Overture To Social Anthropology:

An Overture to Social Anthropology Robert Francis Murphy, 1979 Cultural and Social Anthropology Robert Francis Murphy, 1989 Core text for introductory cultural social anthropology Discusses major theories of human behavior as well as topical issues **The Rebirth of Anthropological Theory** Stanley R. Barrett, 1992-12-15 Innovative and often controversial Barrett's study ranges over the entire scope of anthropological theory It provides a fresh interpretation of the history of theory and mounts an alternative perspective built around dialectics that is eminently suitable to post colonial anthropology He argues that anthropological theory has failed to be cumulative It has been characterized by oscillation and repetition theoretical orientations have appeared and disappeared only to be discovered once again Addressing numerous conceptual contradictions which have never been resolved he introduces novel concepts such as salvage theory and backward theory and argues that in many respects anthropological theory resembles the structuralists interpretation of myth Social life he asserts is inherently contradictory although concealed by numerous mechanisms most of which reinforce the status quo Attacking the illusion of simplicity which has dominated positivistic approaches and the out dated identification of anthropology with non Western primitive and tribal societies Barrett contends that power and privilege everywhere should be the basic concerns of anthropological inquiry **The Black Spiritual Movement** Hans A. Baer, 2001 Spiritual churches in the United States represent one of several religious movements that African Americans have adopted in their efforts to cope with mainstream society In this groundbreaking work first published in 1984 Hans A Baer explores the richness and creativity of Black Spiritualism setting forth an illuminating ethnography of the movement that corrects numerous stereotypes of African American religion Baer shows that the Spiritual churches blend diverse elements borrowing aspects of African American Protestantism American Spiritualism Roman Catholicism Voodoo and black ethno medicine occasionally even including aspects of Islam Judaism New Thought and Ethiopianism He describes not only the history structure ideology and practices of the churches but also the process of syncretism within them and their role within the African American community In addition Baer examines how the Spiritual movement juxtaposes elements of protest and accommodation to racism and class stratification in U S society This second edition includes a new preface and a new epilogue in which Baer discusses his methodology in researching the Black Spiritual Movement describes his meetings with pastors and congregation members and summarizes his most recent research in the field **Debunking the Myths of Colonization** Samar Attar, 2010-04-13 This book examines the paradoxical nature of colonialism and its horrific impact on the psyche of the colonized It probes Frantz Fanon's theories concerning the relationship between colonizers and the colonized It attempts to apply these theories to modern Arabic literature The Dawn of Belief D. Bruce Dickson, 1992-07 Hunter gatherers of the Upper Paleolithic period of the late Pleistocene epoch in western Europe left a legacy of cave paintings and material remains that have long fascinated modern man This book draws on theories derived from cultural anthropology and cognitive

archaeology to propose a reconstruction of the religious life of those people based on the patterning and provenience of their artifacts Based on the premises that all members of Homo sapiens sapiens share basically similar psychological processes and capabilities and that human culture is patterned the author uses ethnographic analogy inference from material patterns and formal analysis to find in prehistoric imagery clues to the cosmology that lay behind them The resulting book is an intriguing speculation on the nature of paleolithic religion offering scholars a valuable synthesis of anthropological archaeological and sociological research and general readers an accessible account of how our forebears may have regarded the unknown A well written and intellectually rigorous introduction If you are curious about prehistory you will enjoy it Wilson Library Bulletin Most interesting to those scholars interested in seeking materialist foundations or ecological explanations for religious practices American Antiquity A well written and concise account of what has recently been achieved by the investigations of spiritual life of the Earth s most ancient human communities Archiv Orientalni Czechoslovakia

Cultural Differences and Economic Globalization Roger White, 2015-10-23 Economic globalization is the process of increased integration among nations characterized and fostered by three elements of international trade goods and services international capital flows and international migration In recent decades international economic integration has increased both in depth more pronounced bilateral connections and in breadth connections have become more commonplace thus the global economy has become increasingly integrated Societies receive tremendous net benefits from economic globalization however accessing these benefits may be limited by cross societal cultural differences This book examines cultural differences as a potential impediment to economic integration Relying on rigorous statistical and econometric techniques the analyses indicate that higher transaction costs due to greater cultural distance inhibit both the volume of trade flows and the successful completion of trade deals Cultural distance appears to reduce foreign direct investment as well as divert investment to less culturally distant destinations This book finds a negative relationship between migration flows and cultural distance It considers the common criticism that repeated and intensified integration diminishes cultural differences resulting in cultural homogeneity This book offers the first comprehensive examination of the relationships between cross societal

cultural differences and economic globalization It will be of great interest to scholars and students who study globalization international economics and cultural studies
