Direct Instruction: A practitioner's handbook

Kurt Engelmann,2024-04-05 Direct Instruction DI is a powerful instructional approach designed to ensure that students master critical skills and content required for more advanced learning Although DI has existed since the late 1960s there are many common misconceptions about the approach its potential to enhance student learning and the way its proper implementation facilitates students academic success This book provides a systematic explanation of the Direct Instruction methodology and DI program design as it outlines a roadmap for teachers and school leaders on how to implement DI successfully Divided into three main sections the first section describes DI as a coherent and complete teaching and learning system that contrasts DI with lower case di or explicit instruction which focuses on effective instructional delivery techniques The second section provides a step by step guide to implementing DI The third section is devoted to cautions about implementing DI This section reinforces the notion that the physical possession of the DI curricula does not by itself lead to student success Those who adopt DI need to ensure that it is implemented with fidelity for the benefit of their students who are reliant on them to provide them with the means to achieve their academic potential so they may lead healthy productive lives

work but means the interplay between body and language in general to include for example sports dancing singing and storytelling The major techniques and curricular structures of educational drama and its application in the foreign and second language classroom are introduced What are the techniques methods strategies and curricular structures that engage language learners in continuing dialogue between one's own culture and the one yet to be discovered What comprises the language we speak in order to understand and be understood Which body is it we communicate through and to This volume answers these and other questions of the pedagogy of drama based teaching across the foreign second language curriculum and on all levels of the educational pyramid There are two major issues currently discussed in drama based foreign and second language methodology The first is goal oriented asking whether the acquisition of accuracy or fluency is more important and whether a controlled learning through imitation or an open through improvisation learning environment is more efficient The second issue concerns using drama in language teaching either its use is process oriented where drama becomes an immediate medium for language learning or product oriented where it becomes primarily the reason for language learning The book outlines the theoretical frameworks of both issues and introduces personal narrative comparative observation and analytical reflection illuminating opportunities for learning at both ends of the seemingly contradictory poles of both issues
