Max Bill Max Bill, Max Bense, 1966 The Authority of Everyday Objects Paul Betts, 2004-06-09 From the Werkbund to the Bauhaus to Braun from furniture to automobiles to consumer appliances twentieth century industrial design is closely associated with Germany In this pathbreaking study Paul Betts brings to light the crucial role that design played in building a progressive West German industrial culture atop the charred remains of the past The Authority of Everyday Objects details how the postwar period gave rise to a new design culture comprising a sprawling network of diverse interest groups including the state and industry architects and designers consumer groups and museums as well as publicists and women's organizations who all identified industrial design as a vital means of economic recovery social reform and even moral regeneration These cultural battles took on heightened importance precisely because the stakes were nothing less than the very shape and significance of West German domestic modernity Betts tells the rich and far reaching story of how and why commodity aesthetics became a focal point for fashioning a certain West German cultural identity This book is situated at the very crossroads of German industry and aesthetics Cold War politics and international modernism institutional life and visual culture **Art Books** Wolfgang M. Freitag, 2013-10-28 First published in 1997 For this second edition of Art Books A Basic Bibliography of Monographs on Artists the vast number of new books published since 1985 was surveyed and evaluated This has resulted in the selection of 3 395 additional titles These selections reflective of the increase in the monographic literature on artists during the last ten years are evidence of the activities of a larger number of art historians in more countries

worldwide of the increasingly diverse and ambitious exhibition programs of museums whose number has also increased dramatically and also of a lively international art market and the attendant gallery activities The selections of the first edition have been reviewed errors have been corrected and important new editions and reprints have been noted The second edition contains 278 names of artists not represented in the first edition **The Global Work of Art** Caroline A. Jones, 2017-06-01

Global biennials have proliferated in the contemporary art world but artists engagement with large scale international exhibitions has a much longer history that has influenced the present in important ways Going back to the earliest world s fairs in the nineteenth century this book argues that globalism was incubated in a century of international art contests and today constitutes an important tactic for artists As world s fairs brought millions of attendees into contact with foreign cultures products and processes artworks became juxtaposed in a theater of nations which challenged artists and critics to think outside their local academies From Gustave Courbet s rebel pavilion near the official art exhibit at the 1855 French World s Fair to curator Beryl Madra s choice of London based Cypriot Hussein Chalayan for the off site Turkish pavilion at the 2006 Venice Biennale artists have used these exhibitions to reflect on contemporary art speak to their own governments back home and challenge the wider geopolitical realm changing art and art history along the way Ultimately Caroline A Jones argues the modern appetite for experience and event structures which were cultivated around the art at these earlier expositions have now come to constitute contemporary art itself producing encounters that transform the public and force us to reflect critically on the global condition **Fake** Kenneth Walton, 2006-05-15

It was the golden age of eBay Optimistic bidders went online to the world s largest flea market in droves ready to spend cash on everything from garden gnomes to Mercedes convertibles Among them were art collectors willing to spend big money on unseen paintings hoping to buy valuable pieces of art at below market prices EBay also attracted the occasional con artist unable to resist the temptation of abusing a system that prided itself on being based on trust Kenneth Walton once a lawyer bound by the ethics of his profession to uphold the law was seduced by just such a con artist and eventually became one himself Ripped from the headlines of the New York Times the first newspaper to break the story Fake describes Walton s innocent beginnings as an online art trading hobbyist and details the downward spiral of greed that ultimately led to his federal felony conviction What started out as a satisfying exercise in reselling thrift store paintings for a profit in order to pay back student loans and mounting credit card debt soon became a fierce addiction to the subtle deception of luring unsuspecting bidders into overpaying for paintings of questionable origins In a landscape peopled with colorful eccentrics hoping to score museum quality paintings at bargain prices Walton entered into a partnership with Ken Fetterman an unslick yet somehow very effective con man Over the course of eighteen months they managed to take in hundreds of thousands of dollars by selling forged paintings and bidding on their own auctions to drive up the prices When their deception was discovered and made international headlines Walton found himself stalked by reporters and federal agents while Fetterman went on the lam

sparking a nationwide FBI manhunt His elaborate game of cat and mouse lasted nearly three years until the feds caught up with him after a routine traffic violation and brought him to justice In this sensational story of the seductive power of greed Kenneth Walton breaks his silence for the first time and in his own words details the international scandal that forever changed the way eBay does business **Hfg Ulm** René Spitz, 2002 This book provides the first chronological account of the political history of the Ulm School of Design considered to be the most influential educational institution in the world for contemporary design **Imagine Math 7** Michele Emmer, Marco Abate, 2020-10-07 Imagine mathematics imagine with the help of mathematics imagine new worlds new geometries new forms Imagine building mathematical models that make it possible to manage our world better imagine solving great problems imagine new problems never before thought of imagine combining music art poetry literature architecture theatre and cinema with mathematics Imagine the unpredictable and sometimes counterintuitive applications of mathematics in all areas of human endeavour This seventh volume starts with a homage to the Italian artist Mimmo Paladino who created exclusively for the Venice Conference 2019 ten original and unique works of art paper dedicated to the themes of the meeting A large section is dedicated to the most recent Fields Medals including a Homage to Maryam Mirzakhani including a presentation of the exhibition on soap bubbles in art and science that took place in 2019 A section is dedicated to cinema and theatre including the performances by Claire Bardainne Adrien Mondot A part of the conference focused on the community of mathematicians their role in literature and even in politics with the extraordinary example of Antanas Mockus Major of Bogot Mathematics in the constructions of bridges in particular in Italy in the Sixties was presented by Tullia Iori A very particular contribution on Origami by a mathematician Marco Abate and an artist Alessandro Beber And many other topics As usual the topics are treated in a way that is rigorous but captivating detailed and full of evocations This is an all embracing look at the world of mathematics and culture The world life culture everything has changed in a few weeks with the Coronavirus Culture science are the main ways to safeguard people s physical and social life Trust in humanity s creativity and ability The motto today in Italy is Everything will be fine This work is addressed to all those who have an interest in Mathematics **Ernesto Nathan Rogers** Maurizio Sabini, 2021-02-11 Architect Ernesto Nathan Rogers 1909 1969 was a towering figure in 20th century Italian architecture with a significant impact at the international level Through the work of his collaborative firm Banfi Belgiojoso Peressutti Rogers or BBPR the editorship of publications such as Domus and Casabella and his teaching at the Politecnico in Milan Rogers ensured a lasting influence on the field as a practitioner theorist and educator However his contributions have been largely neglected by scholarship outside of Italy Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects this book re assesses Ernesto Nathan Rogers cultural legacy It is the first comprehensive critical work on Rogers in English and emphasizes Rogers vision for the role of the architect as a public intellectual as well as his commitment to pursue a renewed path of professional and cultural research within the

Modern Project The book also discusses Roger's willingness to challenge academic classicized monumentality as well as modernist stereotypes to emerge as a leader of Italian design in the aftermath of World War II his interest in all scales of design and planning with a cross disciplinary mentality tradition in modernity and criticality as a mode of practice to bring a detailed account of the work and thought of Ernesto Nathan Rogers to an English speaking audience for the first time With a foreword by Kenneth Frampton

Form and Feeling Antonio Sergio Bessa, 2021-02-09 Winner 2022 Association of University Presses Book Jacket and Journal Show in the Scholarly Illustrated Category A significant contribution on the development and aftermath of post World War II Concretism in Brazil Form and Feeling features a collection of essays by noted scholars exploring the sensorial experience based and participatory practices pioneered in the 1950s by artists and poets such as Flávio de Carvalho Ivan Serpa Heli Oiticica Haroldo de Campos Mary Vieira Lygia Pape Anna Maria Maiolino Lygia Clark Waly Salomó and Emil Forman among many others Fourteen thought provoking essays examine how many of their strategies constituted a pertinent critique of the country's wide ranging embrace of Eurocentric modernity while anticipating a number of practices prevalent among contemporary artists today namely the rise of art as social practice the embrace of pedagogical concerns by artists and relational aesthetics The fourteen essays collected in this volume consider the ramifications of modernist abstraction in the second half of the twentieth century and contribute to a growing academic field in postwar Brazilian and Latin American art history Contributions to this anthology examine the development of modernist ideas that flourished in Brazil during a controversial period interspersed by dictatorial regimes The global aspect of Brazilian art is especially evident in these studies presenting the relational complexity of their subjects as transcultural transnational actors while simultaneously contributing to a growing increasingly nuanced understanding of visual and material culture performance and criticism in Brazil Form and Feeling continues the important process of re-analyzing the intersections of Concretism and Neo concretism arguing for greater affinities between the primary and lesser known cast of characters while equally redistributing the strict geographical divisions of São Paulo and Rio de Janeiro This anthology broadly situates this extraordinary period of artistic experimentation in direct relationship to contemporary factors such as psychoanalysis educational systems poetry politics and feminism It crafts innovative relationships about the constructive hierarchies of form and space poetry and painting and mathematics and philosophy thus engendering new positions for a deeply ensconced period in Brazilian history

The Möbius Strip Topology Klaus Möbius, Martin Plato, Anton Savitsky, 2022-11-30 In the 19th century pure mathematics research reached a climax in Germany and Carl Friedrich Gauss 1777-1855 was an epochal example August Ferdinand Möbius 1790-1868 was his doctoral student whose work was profoundly influenced by him In the 18th century it had been mostly the French school of applied mathematics that enabled the rapid developments of science and technology in Europe How could this shift happen It can be argued that the major reasons were the devastating consequences of the Napoleonic Wars in Central Europe leading to the total defeat of Prussia in

1806 Immediately following far reaching reforms of the entire state system were carried out in Prussia and other German states also affecting the educational system It now guaranteed freedom of university teaching and research This attracted many creative people with new ideas enabling the golden age of pure mathematics and fundamental theory in physical sciences M bius legacy reaches far into today s sciences arts and architecture The famous one sided M bius strip is a paradigmatic example of the ongoing fascination with mathematical topology This is the first book to present numerous detailed case studies on M bius topology in science and the humanities It is written for those who believe in the power of ideas in our culture experts and laymen alike *International Design Organizations* Jeremy Aynsley, Alison J. Clarke, Tania Messell, 2022-01-13 This innovative volume brings together international design scholars to address the history and present day status of national and international design organizations working across design disciplines and located in countries including Argentina Turkey Estonia Switzerland Italy China and the USA In the second half of the 20th century many non governmental organizations were created to address urgent cultural economic and welfare issues Design organizations set out to create an international consensus for the future direction of design This included enhancing communication between professionals educators and practitioners raising standards for design and creating communities of designers across linguistic national and political borders Shared needs and agendas were identified and categories of design constantly defined and re defined often with overt cultural and political intents Drawing on an impressive range of original research archival sources and oral testimony this volume questions the aims and achievements of national and international design organizations in light of their subsequent histories and their global remits The Cold War period is central to the book while many chapters draw on post colonial perspectives to interpret how transnational networks and negotiations took place at events and congresses and through publication **Concrete Encoded** Nathaniel Wolfson, 2025-11-04 A study of concrete art and poetry its implications and influence in Brazil Concrete art and poetry burst onto Brazil s cultural stage in the 1950s while the country was embarking on a dizzying period of modernization Bringing together key poets and visual artists alongside less recognized figures Nathaniel Wolfson shows that concretism was hardly socially inert as pundits have suggested Rather it presciently grappled with an emerging information age that would soon reorganize human relations globally Concrete Encoded describes a nascent cybernetic imaginary Concretism has long been considered Brazil s most global aesthetic movement Wolfson traces new circles of international theorists and practitioners involved in critical technological thought Wolfson argues that concrete poetry is the quintessential literary genre of the early information age He shows that Brazilian poets artists and designers contested the military dictatorship s technological authoritarianism and information gathering operations Vigorous experimentalists their attention to form and semantics unveiled both the creative and nefarious possibilities of algorithmic writing A highly original work Concrete Encoded reckons with aesthetic responses from Brazil to an advancing capitalist and digital era *Mathematics and Culture I* Michele Emmer, 2003-12-02 A

fascinating and insightful collection of papers on the strong links between mathematics and culture The contributions range from cinema and theatre directors to musicians architects historians physicians graphic designers and writers The text highlights the cultural and formative character of mathematics its educational value and imaginative dimension These articles are highly interesting sometimes amusing and make excellent starting points for researching the strong connection between scientific and literary culture

Figuration/Abstraction Charlotte Benton, 2017-07-05 The notion that the practice of abstraction was confined to Western Europe while a stereotyped form of figuration defined the art of the Eastern bloc continues to dominate art historical accounts of public sculpture of the post war period This book offers a number of alternative readings and demonstrates strategic uses of figuration and abstraction across East and West Encompassing sites of memory including war memorials and Holocaust memorials state civic and corporate sculpture as well as temporary and unexecuted projects the book shows that persuasive advocates of figuration were to be found in the West while in the East imaginative experiments in abstraction were proposed in the name of Social Realism Presenting fresh insights into sculptural practice in the period between 1945 and 1968 this book brings together a wide range of authors some of whom have never before been published in English Their essays are complemented by extracts from documentary texts which give a flavour of contemporary debates and a biographical section includes entries on many sculptors who will be unfamiliar to an English speaking audience
