relevance **Facing the Limits of the Law** Erik Claes, Wouter Devroe, Bert Keirsbilck, 2009-04-21 Many legal experts no
longer share an unbounded trust in the potential of law to govern society efficiently and responsibly They often experience
the limits of the law as they are confronted with striking inadequacies in their legal toolbox with inner inconsistencies of the
law with problems of enforcement and obedience and with undesired side effects and so on The contributors to this book
engage in the challenging task of making sense of this experience Against the background of broader cultural
transformations such as globalisation new technologies individualism and cultural diversity they revisit a wide range of areas
of the law and map different types of limits in relation to some basic functions and characteristics of the law Additionally they
offer a set of strategies to manage justifiably law's limits such as dedramatising law's limits conceptual refinement
constructivism striking the right balance between different functions of the law seeking for complementarity between law
and other social practices **Liberal Legality** Lewis D. Sargentich, 2018-04-19 Shows that the diverse ways of reasoning
and judging in our law arise from the same root a commitment to liberal legality **The Horizontal Effect Revolution and
the Question of Sovereignty** Johan van der Walt, 2014-08-25 That the recent turn in European Constitutional Review has
effectively brought about a revolution in European law has been observed before At issue are two major developments in
European judicial review On the one hand the European Court of Human Rights has been collapsing traditional boundaries
between constitutional law and private law with a series of decisions that effectively recognized the horizontal effect of
Convention rights in the private sphere On the other hand the European Court of Justice has also given horizontal effect to
fundamental liberties embodied in the Treaty on the Function of the European Union in a number of recent cases in a way
that puts established boundaries between Member State and Union competences in question This book takes issue with these
developments by bringing to the fore a key issue that the horizontality effect debate has hitherto largely overlooked namely
the question of sovereignty It shows with detailed references to especially the American debate on state action and the
German debate on *Drittwirkung* that horizontal effect cannot be understood consistently without coming to grips with the
conceptions of state sovereignty that inform different approaches to horizontal effect **John Rawls: Principles of Justice**

From Bakunin to Lacan Saul Newman,2007-01-01 In its comparison of anarchist and poststructuralist thought From Bakunin to Lacan contends that the most pressing political problem we face today is the proliferation and intensification of power Saul Newman targets the tendency of radical political theories and movements to reaffirm power and authority in different guises in their very attempt to overcome it In his examination of thinkers such as Bakunin Lacan Stirner and Foucault Newman explores important epistemological ontological and political questions Is the essential human subject the point of departure

from which power and authority can be opposed Or is the humanist subject itself a site of domination that must be unmasked
As it deftly charts this debate s paths of emergence in political thought the book illustrates how the question of essential
identities defines and re defines the limits and possibilities of radical politics today
