Risks And Wrongs:

Risks and Wrongs Jules L. Coleman, 1992-11-27 Jules Coleman discusses the conflict between the goals of justice and economic efficiency in the allocation of risk especially risk pertaining to safety *Causation and Responsibility* Michael S. Moore, 2009 And its relation to causation Philosophers studying the metaphysics of causation Wrongs, Harms, and Compensation Adam Slavny, 2023-08-04 Non instrumentalist private law theory has been dominated by an interpretivist methodology that seeks to understand the concepts doctrines and structures of the law in principled terms This has resulted in the neglect of purely normative analysis and a failure to engage systematically with the methodologies of moral and political philosophy *Wrongs Harms and Compensation Paying for our Mistakes* departs from this approach arguing instead that the justification of tort law is dependent on our underlying moral corrective duties In this book Adam Slavny develops a pluralistic account of these duties which encompasses both wrongful and non wrongful conduct complicating the view that torts should be regarded as a coherent set of wrongs He also places the practice of enforcing corrective duties in a broader context arguing that it should not be isolated or immune to critiques based on distributive justice and that our duties are in fact consistent with institutional arrangements other than tort law including various types of compensation schemes What emerges is neither a wholesale defence of or attack on tort law but an insistence that its normative foundations are much more complex diverse and malleable than a focus on current legal practices would suggest **From Morality to Law and Back Again** Michelle Madden Dempsey, François Tanguay-Renaud, 2023-07-18 John Gardner was one of the most prolific widely read and influential scholars working in philosophy of law This book celebrates explores and develops themes of his work during his sixteen years as Professor of Jurisprudence at University of Oxford Written by a team of contributors whose own work has been influenced by Gardner s and with whom he has worked closely this book engages with many of the concepts themes and issues that were central to his philosophical work and outlook It expands on his arguments offers original rebuttals to some and draws connections with parallel and emerging fields that have been influenced by his work This is the first book length treatment covering the entire range of his scholarship and will serve as a handbook of sorts for those scholars seeking to engage Gardner s work and make connections across the wide range of topics on which he has written In particular the volume comprises discussions of duties to try and succeed in relation to Hume s maxim that ought implies can the role of continuity conservatism and corrective justice in private law the interrelations between wrongdoing blame punishment and the justification of criminal law justifications excuses and responsibility the distinctiveness of the wrongs of rape and discrimination as well as general jurisprudence and how it may or may not illuminate the questions of normativity and the nature of constitutions The volume also engages with further concepts and questions addressed through the prism of Gardner s work include Indigenous rights and law Equity corporate responsibility and the possibility of state crimes and the nature structure and phenomenology of virtue Together the papers collected in this volume pay homage to

the breadth of John Gardner's legal philosophy The conversations begun or continued in this volume will continue to inform the contributors' future work and thus increase the likelihood that John's body of work will have an ever greater influence on the future of legal philosophy

J.L. Austin and the Law Daniel Brian Yeager, 2006 In investigating the relationship between accusation and excuse this study uncovers something about the criminal law's peculiar way of interpreting human action Identifying that something can move us a little closer to discovery or agreement and just what it is that is at stake in criminal law What is at stake in any discussion of criminal law is the meaning and operation of responsibility which makes human action and its consequences so tragic The author confronts the idea of responsibility by mapping the work of J L Austin onto the criminal law

Algorithmic Regulation Karen Yeung, Martin

Lodge, 2019-09-12 As the power and sophistication of big data and predictive analytics has continued to expand so too has policy and public concern about the use of algorithms in contemporary life This is hardly surprising given our increasing reliance on algorithms in daily life touching policy sectors from healthcare transport finance consumer retail manufacturing education and employment through to public service provision and the operation of the criminal justice system This has prompted concerns about the need and importance of holding algorithmic power to account yet it is far from clear that existing legal and other oversight mechanisms are up to the task This collection of essays edited by two leading regulatory governance scholars offers a critical exploration of algorithmic regulation understood both as a means for co ordinating and regulating social action and decision making as well as the need for institutional mechanisms through which the power of algorithms and algorithmic systems might themselves be regulated It offers a unique perspective that is likely to become a significant reference point for the ever growing debates about the power of algorithms in daily life in the worlds of research policy and practice The range of contributors are drawn from a broad range of disciplinary perspectives including law public administration applied philosophy data science and artificial intelligence Taken together they highlight the rise of algorithmic power the potential benefits and risks associated with this power the way in which Sheila Jasanoff's long standing claim that technology is politics has been thrown into sharp relief by the speed and scale at which algorithmic systems are proliferating and the urgent need for wider public debate and engagement of their underlying values and value trade offs the way in which they affect individual and collective decision making and action and effective and legitimate mechanisms by and through which algorithmic power is held to account
