Medieval Record Sources Philomena Connolly, 2002 The introduction of English institutions to Ireland after the arrival of the Normans and the close administrative ties that existed between the two countries during the rest of the middle ages resulted in a wealth of archival sources on both sides of the Irish Sea This book serves as a practical introduction to these sources in both manuscript and printed form from the 12th to the 15th centuries The institutions central and local which produced the records are described and the records placed in their administrative context Advice is given on the scope and limitations of the surviving sources and special attention is paid to the existence of substitutes for the records destroyed in 1922 in the Four Courts fire In addition to the records of central and local government ecclesiastical records in Ireland and abroad are dealt with as are the private records of major Anglo Irish families Information is provided on the existence of guides lists and indexes which facilitate access to unpublished material in various record repositories **The Witch** Ronald Hutton, 2017-08-01 This magisterial account explores the fear of witchcraft across the globe from the ancient world to the notorious witch trials of early modern Europe The Guardian UK The witch came to prominence and often a painful death in early modern Europe yet her origins are much more geographically diverse and historically deep In The Witch historian Ronald Hutton sets the European witch trials in the widest and deepest possible perspective and traces the major historiographical developments of witchcraft Hutton a renowned expert on ancient medieval and modern paganism and witchcraft beliefs combines Anglo American and continental scholarly approaches to examine attitudes on witchcraft and the treatment of suspected witches across the world including in Africa the Middle East South Asia Australia and the Americas and from ancient pagan times to current interpretations His fresh anthropological and ethnographical approach focuses on cultural inheritance and change while considering shamanism folk religion the range of witch trials and how the fear of witchcraft might be eradicated A panoptic penetrating book Malcolm Gaskill London Review of Books **Franciscan Organisation in the Mendicant Context** Michael J. P. Robson, Jens Röhrkasten, 2010 Emanating from the tradition of the Italian hermit communities the Franciscans developed organisational structures already early in their history allowing them

to offer pastoral care on a wide scale This process of transition led firstly to constitutional structures as defined in the order's early legislation but it also occurred within relationship networks at different levels in the context of Church and papacy within the different European regions and before the background of the emerging Canon Law The term organisation has been given a wide definition in the articles published in this volume They offer a survey of general issues related to the structuring and running of religious orders as well as a number of case studies Comparisons with other mendicant orders offer an analysis of the issues in a wider context *The Cambridge History of Ireland: Volume 1, 600–1550* Brendan Smith, 2018-03-31 The thousand years explored in this book witnessed developments in the history of Ireland that resonate to this day Interspersing narrative with detailed analysis of key themes the first volume in *The Cambridge History of Ireland* presents the latest thinking on key aspects of the medieval Irish experience The contributors are leading experts in their fields and present their original interpretations in a fresh and accessible manner New perspectives are offered on the politics artistic culture religious beliefs and practices social organisation and economic activity that prevailed on the island in these centuries At each turn the question is asked to what extent were these developments unique to Ireland The openness of Ireland to outside influences and its capacity to influence the world beyond its shores are recurring themes Underpinning the book is a comparative outward looking approach that sees Ireland as an integral but exceptional component of medieval Christian Europe *The Invention of Race in the European Middle Ages* Geraldine Heng, 2018-03-08 This book challenges the common belief that race and racism are phenomena that began only in the modern era **English Archives** Richard Olney, 2023-02-15 England is remarkable for the wealth and variety of its archival heritage the records created and preserved by institutions organisations and individuals This is the first book to treat the history of English records creation and record keeping from the perspective of the archives themselves Beginning in the early Middle Ages and ending in modern times it draws on the author's extensive knowledge and experience as both archivist and historian and presents the subject in a very readable and lively way Some archives notably those of government and the Established Church have remarkably continuous histories But all have suffered over time from periods of neglect and decay and some have come to sudden and violent ends Among the destructive episodes discussed in the book are the Viking raids of the Anglo Saxon period the Norman Conquest the Peasants Revolt the dissolution of the monasteries and the bombing raids of the Second World War Archivists and historians have a shared interest in the protection and study of the country's surviving records This book has been written for members of both professions but also for every reader who cares about the preservation of England's past Colchester, Fortress of the War God David Radford, Adrian Gascoyne, 2013-07-19 This volume is a critical assessment of the current state of archaeological knowledge of the settlement originally called Camulodunon and now known as Colchester The town has been the subject of antiquarian interest since the late 16th century and the first modern archaeological excavations occurred in 1845 close to Colchester Castle the town's most prominent historic site The earliest significant human occupation recorded

from Colchester dates to the late Neolithic but it was only towards the end of the 1st century BC that an oppidum was established in the area This was superseded initially by a Roman legionary fortress and then the colonia of Camulodunum on a hilltop bounded on the north and east by the river Colne There is little evidence for continuing occupation here in the early post Roman period but in 917 the town was re established as a burgh and gradually grew in importance After the Norman Conquest a castle was built on the foundations of the ruined Roman Temple of Claudius and a priory and an abbey were established just to the south of the walled town Although the town as elsewhere was affected by the Dissolution of the Monasteries and the English Civil War it remained essentially medieval in character until the 18th century During the 19th century this process of change was accelerated by the arrival of the railway industrialisation and the establishment of the military garrison Since the 1960s Colchester has been subject to recurring phases of re development the most recent having ended only in 2007 which have had a significant impact on the historic environment Fortunately the town is one of the best studied in the country

Looking at it from Asia: the Processes that Shaped the Sources of History of Science

Florence Bretelle-Establet, 2010-06-16 How do Documents Become Sources Perspectives from Asia and Science Florence Bretelle Establet From Documents to Sources in Historiography The present volume develops a specific type of critical analysis of the written documents that have become historians sources For reasons that will be explained later the history of science in Asia has been taken as a framework However the issue addressed is general in scope It emerged from reflections on a problem that may seem common to historians why among the huge mass of written documents available to historians some have been well studied while others have been dismissed or ignored The question of historical sources and their unequal use in historiography is not new Which documents have been used and favored as historical sources by historians has been a key historiographical issue that has occupied a large space in the historical production of the last four decades in France at least

Origins of English Surnames Joslin Fiennes, 2017-05-31 Surnames carry the history of people in a very personal way In England surnames were mostly established by the end of the fourteenth century by ordinary people for ordinary people Uniquely surnames describe medieval lives not captured by any other record They tell us what these people did where they went what they noticed and give clues about their culture and memories This book examines the origins of English surnames looking at occupational names locational names or names that record places nicknames and personal names names from the Continent and symbolic names Where genealogists and etymologists focus on

single names this book takes groups of names and explores what these say about the society that created them In *The Origins of English Surnames* you will find the English people at a key moment in history revealing the way they spoke the jokes they made and their memories of ancient cultures all at a time when land based feudalism was crumbling and people sought better lives Bosworth 1485 Glenn Foard, Anne Curry, 2013-08-22 Bosworth stands alongside Naseby and Hastings as one of the three most iconic battles ever fought on English soil The action on 22 August 1485 brought to an end the dynastic struggle known as the Wars of the Roses and heralded the dawn of the Tudor dynasty However Bosworth was also the most famous lost battlefield in England Between 2005 and 2010 the techniques of battlefield archaeology were used in a major research programme to locate the site Bosworth 1485 a battlefield rediscovered is the result Using data from historical documents landscape archaeology metal detecting survey ballistics and scientific analysis the volume explores each aspect of the investigation from the size of the armies their weaponry and the battlefield terrain to exciting new evidence of the early use of artillery in order to identify where and how the fighting took place Bosworth 1485 provides a fascinating and intricately researched new perspective on the event which perhaps more than any other marked the transition between medieval and early modern England **Empires and Bureaucracy in World History** Peter Crooks, Timothy H. Parsons, 2016-08-03 How did empires rule different peoples across vast expanses of space and time And how did small numbers of imperial bureaucrats govern large numbers of subordinated peoples *Empires and Bureaucracy in World History* seeks answers to these fundamental problems in imperial studies by exploring the power and limits of bureaucracy The book is pioneering in bringing together historians of antiquity and the Middle Ages with scholars of post medieval European empires while a genuinely world historical perspective is provided by chapters on China the Incas and the Ottomans The editors identify a paradox in how bureaucracy operated on the scale of empires and so help explain why some empires endured for centuries while in the contemporary world empires fail almost before they begin By adopting a cross chronological and world historical approach the book challenges the abiding association of bureaucratic rationality with modernity and the so called Rise of the West The Monks of Tiron Kathleen Thompson, 2014-09-25 This book offers the first comprehensive history of the Order of Tiron As a unique survey of the Tironensian experience it sheds new light on traditional assumptions of twelfth century monastic history Previous sketches have been shaped by the life of the founder the Vita Bernardi which depicts the forests of western France teeming with holy men and that self image of hermit preachers in the wilderness has been deeply influential in the historiography of twelfth century reform Drawing from the latest advances in the understanding of hagiography and institutional memory Thompson reinterprets key sources to offer a valuable contribution to the history of monasticism She outlines the rapid dissemination of the Tironensian approach in the first thirty years of its existence its network of contacts with the lay elite and the impact on the Tironensians of the successes of the Cistercians and Mendicants *Memoirs of Art and Archæology* Brooklyn Museum, 1902 **The De Excidio of Gildas**
