Rings Hopf Algebras And Brauer Groups:

Rings, Hopf Algebras, and Brauer Groups Stefaan Caenepeel, A Verschoren, 2020-09-29 Based on papers presented at a recent international conference on algebra and algebraic geometry held jointly in Antwerp and Brussels Belgium Presents both survey and research articles featuring new results from the intersection of algebra and geometry *Brauer Groups, Hopf Algebras, and Galois Theory* Stefaan Caenepeel, 1998 This volume is devoted to the Brauer group of a commutative ring and related invariants Part I presents a self contained exposition of the Brauer group of a commutative ring Included is a systematic development of the theory of Grothendieck topologies and étale cohomology and discussion of topics such as Gabber's theorem and the theory of Taylor's big Brauer group of algebras without a unit Part II presents a systematic development of the Galois theory of Hopf algebras with special emphasis on the group of Galois objects of a cocommutative Hopf algebra Brauer Groups, Hopf Algebras and Galois Theory Stefaan Caenepeel, 2002-03-31 This volume is devoted to the Brauer group of a commutative ring and related invariants Part I presents a new self contained exposition of the Brauer group of a commutative ring Included is a systematic development of the theory of Grothendieck topologies and étale cohomology and discussion of topics such as Gabber's theorem and the theory of Taylor's big Brauer group of algebras without a unit Part II presents a systematic development of the Galois theory of Hopf algebras with special emphasis on the group of Galois objects of a cocommutative Hopf algebra The development of the theory is carried out in such a way that the connection to the theory of the Brauer group in Part I is made clear Recent developments are considered and examples are included The Brauer Long group of a Hopf algebra over a commutative ring is discussed in Part III This provides a link between the first two parts of the volume and is the first time this topic has been discussed in a monograph Audience Researchers whose work involves group theory The first two parts in particular can be recommended for supplementary graduate course use **Hopf Algebras in Noncommutative Geometry and Physics** Stefaan Caenepeel, Fred Van Oystaeyen, 2019-05-07 This comprehensive reference summarizes the proceedings and keynote presentations from a recent conference held in Brussels Belgium Offering 1155 display equations this volume contains original research and survey papers as well as contributions from world renowned algebraists It focuses on new results in classical Hopf algebras as well as the Taming Wild Extensions: Hopf Algebras and Local Galois Module Theory Lindsay Childs, 2000 This book studies Hopf algebras over valuation rings of local fields and their application to the theory of wildly ramified extensions of local fields The results not previously published in book form show that Hopf algebras play a natural role in local Galois module theory Included in this work are expositions of short exact sequences of Hopf algebras Hopf Galois structures on separable field extensions a generalization of Noether's theorem on the Galois module structure of tamely ramified extensions of local fields to wild extensions acted on by Hopf algebras connections between tameness and being Galois for algebras acted on by a Hopf algebra constructions by Larson and Greither of Hopf orders over valuation rings ramification criteria of Byott and

Greither for the associated order of the valuation ring of an extension of local fields to be Hopf order the Galois module structure of wildly ramified cyclic extensions of local fields of degree p and p^2 and Kummer theory of formal groups Beyond a general background in graduate level algebra some chapters assume an acquaintance with some algebraic number theory From there this exposition serves as an excellent resource and motivation for further work in the field *Hopf Algebras*
