Brower,Jason D. Brueschke,2023-12-28 The Iran United States Claims Tribunal is arguably the most significant arbitral institution of the twentieth century Although the completion of its last few cases could take a long time the Tribunal s impressive work must be made available now as a guide to the resolution of ongoing disputes and for future tribunals The Tribunal has by this point disposed of well over 98 percent of its caseload Little more remains for its participants to learn but the Tribunal shows no signs of fading away Both of the two States Parties for different reasons see

greater advantage in the Tribunal's prolongation than in its elimination. The authors have succeeded in dealing with all of the most deserving Tribunal subjects. Moreover, their intimate involvement in and knowledge of the Tribunal ensure that their book is a fascinating, important and indispensable contribution to the literature of International Law. This is a definitive book on a monumental event in the law and in history at the close of a century. The Iran United States Claims Tribunal was awarded the ASIL Certificate of Merit. Maritime Organisation, Management and Liability Stephen Girvin, Vibe Ulfbeck, 2021-05-20. This book identifies and examines the legal challenges facing the shipping industry and ship management today. It first addresses flag state rules and private international law as organisational tools of the shipowner for establishing the applicable legal framework in an age of increasing regulatory activity and extraterritorial effect of legislation. It then focuses on sustainability requirements and the liability of shipping companies managing supply chains and ships as waste. The third section considers challenges stemming from times of financial crisis and deals with the cross border impact of shipping insolvencies, the UNCITRAL Model Law and the approaches of different jurisdictions. Finally, the fourth section concerns digitalisation and automation, including delivery on the basis of digital release codes, bills of lading based on blockchain technology, the use of web portals and data sharing, and particular aspects of the law relating to autonomous ships, notably in marine insurance and carriage of goods. The book will be a useful resource for academics and practising lawyers working in shipping and maritime law. *International Law Reports: Volume 84* E. Lauterpacht, C. J. Greenwood, 1991.
