Glossary Frederick M. O'Hara,1990 **The Physical Oceanography of Sea Straits** L.J. Pratt,2012-12-06 Suppose one were given the task of mapping the general circulation in an unfamiliar ocean The ocean like our own is subdivided into basins and marginal seas interconnected by sea straits Assuming a limited budget for this undertaking one would do well to choose the straits as observational starting points To begin with the currents flowing from one basin to the next over possibly wide and time varying paths are confined to narrow and stable routes within the straits Mass heat and chemical budgets for individual basins can be formulated in terms of the fluxes measured across the straits using a relatively small number of instruments The confinement of the flow by a strait can also give rise to profound dynamical consequences including choking or hydraulic control a process similar to that by which a dam regulates the flow from a reservoir The funneling geometry can lead to enhanced tidal modulation and increased velocities giving rise to local instabilities mixing internal bores jumps and other striking hydraulic and fine scale phenomena In short sea straits represent choke points which are observationally and dynamically strategic and which contain a full range of fascinating physical processes 100 Greatest Science Discoveries of All Time Kendall Haven,2007-02-28 Brimming with fascinating and fun facts about 100 scientific breakthroughs this collection presents the real stories behind the history of science at the same time offering a panoramic overview of the history of science and an introduction to some of the most important scientists in history Grades 6 and up Throughout history science has changed lives and dramatically altered the way in which the universe is perceived Focusing on the 100 most significant scientific events of all time from Archimedes discovery of the two fundamental principles underlying physics and engineering levers and buoyancy in 260 B C E to human anatomy Jupiter's moons electrons black holes the human genome and more storyteller Kendall Haven has created a ready reference for those seeking information on science discoveries
