Rise Of The Fiscal State In Europe C 1200 1815:

The Rise of the Fiscal State in Europe c.1200-1815 Richard Bonney, 1999-09-02 In this volume an international team of scholars builds up a comprehensive analysis of the fiscal history of Europe over six centuries It forms a fundamental starting point for an understanding of the distinctiveness of the emerging European states and highlights the issue of fiscal power as an essential prerequisite for the development of the modern state The study underlines the importance of technical developments by the state its capacity to innovate and however imperfect the techniques the greater detail and sophistication of accounting practice towards the end of the period New taxes had been developed new wealth had been tapped new mechanisms of enforcement had been established In general these developments were made in western Europe the lack of progress in some fiscal systems especially those in eastern Europe is an issue of historical importance in its own right and lends particular significance to the chapters on Poland and Russia By the eighteenth century mountains of debt and high debt revenue ratios had become the norm in western Europe yet in the east only Russia was able to adapt to the western model by 1815 The capacity of governments to borrow and the interaction of the constraints on borrowing and the power to tax had become the real test of the fiscal powers of the modern state by 1800 15 *The Rise of Fiscal States* Bartolomé Yun-Casalilla, Patrick K. O'Brien, 2012-05-24 From the Netherlands to the Ottoman Empire to Japan and India this groundbreaking volume confronts the complex and diverse problem of the formation of fiscal states in Eurasia between 1500 and 1914 This series of country case studies from leading economic historians reveals that distinctive features of the fiscal state appeared across the region at different moments in time as a result of multiple independent but often interacting stimuli such as internal competition over resources European expansion international trade globalisation and war The essays offer a comparative framework for re examining the causes of economic development across this period and show for instance the central role that the more effective fiscal systems of Europe during the seventeenth and eighteenth centuries played in the divergence of east and west as well as the very different paths to modernisation taken across the world

State, Economy and the Great Divergence Peer Vries, 2015-02-26 State Economy and the Great Divergence provides a new analysis of what has become the central debate in global economic history the great divergence between European and Asian growth Focusing on early modern China and Western Europe in particular Great Britain this book offers a new level of detail on comparative state formation that has wide reaching implications for European Eurasian and global history Beginning with an overview of the historiography Peer Vries goes on to extend and develop the debate critically engaging with the huge volume of literature published on the topic to date Incorporating recent insights he offers a compelling alternative to the claims to East West equivalence or Asian superiority which have come to dominate discourse surrounding this issue This is a vital update to a key issue in global economic history and as such is essential reading for students and scholars interested in keeping up to speed with the on going debates *The Oxford Handbook of Early Modern European*

History, 1350-1750 Hamish Scott, 2015-07-23 This Handbook re-examines the concept of early modern history in a European and global context. The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching, research and scholarly publishing. More recently, however, the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned. The Oxford Handbook of Early Modern European History 1350-1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing. It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study. The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity. Volume II is devoted to Cultures and Power, opening with chapters on philosophy, science, art and architecture, music and the Enlightenment. Subsequent sections examine Europe beyond Europe with the transformation of contact with other continents during the first global age and military and political developments, notably the expansion of state power.

[Land and Labor Tax in](#)

Imperial Qing China (1644-1912) Yongqin Guo,2022-07-18 In this volume Guo Yongqin provides an overview of the most important taxes land and labor tax in Imperial Qing China 1644 1912 The previously unpublished fiscal sources presented in this volume give a tremendous amount of information about Qing society and economy like the bureaucratic system political institutions economic inequality and environmental conditions The data is accompanied by a detailed introduction offering a valuable resource for further research on how the standardized tax system performed and affected the Qing regime **War, Revenue, and State Building** Sheldon Pollack,2011-03-15 In a relatively short time the American state developed from a weak highly decentralized confederation composed of thirteen former English colonies into the foremost global superpower This remarkable institutional transformation would not have been possible without the revenue raised by a particularly efficient system of public finance first crafted during the Civil War and then resurrected and perfected in the early twentieth century That revenue financed America s participation in two global wars as well as the building of a modern system of social welfare programs Sheldon D Pollack shows how war revenue and institutional development are inextricably linked no less in the United States than in Europe and in the developing states of the Third World He delineates the mechanisms of political development and reveals to us the ways in which the United States too once was and still may be a developing nation Without revenue states cannot maintain political institutions undergo development or exert sovereignty over their territory Rulers and their functionaries wield the coercive powers of the state to extract that revenue from the population under their control From this perspective the state is seen as a highly efficient machine for extracting societal revenue that is used by the state to sustain itself War Revenue and State Building traces the sources of public revenue available to the American state at specific junctures of its history in particular during times of war the revenue strategies pursued by its political leaders in response to these factors and the consequential impact of those strategies on the development of the American state **Tax Law, State-Building and the Constitution** Dominic de Cogan,2020-08-06 This monograph looks at how tax is intertwined with constitutional law and the state in the UK It looks at a variety of topics including tax devolution scrutiny and reform of tax legislation the protection of taxpayers and the domestic legal processing of international rules and problems Tax Law State Building and the Constitution presents and interrogates five key claims First there is a clear overlap between the concerns of tax and constitutional lawyers Secondly the tax system is being deeply affected by the fast pace of constitutional change Thirdly decisions taken in the tax field are likely to have a reverse influence on the evolution of the constitution Fourthly these relationships are heavily context dependent with tax making all the difference to some ongoing constitutional controversies whilst having very little to do with others Fifthly by acknowledging tax as an important moving part within the contemporary constitution we might understand both tax and constitutional law a little better The book therefore contributes to deeper theoretical debates on the identity of tax law as a discipline the relevance of tax to public lawyers the meaning of state building in the recent history of a developed country and the importance of public finances to a wider sense of what is

going on These are questions that ought to command the attention of tax and constitutional law academics as well as policy makers and reformers Runner up of the 2022 SLS Peter Birks Prize for Outstanding Legal Scholarship **War, Trade and the State** David Ormrod, Gijs Rommelse, 2020 A reassessment of the Anglo Dutch wars of the second half of the seventeenth century demonstrating that the conflict was primarily about trade **A Big History of Globalization** Julia Zinkina, David Christian, Leonid Grinin, Ilya Ilyin, Alexey Andreev, Ivan Aleshkovski, Sergey Shulgin, Andrey Korotayev, 2019-04-12 This book presents the history of globalization as a network based story in the context of Big History Departing from the traditional historic discourse in which communities cities and states serve as the main units of analysis the authors instead trace the historical emergence growth interconnection and merging of various types of networks that have gradually encompassed the globe They also focus on the development of certain ideas processes institutions and phenomena that spread through those networks to become truly global The book specifies five macro periods in the history of globalization and comprehensively covers the first four from roughly the 9th 7th millennia BC to World War I For each period it identifies the most important network related developments that facilitated or even spurred on such transitions and had the greatest impacts on the history of globalization By analyzing the world system s transition to new levels of complexity and connectivity the book provides valuable insights into the course of Big History and the evolution of human societies **The Hundred Years War Revisited** Anne Curry, 2019-08-24 The conflict between England and France in the 14th and 15th centuries never ceases to fascinate This stimulating edited collection inspired by the Problems in Focus volume originally published in 1971 provides a fresh and accessible insight into the key aspects of The Hundred Years War With chapters written by leading experts in the field based on new methodologies and recent advances in scholarship this book places the Anglo French wars into a range of wider contexts such as politics the home front the church and chivalry Adopting a sustained comparative approach with attention paid to both England and France The Hundred Years War Revisited provides a clear and comprehensive synthesis of the major trends in research on the Hundred Years War Concise and thought provoking this is essential reading for undergraduate and postgraduate students of medieval history **Sacred Foundations** Anna M. Grzymała-Busse, 2023-01-31 How the medieval church drove state formation in Europe Sacred Foundations argues that the medieval church was a fundamental force in European state formation Existing accounts focus on early modern warfare or contracts between the rulers and the ruled In contrast this major study shows that the Catholic Church both competed with medieval monarchs and provided critical templates for governing institutions the rule of law and parliaments The Catholic Church was the most powerful wealthiest and best organized political actor in the Middle Ages Starting in the eleventh century the papacy fought for the autonomy of the church challenging European rulers and then claiming authority over people territory and monarchs alike Anna Grzymała-Busse demonstrates how the church shaped distinct aspects of the European state Conflicts with the papacy fragmented territorial authority in Europe for centuries to come propagating urban

autonomy and ideas of sovereignty Thanks to its organizational advantages and human capital the church also developed the institutional precedents adopted by rulers across Europe from chanceries and taxation to courts and councils Church innovations made possible both the rule of law and parliamentary representation Bringing to light a wealth of historical evidence about papal conflict excommunications and ecclesiastical institutions Sacred Foundations reveals how the challenge and example of powerful religious authorities gave rise to secular state institutions and galvanized state capacity

First-Class Passengers on a Sinking Ship Richard Lachmann, 2020-01-14 The extent and irreversibility of US decline is becoming ever more obvious as America loses war after war and as one industry after another loses its technological edge Lachmann explains why the United States will not be able to sustain its global dominance He contrasts America's relatively brief period of hegemony with the Netherlands similarly short primacy and Britain's far longer era of leadership Decline in all those cases was not inevitable and did not respond to global capitalist cycles Rather decline is the product of elites' success in grabbing control of resources and governmental powers Not only are ordinary people harmed but also capitalists become increasingly unable to coordinate their interests and adopt policies and make investments necessary to counter economic and geopolitical competitors elsewhere in the world Conflicts among elites and challenges by non-elites determine the timing and mould the contours of decline Lachmann traces the transformation of US politics from an era of elite consensus to present day paralysis combined with neoliberal plunder explains the paradox of an American military with an unprecedented technological edge unable to subdue even the weakest enemies and the consequences of finance's cannibalisation of the US economy

The Transformation of British Naval Strategy James Davey, 2012 Shows how the system of supply was perfected during the later part of the Napoleonic Wars enabling fleets to stay at sea on a permanent basis After the Battle of Trafalgar the navy continued to be the major arm of British strategy Decades of practice and refinement had rendered it adept at executing operations fighting battles blockading and convoying across the globe And yet as late as 1807 fleets were forced from their stations due to an ineffective provisioning system The Transformation of British Naval Strategy shows how sweeping administrative reforms enacted between 1808 and 1812 established a highly effective logistical system changing an ineffective supply system into one which successfully enabled a fleet to remain on station for as long as was required James

Davey examines the logistical support provided for fleets sent to Northern Europe during the Napoleonic War and shows how this new supply system successfully transformed naval operations enabling the navy to pursue crucial objectives of national importance protect essential exports and imports and attack the economies of the Napoleonic Empire The Transformation of British Naval Strategy is a detailed study of national policy administrative and political reform and strategic viability It delves into the nature of the British state its relationship with the private sector and its ability to reform itself in a time of war Bureaucratic restructuring represented the last stage in a century long process of logistical improvement As a result of the reforms the navy was able to conduct operations beyond the realms of possibility even twenty years earlier and saw the reach of its power transformed Military and Napoleonic historians will find this book invaluable JAMES DAVEY is Research Curator at the National Maritime Museum and Visiting Lecturer at the University of Greenwich where he teaches British naval history
