vermischte Meinungen und Sprüche* was published in 1879 and a third part The Wanderer and his Shadow *Der Wanderer und sein Schatten* followed in 1880 The book is Nietzsche's first in the aphoristic style that would come to dominate his writings discussing a variety of concepts in short paragraphs or sayings Reflecting an admiration of Voltaire as a free thinker but also a break in his friendship with composer Richard Wagner two years earlier Nietzsche dedicated the original 1878 edition of *Human All Too Human* to the memory of Voltaire on the celebration of the anniversary of his death May 30 1778 Instead of a preface the first part originally included a quotation from Descartes's *Discourse on the Method* Nietzsche later republished all three parts as a two volume edition in 1886 adding a preface to each volume and removing the Descartes quote as well as the dedication to Voltaire This book represents the beginning of Nietzsche's middle period with a break from German Romanticism and from Wagner and with a definite positivist slant Reluctant to construct a systematic philosophy this book comprises more a collection of debunkings of unwarranted assumptions than an interpretation and contains the seeds of concepts crucial to Nietzsche's later philosophy such as the need to transcend conventional Christian morality back page he uses his perspectivism and the idea of the will to power as explanatory devices though the latter remains less developed than in his later thought

Natural Law and Natural Rights John Finnis, 2011-04-07 First published in 1980 *Natural Law and Natural Rights* is widely heralded as a seminal contribution to the philosophy of law and an authoritative restatement of natural law doctrine It has offered generations of students and other readers a thorough grounding in the central issues of legal moral and political philosophy from Finnis's distinctive perspective This new edition includes a substantial postscript by the author in which he responds to thirty years of discussion criticism and further work in the field to develop and refine the original theory The book closely integrates the philosophy of law with ethics social theory and political philosophy The author develops a sustained and substantive argument it is not a review of other people's arguments but makes frequent illustrative and critical reference to classical modern and contemporary writers in ethics social and political theory and jurisprudence The preliminary First Part reviews a century of analytical jurisprudence to illustrate the dependence of every descriptive social science upon evaluations by the theorist A fully critical basis for such evaluations is a theory of natural law Standard contemporary objections to natural law theory are reviewed and shown to rest on serious misunderstandings The Second Part develops in ten carefully structured chapters an account of basic human goods and basic requirements of practical reasonableness community and the common good justice the logical structure of rights talk the bases of human rights their specification and their limits authority and the formation of authoritative rules by non authoritative persons and procedures law the Rule of Law and the derivation of laws from the principles of practical reasonableness the complex relation between legal and moral obligation and the practical and theoretical problems created by unjust laws A final Part develops a vigorous argument about the relation between natural law natural theology and revelation between moral concern and other ultimate questions

Epistemology and Emotions Dr Dominique Kuenzle, Dr Georg Brun, Dr Ulvi Doguoglu, 2012-10-01 Undoubtedly emotions sometimes thwart our epistemic endeavours But do they also contribute to epistemic success The thesis that emotions skew the epistemic landscape as Peter Goldie puts it in this volume has long been discussed in epistemology Recently however philosophers have called for a systematic reassessment of the epistemic relevance of emotions The resulting debate at the interface between epistemology theory of emotions and cognitive science examines emotions in a wide range of functions These include motivating inquiry establishing relevance as well as providing access to facts beliefs and non propositional aspects of knowledge This volume is the first collection focusing on the claim that we cannot but account for emotions if we are to understand the processes and evaluations related to empirical knowledge All essays are specifically written for this collection by leading researchers in this relatively new and developing field bringing together work from backgrounds such as pragmatism and scepticism cognitive theories of emotions and cognitive science Cartesian epistemology and virtue epistemology

Towards Convergence in International Human Rights Law Carla M. Buckley, Alice Donald, Philip Leach, 2016-10-18 We live in an era of proliferating international legal domains and institutions, not least in the human rights field. For some, normative pluralism within human rights is inevitable and even desirable. Others view it as a threat to the integrity and coherence of international human rights protection. How far do human rights standards and their interpretation by different regional and international human rights systems diverge? To what extent do human rights bodies borrow from or influence each other in respect of their case law practices and procedures? Is global human rights protection fragmenting or heading

towards greater coherence This edited collection addresses these questions through the insights of leading scholars and jurists with first hand experience of human rights adjudication and litigation
