Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1978 Aspinall's Complete Textbook of Veterinary Nursing E-Book Nicola Lakeman (Previously Ackerman), Victoria Aspinall, 2016-05-31 The third edition of Aspinall's Complete Textbook of Veterinary Nursing is the ideal text for both student and qualified veterinary nurses as it covers the entire veterinary nursing syllabus. Now written in the main by veterinary nurses, this book comprehensively covers all aspects of the veterinary nursing role from client communication to nutritional support. All chapters have been revised in line with changes in legislation and regulation but also theoretical and practical aspects. Greater emphasis on the veterinary practice structure including the role of corporate businesses and use of social media bring this edition fully up to date. The new edition welcomes Nicola Ackerman as principal editor. Nicola is past officer of the BVNA and past executive editor of the Veterinary Nursing Journal. Nicola is a winner of several awards including the Blue Cross BVNA Veterinary Nurse of the Year and the Barbara Cooper CAW Professional Development Award for outstanding service to the veterinary nursing profession. Nicola was the first Veterinary Nurse in the UK to become a veterinary nurse specialist in nutrition. Evolve Resources containing Self assessment questions for every chapter to test learning. Image Bank of over 700 figures. Additional chapters. Comprehensive content ideal for both student and qualified veterinary nurses. Over 700 full colour illustrations for enhanced understanding. Written by veterinary nurses for veterinary nurses. Recommended reading given for each chapter to aid further research. New chapters on Emergency Critical care Fluid therapy Practice and Staff management and Consulting skills Anaesthesia and Analgesia chapter fully revised and updated. New chapter on Equine Behaviour and Handling including recognition of pain in equines. **Manual of Endocrine Surgery** A.J. Edis, L.A. Ayala, R.H. Egdahl, 2013-06-29. Mentions of those endocrine diseases encountered by the general surgeon. Operations on the pituitary gland are therefore specifically excluded. It should be most useful to general surgical residents and practicing surgeons but we hope it will also prove useful to the wide range of physicians who deal with surgically correctable endocrine disorders. The book has four sections: Surgery of the Parathyroids, Thyroid, Pancreas and Adrenals. Each section deals in a systematic manner with practical aspects of surgical anatomy, physiology, pathology, diagnosis and treatment. Specific attention has been given to a detailed description of operative strategy, operative technique and postoperative management. Individual operative steps are illustrated in full color with specific figure legends on facing pages. The artwork represents the distillation of twelve months intensive collaboration between the authors and a staff of medical illustrators to ensure anatomic fidelity and clarity. We believe that the use of full color has opened up a new dimension in surgical illustration by providing greater realism and allowing accent of important features. The techniques described herein represent personal preferences. The authors recognize that there may be several satisfactory alternate approaches in every case. Where there is controversy, we have outlined our approach to the problem somewhat dogmatically in the belief that in certain circumstances a single point of view is better than several without.
