and experiences a host of other erratic disturbances none of which his doctors can explain Leo 53 a research scientist and Addie a collage artist have a loving and happy marriage They d planned on many more years of work and travel dinner with friends quiet evenings at home with the cat But as Leo s periods of lucidity become rarer those dreams fall away and Addie finds herself less and less able to cope with an increasingly unbearable present Eventually Leo is diagnosed with early onset dementia in the form of Lewy body disease Life expectancy ranges from 3 to 20 years A decidedly uncharacteristic act of violence makes it clear that he cannot live at home He moves first to an assisted living facility and then to a small apartment with a caretaker where over time he descends into full cognitive decline Addie s agony anger and guilt result in self imposed isolation which mirrors Leo s diminished life And so for years all she can do is watch him die too soon and yet not soon enough Kirshenbaum captures the pair s final years months and days in short scenes that burn with despair dark humor and rage tracking the brutal destruction of the disease as well as the moments of love and beauty that still exist for them
