Maximizing Gene Expression:

Maximizing Gene Expression William Reznikoff, Larry Gold, 2014-05-20 Maximizing Gene Expression focuses on prokaryotic and eukaryotic gene expression The book first discusses E coli promoters Topics include structure analysis steps in transcription initiation structure function correlation and regulation of transcription initiation The text also highlights yeast promoters including elements that select initiation sites transcription regulation regulatory proteins and upstream promoter elements The text also describes protein coding genes of higher eukaryotes instability of messenger RNA in bacteria and replication control of the ColE1 type plasmids The text then describes translation initiation including the translation of prokaryotes and eukaryotes The book puts emphasis on the selective degradation of abnormal proteins in bacteria Topics include proteins rapidly hydrolyzed in E coli intracellular aggregates of abnormal polypeptides energy requirement and pathway for proteins proteolytic enzymes in E coli and regulation of ion expression The text also highlights the detection of proteins produced by recombinant DNA techniques and mechanism and practice The book is a good source of information for readers wanting to study gene expression Guide to Protein Purification Murray P. Deutscher, 1990

Guide to Protein Purification designed to serve the needs of the student experienced researcher and newcomer to the field is a comprehensive manual that provides all the up to date procedures necessary for purifying characterizing and handling proteins and enzymes in one source Key Features Detailed procedures newly written for this volume Extensive practical information Rationale and strategies for protein and enzyme purification Personal perspectives on enzyme purification by eminent researchers Among the Topics Covered General methods for handling proteins and enzymes Extraction subcellular fractionation and solubilization procedures Comprehensive purification techniques Specialized purification procedures Protein characterization Immunological procedures Computer analysis of protein structure **Principles of Gene**
