Philosophy And Parapsychology:

Philosophy and Parapsychology Jan Ludwig, 1978 *Parapsychology, Philosophy, and Spirituality* David Ray Griffin, 1997-01-01 Examines why parapsychology has been held in disdain by scientists philosophers and theologians explores the evidence for ESP psychokinesis and life after death and suggests that these phenomena provide support for a meaningful postmodern spirituality **Parapsychology, Philosophy and the Mind** Fiona Steinkamp, 2015-10-02 John Beloff is one of our foremost authorities in parapsychology He is credited with an instrumental role in the acceptance of parapsychology into academia On April 21 and 22 2000 a two day international conference was held by the Koestler Parapsychology Unit of the Psychology Department at the University of Edinburgh to celebrate Beloff's eightieth birthday Most of the essays in this work were presented at this conference honoring John Beloff All of the contributors have published a number of articles in mainstream philosophy and their essays promote Beloff's greatest interest a philosophical interaction with parapsychology The book is divided into three sections and each section has three papers The papers in the first section Parapsychology Philosophy and the Mind explore the mind brain problem parapsychology and the principle of closure and a cross cultural perspective on dualism and the self The second section Parapsychology Self and Survival looks at parapsychological phenomena and the sense of self chrysalid therapy and the problem of super psi The third section Parapsychology Religion and Spirituality features papers that discuss parapsychology and how it relates to Hume's view of miracles to religion and to the origin of the Copernican hypothesis **Philosophy and Psychical Research** Thakur, Shivesh C, 2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company Philosophical Interactions with Parapsychology H. Price, 1995-10-13 This is a collection of the most important writings of Oxford philosopher H H Price on the topics of psychical research and survival of death collected from a wide variety of sources unavailable to most interested readers Included are discussions of telepathy clairvoyance telekinesis precognition hauntings and apparitions the impact of psychical research on western philosophy and science and what afterlife is probably like Few twentieth century English speaking philosophers have written much on these topics Of those who did so and whose writings have not been collected and published in a single source H H Price was the most important **Philosophy of Science and Occult, 1st Ed.** Patrick Grim, 1983-06-30 Philosophy of Science and the Occult has two aims to introduce the philosophy of science through an examination of the occult and to examine the occult rigorously enough to raise central issues in philosophy of science Patrick Grim has compiled selections by authors with divergent views on astrology parapsychology and UFO's to emphasize topics standard to the philosophy of science He discusses issues such as confirmation and selection for testing possibility and a priori probabilities causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values A sketch of where these arise in the collection accompanies the table of contents The context of the occult serves to make the initial introduction of these

issues immediately understandable and forcefully compelling **Philosophical Interactions with Parapsychology** Henry Habberley Price, 1995-01-01 Many western philosophers have claimed that there are no psychical powers that the human being is simply an advanced form of matter that the world has no purpose and that the very notion that a person could survive the death of the physical body is not just false but nonsensical H H Price is an important English philosopher who did not share these views If it should be true that we have psychical powers and Price was convinced that we do this has very important implications for human nature and destiny we have souls there is some purpose to the features of nature and this life may be just a portion of the process of soul building that is our destiny H H Price is widely credited as being the first modern western philosopher to develop a coherent picture of what the life beyond might look like Philosophy of Science and the Occult Patrick Grim, 1990-07-17 This book both introduces the philosophy of science through examination of the occult and examines the occult rigorously enough to raise central issues in the philosophy of science Placed in the context of the occult philosophy of science issues become immediately understandable and forcefully compelling Divergent views on astrology parapsychology and quantum mechanics mysticism emphasize topics standard to the philosophy of science Such issues as confirmation and selection for testing causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values are discussed Significantly revised this second edition presents an entirely new section of quantum mechanics and mysticism including instructions from N David Mermin for constructing a device which dramatically illustrates the genuinely puzzling phenomena of quantum mechanics A more complete and current review of research on astrology has been included in this new edition and the section on the problem of demarcation has been broadened **The Journal of Parapsychology** Joseph Banks Rhine, Charles Edward Stuart, William McDougall, 1978 **Readings in the Philosophical Problems of Parapsychology** Antony Flew, 1987 Includes essays on parapsychology and life after death by J B Rhine David Hume George Price Plato Rene Descartes Thomas Hobbes and John Locke among others
