The Occult Sciences Eusèbe Salverte,1846 **The Philosophy of Magic, Prodigies and Apparent Miracles** Anne Joseph Eusèbe Bacconière Salverte,1846 **The Occult Sciences** Eusèbe Salverte,1846 *The Philosophy of Magic* Eusèbe Salverte,1847 *The occult sciences, the philosophy of magic, prodigies and apparent miracles. From the Fr., with notes, by A.T. Thomson* Anne Joseph Eusèbe Bacconière-Salverte,1846 *The Occult Sciences. the Philosophy of Magic, Prodigies, and Apparent Miracles.* Eusebe Salverte,2016-07-07 The history of ancient times abounds in accounts of prodigies and manifestations of supernatural power which the almost unanimous judgment of the modern world has stamped as pure fiction The question however how such accounts found their way into records purporting to be authentic received as such by the age that produced them and preserve and handed down as such to our own times has perhaps never been quite satisfactorily answered These records are all we have to depend on for our knowledge of the times from which they date or of which they treat If their authority be disallowed past ages become a blank to us It is a point of some interest therefore to account for the presence in them of so much that seems incredible and to show how that into which the apparently fabulous enters in so large a proportion can yet be received in the main as true history It is no solution of this difficulty to say that antiquity was credulous that it exercised no judgment upon the stories to which it gave currency and believed without inquiry things the most improbable and absurd If this be so of what value is ancient history at all Who would give anything for the testimony of those who are incapable of discriminating between what is rational and what is absurd to whom the impossibility of a matter forms no ground for doubting its truth In our courts of justice what credit would a witness meet with half of whose evidence was essentially incredible Would not the other half go for nothing merely on the score of its suspicious association however credible in itself If we are to flatter ourselves that we know anything about the early past we cannot be indifferent to the character of its historians whether for veracity or for judgment and if we find in their recitals many things to which we feel that we cannot yield credence we are the more interested in the inquiry how these things won credence from them In this inquiry M Salverte comes to our aid and with much ingenuity endeavours to show that the great bulk of what ancient writers hand down to us as prodigy or miracle instead of being mere fable is capable of explanation on grounds intelligible to the present age and thus that history as far as these things are concerned may be received as true in its narrative of facts though it be often in error in the view it takes of the nature of the facts narrated M Salverte believes that a great mass of scientific knowledge was treasured up from a very early period in the temples of the heathen world and even ventures on the bold conjecture that many of the most illustrious discoveries in the domain of physics The University Magazine A Literary and Philosophic Review *Occult Sciences* Eusèbe Salverte,Eusebe Salverte,2012-02-16 A two volume 1846 translation of an examination of miracles in ancient times by a French polymath first published in 1829 *Occult Philosophy Or Magic* Heinrich Cornelius Agrippa von Nettesheim,1982 **The Philosophy of Magic, Prodigies and**

Apparent Miracles Eusebe Salverte, 2014-03-29 This Is A New Release Of The Original 1847 Edition **The Occult Sciences. the Philosophy of Magic, Prodigies, and Apparent Miracles.** Eusebe Salverte, 2016-07-07 From the PREFACE BY THE AUTHOR Is not the history of civilization in the most extended sense of this word the history of mankind in a social state one of the most important of all our studies About twenty years ago consulting less my talents than my zeal I undertook to retrace this history and in 1813 I published an introduction in order to give an idea of the manner in which I thought it should be treated This essay received some encouragement which only convinced me of the necessity of examining more profoundly so important a subject The history and origin of the sciences occupied a large place in those researches in which I was engaged and I was soon convinced that it was impossible to have a just idea of the extent to which the sciences had been carried among the ancients without examining the kind of knowledge employed by the founders of those sciences in working the wonders related in their annals In the course of this inquiry I discovered that much information was shut up in the temples and employed there during many ages to excite either wonder or fear but in the flight of time decaying and at last fading altogether away leaving behind only imperfect traditions which have since been ranked as fables The attempts to restore life to these ancient intellectual monuments accomplished a part of my task which at the same time filled up a great period in the history of the human mind My treatise on this object soon became too ample to form merely a part of the principal work for which it was originally intended It was easy to detach it although connected with the object which I had proposed to myself to attain and thus separated it forms a whole susceptible of special interest I shall content myself with bearing in remembrance the principle which has guided me in my various researches that principle which distinguishes two very strongly marked forms of civilization the fixed form which formerly governed almost the whole world and which still subsists in Asia and the perfectible form which more or less reigns throughout Europe although it is not there fully developed nor has it as yet borne all those fruits which its elements permit us to anticipate in its progress to perfection
