Risking Change Endings And Beginnings:

Risking Change William F. Sturmer, 1987-01-01 Women's Resources Morgan Grey, 1991 **Creative Teaching and Learning** Marilyn Fryer, 1996 This book provides a comprehensive account of teaching for creativity. It is based on the views of over one thousand teachers and further education lecturers in the United Kingdom working in a wide range of subject areas with young people from 5 to 18x years about creativity development and its relation to everyday classroom life. It is set in the context of the most relevant research on which the author, a qualified teacher, lecturer and psychologist, offers her individual perspective. Suggestions for future educational practice and creativity research are offered. The book explores what is involved in creativity, how this can be assessed and how to recognize creative behaviour and understand the creative process. The teachers and lecturers' views on every aspect of developing creativity are included together with practical guidelines for developing appropriate problem solving skills. Attention is drawn to the landmark work of key creativity development practitioners. The author argues that creativity and innovation need to be taken as seriously in education as in successful modern organizations to enable young people to deal effectively with the accelerating rate of technological, social and economic change.
