Birotteau. The secrets of a princess HonoreÏ de Balzac,1906 *The Rise of the Image, the Fall of the Word* Mitchell Stephens,1998-10-08 For decades educators and cultural critics have deplored the corrosive effects of electronic media on the national consciousness The average American reads less often writes less well And numbed by the frenetic image bombardment of music videos commercials and sound bites we may also it is argued think less profoundly But wait Is it just possible that some good might arise from the ashes of the printed word Most emphatically yes argues Mitchell Stephens who asserts that the moving image is likely to make our thoughts not more feeble but more robust Through a fascinating overview of previous communications revolutions Stephens demonstrates that the charges that have been leveled against television have been faced by most new media including writing and print Centuries elapsed before most of these new forms of communication would be used to produce works of art and intellect of sufficient stature to overcome this inevitable mistrust and nostalgia Using examples taken from the history of photography and film as well as MTV experimental films and Pepsi commercials the author considers the kinds of work that might unleash in time the full power of moving images And he argues that these works an emerging computer edited and distributed new video have the potential to inspire

transformations in thought on a level with those inspired by the products of writing and print Stephens sees in video s complexities simultaneities and juxtapositions new ways of understanding and perhaps even surmounting the tumult and confusions of contemporary life Sure to spark lively even heated debate *The Rise of the Image the Fall of the Word* belongs in the library of millennium watchers everywhere *The Rise and Fall of D.O.D.O.* Neal Stephenson,Nicole Galland,2017-06-13 A New York Times Bestseller From bestselling author Neal Stephenson and critically acclaimed historical and contemporary commercial novelist Nicole Galland comes a captivating and complex near future thriller combining history science magic mystery intrigue and adventure that questions the very foundations of the modern world When Melisande Stokes an expert in linguistics and languages accidentally meets military intelligence operator Tristan Lyons in a hallway at Harvard University it is the beginning of a chain of events that will alter their lives and human history itself The young man from a shadowy government entity approaches Mel a low level faculty member with an incredible offer The only condition she must sign a nondisclosure agreement in return for the rather large sum of money Tristan needs Mel to translate some very old documents which if authentic are earth shattering They prove that magic actually existed and was practiced for centuries But the arrival of the scientific revolution and the Age of Enlightenment weakened its power and endangered its practitioners Magic stopped working altogether in 1851 at the time of the Great Exhibition at London s Crystal Palace the world s fair celebrating the rise of industrial technology and commerce Something about the modern world jams the frequencies used by magic and it s up to Tristan to find out why And so the Department of Diachronic Operations D O D O gets cracking on its real mission to develop a device that can bring magic back and send Diachronic Operatives back in time to keep it alive and meddle with a little history at the same time But while Tristan and his expanding operation master the science and build the technology they overlook the mercurial and treacherous nature of the human heart Written with the genius complexity and innovation that characterize all of Neal Stephenson s work and steeped with the down to earth warmth and humor of Nicole Galland s storytelling style this exciting and vividly realized work of science fiction will make you believe in the impossible and take you to places and times beyond imagining
