

Materials Handling

Principles of Materials Handling

1. Equipment for handling and storage should be as standardized as possible
2. When in motion, the system should be designed to provide maximum continuous product flow
3. Investment should be in handling rather than stationary equipment
4. Handling equipment should be utilized to the maximum extent possible
5. In handling equipment, selection the ratio of dead weight to payload should be minimized
6. Whenever practical, gravity flow should be incorporated in system design
