Christopher C. Martell, 2017-10-01 Over the past decade the world has experienced a major economic collapse the increasing racial inequity and high profile police killings of unarmed Black and Brown people the persistence of global terrorism a large scale refugee crisis and the negative impacts of global warming In reaction to social instability there are growing populist movements in the United States and across the world which present major challenges for democracy Concurrently there has

been a rise of grassroots political movements focused on increasing equity in relation to race gender class sexual orientation and religion The role of social studies teachers in preparing the next generation of democratic citizens has never been more important and the call for more social studies teacher educators to help teachers address these critical issues only gets louder This volume examines how teacher educators are or are not supporting beginning and experienced social studies teachers in such turbulent times and it offers suggestions for moving the field forward by better educating teachers to address growing local national and global concerns In their chapters authors in social studies education present research with implications for practice related to the following topics race gender sexual orientation immigration religion disciplinary literacy global civics and social justice This book is guided by the following overarching questions What can the research tell us about preparing and developing social studies teachers for an increasingly complex interconnected and rapidly changing world How can we educate social studies teachers to teach against the grain Cochran Smith 1991 2001b centering their work on social justice social change and social responsibility

Abbot, Newell Walter Edson, Teresa Bach, Thomas Andrew Storey, Walter Sylvanus Deffenbaugh, Elon Galusha Salisbury, Willard Stanton Small, 1922 *Writing, Teaching and Researching History in the Electronic Age* Dennis A. Trinkle, 2015-04-29 This volume focuses on the role of the computer and electronic technology in the discipline of history It includes representative articles addressing H Net scholarly publication on line reviewing enhanced lectures using the World Wide Web and historical research *American Education*, 1927 *Felix Kaufmann's Theory and Method in the Social Sciences* Robert S. Cohen, Ingeborg K. Helling, 2014-05-19 This volume contains the English translation of Felix Kaufmann's 1895/1945 main work *Methodenlehre der Sozialwissenschaften* 1936 In this book Kaufmann develops a general theory of knowledge of the social sciences in his role as a cross border commuter between Husserl's phenomenology Kelsen's pure theory of law and the logical positivism of the Vienna Circle This multilayered inquiry connects the value oriented reflections of a general philosophy of science with the specificity of the methods and theories of the social sciences as opposed to abstract natural science and psychology The core focus of the study is the attempt to elucidate how and under what conditions scientific knowledge about social facts empirically justified and theoretically embedded can be obtained The empirical basis of knowledge within the social sciences forms a phenomenological concept of experience According to Kaufmann this concept of experience exhibits a complex structure Within the meaning interpretation of human action as the core of knowledge in the social sciences this structure reaches out across the isolated act of verification toward the synthesis of external and internal experiences The book opens with a detailed and useful introduction by Ingeborg K Helling which introduces the historical and theoretical background of Kaufmann's study and specifically illuminates his relation to Alfred Schütz and John Dewey Finally it contains interviews with and letters to members of his family colleagues and students

Patterns of Discovery in the Social Sciences Paul Diesing, 2017-07-05 Social scientists are often vexed because their work does not satisfy the criteria of scientific methodology developed by philosophers of science and logicians who use the natural sciences as their model In this study Paul Diesing defines science not by reference to these arbitrary norms delineated by those outside the field but in terms of norms implicit in what social scientists actually do in their everyday work
