Maier, 2017-09-08 This collection of selected essays by Werner J Cahnman brings together out of scattered dispersion his writings about Max Weber Ferdinand Toennies and historical sociology The great theoretical range and depth of his intellect and mastery of sociological thinking is apparent as he discusses the impact of romanticism on modern thought and how Weber and Toennies both analyzed and reacted to modernity Cahnman places Weber 1864-1920 the dominant figure in twentieth century sociology in the midst of the methodological controversies so characteristic of contemporary social science and he fully discusses the overarching importance of Weberian ideal type theory Although less well known than Weber Toennies 1855-1936 was also a sociologist of the first rank He is best remembered for his enormously influential twin concepts *Gemeinschaft* and *Gesellschaft* which contributed to our understanding of the historical and sociological basis for the change from premodern to modern societies The essays in this volume establish Toennies intellectual connections to Karl Marx Max Weber Emile Durkheim and Herbert Spencer and clarify his influence upon American sociology Cahnman stood against strict separations between history and

sociology and his essays are all informed by a wonderful admixture of the theoretical and the concrete They demonstrate how a genuine historical sociology not unlike that of Weber and Toennies can find and explain linkages between seemingly disparate events spanning time and place This volume will be of interest to sociologists political scientists and intellectual historians

Max Weber's Sociology of Civilizations: A Reconstruction Stephen Kalberg, 2021-07-29 This volume examines civilizations through the broad lens articulated by the works of Max Weber In focusing upon his comparative historical mode of analysis and his causal explanations for the sources contours and trajectories of civilizations this study reconstructs Weber's sociology in a manner that provides clear guidelines to researchers seeking to investigate civilizations systematically Through detailed interpretations of the West's unique development from Antiquity to the Modern era precise comparisons to the long range and singular pathways taken by China and India and careful demarcations of the particular rationalisms of several civilizations the author addresses Weber's powerful model building on the one hand and his opposition to organic holism and structural presuppositions on the other hand Both a broad ranging conceptual framework and case based empirical investigations are pivotal to Weber His research strategy emphasizes further the subjective meanings of actors East and West and the deep cultural origins of groups Finally this volume masterfully conveys Weber's contextual and multi causal methodology rooted in a tight interweaving of the present with the past Max Weber's Sociology of Civilizations A Reconstruction will appeal to comparative sociologists and historians as well as to theorists of all persuasions The social scientist pursuing a cross civilizational agenda will here discover the distinct contribution of Weber's interpretive understanding procedures to the now essential field of civilizational analysis
