Right Makes Might Freedom And Power In The Inform:

Right Makes Might David C. Gompert, 1998 The emergence of China begs a fresh look at power in world affairs more precisely at how the spread of freedom globalization knowledge knowledge powers as partners coda on U S policy Concludes that the U S need not fear a cold war with China China s own priorities economic growth stability propel it toward legitimacy that can only come through reform toward the dominant technology **"Right Makes Might"** Wolfgang Mieder, 2019-04-04 A powerful and timely addition to the literature of rhetoric and folklore Choice In 1860 Abraham Lincoln employed the proverb Right makes might opposite of the more aggressive Might makes right in his famed Cooper Union address While Lincoln did not originate the proverb his use of it in this critical speech indicates that the fourteenth century phrase had taken on new ethical and democratic connotations in the nineteenth century In this collection famed scholar of proverbs Wolfgang Mieder explores the multifaceted use and function of proverbs through the history of the United States from their early beginnings up through their use by such modern day politicians as Barack Obama Hillary Rodham Clinton and Bernie Sanders Building on previous publications and unpublished research Mieder explores sociopolitical aspects of the American worldview as expressed through the use of proverbs in politics women s rights and the civil rights movement and by looking at the use of proverbial phrases Mieder demonstrates how one traditional phrase can take on numerous expressive roles over time and how they continue to play a key role in our contemporary moment Strategic Assessment , *Strategic Assessment* 1999 , 1999 Strategic Appraisal Zalmay Khalilzad, Tom LaTourrette, David E. Mosher, Lois M. Davis, David R. Howell, Barbara Raymond, 1999-05-11 Advances in information technology have led us to rely on easy communication and readily available information both in our personal lives and in the life of our nation For the most part we have rightly welcomed these changes But information that is readily available is available to friend and foe alike a system that relies on communication can become useless if its ability to communicate is interfered with or destroyed Because this reliance is so general attacks on the information infrastructure can have widespread effects both for the military and for society And such attacks can come from a variety of sources some difficult or impossible to identify This the third volume in the Strategic Appraisal series draws on the expertise of researchers from across RAND to explore the opportunities and vulnerabilities inherent in the increasing reliance on information technology looking both at its usefulness to the warrior and the need to protect its usefulness for everyone The Strategic Appraisal series is intended to review for a broad audience issues bearing on national security and defense planning **Battle-wise: Seeking Time-Information Superiority in Networked Warfare** , *Information Operations* Joint Forces Staff College (U.S.), 2004 The modern means of communication have turned the world into an information fishbowl and in terms of foreign policy and national security in post Cold War power politics helped transform international power politics Information operations IO in which time zones are as important as national boundaries is the use of modern technology to deliver critical information and influential content in an effort to

shape perceptions manage opinions and control behavior Contemporary IO differs from traditional psychological operations practiced by nation states because the availability of low cost high technology permits nongovernmental organizations and rogue elements such as terrorist groups to deliver influential content of their own as well as facilitates damaging cyber attacks hactivism on computer networks and infrastructure As current vice president Dick Cheney once said such technology has turned third class powers into first class threats Conceived as a textbook by instructors at the Joint Command Control and Information Warfare School of the U S Joint Forces Staff College and involving IO experts from several countries this book fills an important gap in the literature by analyzing under one cover the military technological and psychological aspects of information operations The general reader will appreciate the examples taken from recent history that reflect the impact of IO on U S foreign policy military operations and government organization Sea Power and American Interests in the Western Pacific David C. Gompert,2013-04-09 This book examines the strategic choices that American and Chinese decisionmakers face regarding sea power in the Western Pacific shaped by geography history technology and politics In particular the author explores the potential for cooperation on maritime security in the Western Pacific and how the United States might pursue such cooperation as part of a broader strategy to advance its interests in the region **Nomination of David C. Gompert to be Principal Deputy Director of National Intelligence** United States. Congress. Senate. Select Committee on Intelligence,2010 *Debating Political Reform in China* Suisheng Zhao,2014-12-18 The growing disconnect between China s market oriented economy with its emerging civil society and the brittle anacronistic and authoritarian state has given rise to intense discussion and debate about political reform not only by Western observers but also among Chinese intellectuals While some expect China s political reform to lead to democratization others have proposed to strengthen the institution of single party rule and provide it with a solid legal base This book brings the ongoing debate to life and explores the options for political reform Offering the perspectives of both Western and Chinese scholars it presents the controversial argument for building a consultive rule of law regime as an alternative to liberal democracy It provides several critiques of this thesis and then tests the thesis through empirical studies on the development of the rule of law in China

ECCWS2015-Proceedings of the 14th European Conference on Cyber Warfare and Security 2015 Dr Nasser Abouzakhar,2015-07-01 Complete proceedings of the 14th European Conference on Cyber Warfare and Security Hatfield UK Published by Academic Conferences and Publishing International Limited Foreign Affairs Strategy Terry L. Deibel,2007-07-23 This book enables readers to think strategically about American foreign policy *Routledge Handbook of Public Diplomacy* Nancy Snow,Philip M. Taylor,2008-11 The Routledge Handbook of Public Diplomacy provides a comprehensive overview of public diplomacy and national image and perception management from the efforts to foster pro West sentiment during the Cold War to the post 9 11 campaign to win the hearts and minds of the Muslim world Editors Nancy Snow and Philip Taylor present materials on public diplomacy trends in public opinion and cultural diplomacy as well

as topical policy issues The latest research in public relations credibility soft power advertising and marketing is included and institutional processes and players are identified and analyzed While the field is dominated by American and British research and developments the book also includes international research and comparative perspectives from other countries Published in association with the USC Center on Public Diplomacy at the Annenberg School based at the University of Southern California

The Information Society Armand Mattelart,2003-04-03 The impact of the information society are multiform and transdisciplinary There are few areas of social political and economic life that have not been affected or challenged by the new technologies of information and communication In this short introduction Armand Mattelart unpacks the notion of the information society and examines why it has become the dominant paradigm for social change in the 21st Century Critically he also asks why the notion has come to dominant in the absence of any critical examination of the conditions under which it has been produced Combining a long term historical and geopolitical perspective Mattelart questions the axioms used to legitimate the Information Society and critically assesses the ways in which it has been conceptualised as a theoretical concept as well as policy making tool This introduction will be of interest to all students of media and communication as well as social scientists in general

Fortifying China Tai Ming Cheung,2013-02-01

Fortifying China explores the titanic struggle to turn China into an aspiring world class military technological power The defense economy is leveraging the country s vibrant civilian economy and gaining access to foreign sources of technology and know how Drawing on extensive Chinese language sources Tai Ming Cheung explains that this transformation has two key dimensions The defense economy is being reengineered to break down bureaucratic barriers and reduce the role of the state fostering a more competitive and entrepreneurial culture to facilitate the rapid diffusion and absorption of technology and knowledge At the same time the civilian and defense economies are being integrated to form a dual use technological and industrial base In Cheung s view the Chinese authorities believe this strategy will play a key role in supporting long term defense modernization For China s neighbors and the United States understanding China s technological industrial and military capabilities is critical to the formulation of economic and security policies Fortifying China provides crucial insight into the impact of China s dual use technology strategy Cheung s systems of innovation framework considers the structure dynamics and performance of the defense economy from a systems level perspective

The Internet and Foreign Policy

James F. Larson,2004 This headline series explores the competing views and complexines of a changing relationship bet the media and foreign policy

Mind the gap promoting a transatlantic revolution in military affairs ,1999 When American defense officials meet informally with their allies and friends from other North Atlantic Treaty Organization countries the conversation often turns to the growing disparity in combat capability between European and U S forces The problem is bemoaned but the participants are not stirred to action This is unfortunate We need a cross Atlantic debate that seeks feasible solutions to this problem Mind the Gap responds directly to that need It not only dissects the problem of a

growing disparity but also rejects its inevitability. Instead it lays out a multitiered strategy for its solution which is specific and practical including processes and procedures for implementation. The proposed strategy is complicated and would be difficult to execute; it would raise questions and even objections. That is as it should be. The alliance nevertheless has solved larger, more complex problems. We urgently need to find a way to close the gap because the problem is getting worse. The United States continues to implement its vision of a globally mobile military force equipped with the latest technology. The European members of NATO are not investing in similar capabilities. As a result, the gap will widen and be increasingly difficult to close.

Military Affairs Catalog United States. Superintendent of Documents, 2000 **NetPolicy.com** Leslie David Simon, 2000-10-31. A panoramic view of the Internet's impact on U.S. and global institutions written from the perspective of the year 2000 Governing the Internet Marcus F. Franda, 2001. This volume explores the many complex issues and challenges that confront governments, technocrats, business people, and others as they try to create and implement rules for a truly global interoperable Internet.
