English Medieval Misericords Paul Hardwick,2011 Misericord carvings present a fascinating corpus of medieval art which in turn complements our knowledge of life and belief in the late middle ages Subjects range from the sacred to the profane and from the fantastic to the everyday seemingly giving equal weight to the scatological and the spiritual alike Focusing specifically on England though with cognisance of broader European contexts this volume offers an analysis of misericords in relation to other cultural artefacts of the period Through a series of themed case studies the book places misericords firmly within the doctrinal and devotional milieu in which they were created and sited arguing that even the apparently coarse images to be found beneath choir stalls are intimately linked to the devotional life of the medieval English Church The analysis is complemented by a gazetteer of the most notable instances Dr Paul Hardwick is Professor in English Leeds Trinity University College

Time in the Medieval World Colum Hourihane,2007 This volume is a rich resource for the study of time as represented by the signs of the zodiac and occupations of the months documented in the comprehensive files of the Index of Christian Art at Princeton University The measurement and documentation of time has been a universal issue since the dawn of civilization and no more so than in the

medieval period when images representing the signs of the zodiac and occupations of the months were commonly used. Nature and the occupations or labors that each month brought were reflected in earthly calendars while the movements of the heavens and their impact on mankind were recorded in the signs of the zodiac. The changing compositions that were used to represent these twin calendars in several hundred works of art are documented in this volume which provides an unrivaled visual record for the student and scholar.

The Oxford Handbook of Women and Gender in Medieval Europe Judith M. Bennett, Ruth Mazo Karras, 2013-08-22. The Oxford Handbook of Women and Gender in Medieval Europe provides a comprehensive overview of the gender rules encountered in Europe in the period between approximately 500 and 1500 C.E. The essays collected in this volume speak to interpretative challenges common to all fields of women's and gender history: that is, how best to uncover the experiences of ordinary people from archives formed mainly by and about elite males and how to combine social histories of lived experiences with cultural histories of gendered discourses and identities. The collection focuses on Western Europe in the Middle Ages but offers some consideration of medieval Islam and Byzantium. The Handbook is structured into seven sections: Christian, Jewish, and Muslim thought; law in theory and practice; domestic life and material culture; labour, land, and economy; bodies and sexualities; gender and holiness; and the interplay of continuity and change throughout the medieval period. It contains material from some of the foremost scholars in this field and it not only serves as the major reference text in medieval and gender studies but also provides an agenda for future new research.

Blood Matters

Bonnie Lander Johnson, Eleanor Decamp, 2018-03-26 In late medieval and early modern Europe definitions of blood in medical writing were slippery and changeable blood was at once the red fluid in human veins a humor a substance governing crucial Galenic models of bodily change a waste product a cause of corruption a source of life a medical cure a serum appearing under the guise of all other bodily secretions and after William Harvey's discovery of its circulation the cause of one of the greatest medical controversies of the premodern period Figurative uses of blood are even more difficult to pin down The term appeared in almost every sphere of life and thought running through political theological and familial discourses Blood

Matters explores blood as a distinct category of inquiry and draws together scholars who might not otherwise be in conversation. Theatrical and medical practice are found to converge in their approaches to the regulation of blood as a source of identity and truth; medieval civic life intersects with seventeenth-century science and philosophy; the concepts of class, race, gender, and sexuality find in the language of blood as many mechanisms for differentiation as for homogeneity and fields as disparate as pedagogical theory, alchemy, phlebotomy, wet nursing, and wine production emerge as historically and intellectually analogous. The volume's essays are organized within categories derived from medieval and early modern understanding of blood behaviors: Circulation, Wounds, Corruption, Proof and Signs, and Substances, thereby providing the terms through which interdisciplinary and cross-period conversations can take place.
