Research Handbook on International Insurance Law and Regulation Julian Burling, Julian M. Burling, Kevin Lazarus, 2012

Global insurance and its rapidly evolving law and regulation demands international research. To this aim the Handbook offers a truly international collection of essays. Highly renowned experts analyze the key topics currently under international discussion and development. While representing a diversity of national jurisdictions, the focus lies on the largest insurance jurisdictions: USA, UK, and Germany, but newly important jurisdictions like Brazil and China are considered as well. A most valuable and important contribution to international insurance law literature. Manfred Wandt, Director of the Insurance Law Institute, Goethe University Frankfurt, Germany. This Research Handbook is published at an opportune time. A global review of insurance law and regulation is underway. Much reform happens locally with little reference to developments elsewhere, and this Research Handbook brings the strands together. It is a comprehensive review by distinguished authors from different backgrounds, including both leading academics and practitioners. They consider the definitions of insurance, its economic underpinnings, comparative law, and regulations, actual and proposed reforms, the effects on underwriting and claims, and how insurance is studied and taught. Good laws and regulation benefit the market and its customers; bad laws and regulation do the opposite. This book is required reading for all involved in the reform process. David Hertzell, Law Commissioner.

Globalisation has had no greater impact in the commercial world than on insurance: the law which governs it and the risks it seeks to address. Those who inspired this publication and the contributing authors are to be thanked for providing such a necessary and useful reference source. It covers so much of what insurance professionals need to be aware of in the insurance law world of the twenty-first century. Michael Gill, President of the International Insurance Law Association. Given its economic importance, insurance is a field that has been underserved as an area of academic study. This detailed book provides much needed coverage of insurance law and regulation in its international context. Produced in association with Lloyd's, it draws on the expertise both of academics and practising lawyers. Containing 30 comprehensive chapters, it provides in-depth studies on key areas such as the role of international organisations, the judicial interpretation of insurance contract clauses, and transnational regulatory recognition. It also provides thorough introductions to important jurisdictions, including the EU, US, and Japan, as well as focusing on newly emerging economies such as China and Brazil. Specialist topics covered include regulation by and of Lloyd's, the tort of bad faith in the US, microinsurance, and takaful insurance. This well-documented resource will appeal to academics and students in insurance law and regulation, policymakers, and private practice lawyers. The book also aims to stretch the imagination of anyone with an interest in insurance law and regulation, providing detailed analysis and avenues for further investigation.

Globales Risikomanagement in Finanzinstitutionen Dimitris Chorafas, 2013-04-17. Der Schlüssel zum zukünftigen Erfolg im Bankgewerbe liegt in Konzentration und Zielgerichtetheit, und im Management der Risiken. Trotz der Deregulierung können die Banken es sich heute nicht mehr

leisten allen Kunden die sie erreichen können alle Produkte die sie der Gesetzgebung entsprechend anbieten konnten auch wirklich zu offerieren Die erfolgreichen Geldinstitute sind und werden in immer stärkerem Maße die sein die konzentrierte zielgerichtete Strategien entwickeln ihre Gemeinkosten senken ihre Vorteile geschickt ausnutzen ihre Risiken zu berechnen wissen Das wird dazu führen daß sich die Banken weniger ähnlich sehen als in der Vergangenheit und eine sogar noch größere Variationsbreite in ihren Leistungen aufweisen als das heute der Fall ist Und die Sieger ausweisen zu können bedarf es einer tiefgreifenden Analyse der Produktlinien jedes einzelnen Geldinstituts sowie der Strategien die das Management verfolgt Hauptkriterien sind die Fähigkeit zu positiven Ergebnissen zu gelangen und das Risikobewußtsein 1m März 1989 bemerkte der Economist sehr treffend Der Konsens der das Bankgeschäft bestimmt und definiert hat bricht auseinander Geschäftsbanken stufen sich bereits nach der Rentabilität besonders nach der Kapitalverzinsung return on equity ein und nicht nur einfach nach der Größe Sie werden sich in zunehmendem Maße aus Aktivitäten zurückziehen die nicht die entsprechende Rendite erbringen Das ist in der Tat die Richtung die es einzuschlagen gilt Ein weiterer wichtiger Trend ist die Risiko Kontrolle

Finanzmarkt ohne Grenzen? Johannes Loheide, 2008-08-03 Der Finanzsektor gilt als ein führender Sektor der Globalisierung in dem eine politische Einflussnahme auf Grund des Machtgefalles zwischen öffentlichen und territorial ungebundenen privaten Akteuren kaum mehr möglich ist Auf der Grundlage von Interviews mit Experten aus Wirtschaft Politik und Verwaltung zeigt Johannes Loheide jedoch dass auch im internationalen Finanzbereich territoriale Bindungen weiter bestehen Regionale politische Akteure haben weiterhin ein eigenständiges Machtpotential Sie müssen ihre Handlungsmuster aber aufgrund der Arbeitsteilung im Finanzsektor entlang der veränderten Wertschöpfungsketten variieren Der Band zeigt konkrete Handlungsperspektiven regionaler Politik und Finanzplatzgestaltung auf und entwickelt theoretische Ansätze zu Finanzplätzen weiter

Towards a Cognitive Mode in Global Finance Torsten Strulik, Helmut Willke, 2006 The global finance system has been the subject of hot debate for several years Major players such as the International Monetary Fund and the World Bank have come under fire for their financial practices while the role of epistemic authorities including rating agencies remains unclear This book systematically analyzes the role knowledge plays

Die Internationale Politische Ökonomie des Risikos Oliver Kessler, 2008-05-13 für Sophie und Jakob 11

Einleitung 7 Vorwort Am Beginn dieser Arbeit stand eine Unzufriedenheit darüber wie die Asienkrise und die darauf einsetzenden Turbulenzen innerhalb der Wirtschaftswissenschaften und der Internationalen Beziehungen diskutiert wurden Obwohl ich dieses Gefühl zuerst nicht greifen konnte schließlich fehlte mir als Ökonom das politikwissenschaftliche Vokabular erschien mir die gesamte Debatte um die Reformierung der Finanzmärkte als zu kurz gegriffen Der Versuch die Politik am Staat festzumachen und gleichzeitig die Quelle der Instabilität in einer asymmetrischen Informationslage zu verorten ist doch so trivial wie falsch Dennoch hat die Idee der asymmetrischen Information die Diskussion nachhaltig geprägt Ohne die dadurch implizierten Bemühungen zu erhöhter Transparenz und weniger Korruption in Abrede stellen zu wollen stellt sich doch die Frage ob eine Welt vollkommener Transparenz sowohl möglich oder auch nur erstrebenswert ist Die Arbeit versucht aber nicht eine alternative Lösung für die Probleme der Finanzmärkte zu entwerfen sondern fragt im Gegenteil nach den disziplinären Strukturen und Grenzen dieser Diskussion wieso wird Instabilität in genau dieser Art und Weise konzipiert Dieses Buch versteht sich demnach nicht als eine Beobachtung erster sondern zweiter Ordnung Das heißt ich versuche nicht unmittelbar praxisrelevantes Wissen zu produzieren sondern vielmehr zu beobachten wie handlungspraktisches Wissen zum Beispiel durch die Verwendung einer spezifisch ökonomischen Risikosemantik möglich wird

The European Alternative Investment Fund

Managers Directive (AIFMD) Thomas Bernhardt, 2013-10-29 The European Alternative Investment Fund Managers Directive AIFMD has been formulated as a response to the global financial crisis which climaxed in the collapse of Lehman Brothers on 15 September 2008 The securitisation of real estate risks that came about by launching financial innovations such as asset backed securities ABS mortgage backed securities MBS collateralised debt obligations CDO or structured investment vehicles SIV contributed particularly to the fast worldwide circulation of poisoned papers Assuming that the financial crisis of 2008 2009 was the consequence of wrongfully set incentives that primarily concerned the fund managers remuneration the European Commission followed the ideas of Jacques de Larosi re Klaus Heiner Lehne and Poul Nyrup Rasmussen and set the legal focus on the fund managers as these entities launch and distribute financial products such as those mentioned above and also decide on the investment strategy that might bear systemic risks Due to their financial market potential and in view of the design of financial products these entities admittedly have a strong impact on the financial market development and may jointly be responsible for the realisation of systemic risks of transnational dimensions In particular in the view of a steady credit supply of the real economy the enormous transnational mobility of capital and the global competition of financial market regulations it seems doubtful whether one can identify the fund managers as those responsible for the financial market crisis of 2008 2009 This thesis highlights the history symptoms and supposed core reasons of the financial crisis of 2008 2009 and critically assesses whether the AIFMD can reach its objective to effectively contain systemic risks in the context of a globalised financial system
