Pregnancy and Birth in Russia Anna Temkina, Anastasia Novkunskeya, Daria Litvina, 2022-11-11 This book provides a theoretically and empirically grounded examination of the struggle for maternity care in contemporary Russia

framed by changes to the healthcare system and the roles of its participants after socialism. The chapters consider multiple perspectives and interactions between women and professionals and the structural and institutional pressures they face when striving for better conditions and treatment. Russian maternity care is characterized by the vivid mix of legacy of Soviet paternalism and medicalization, bureaucratic principles of state regulation with high level of centralization and lack of professional autonomy and global neoliberal tendencies. Maternity care professionals have to satisfy not only the growing needs and demands of women but also deal with increasing state regulative control, market demands and new professional standards of care. Navigating these multiple and various challenges, maternity providers have to perform in multiple roles, bridge the organizational gaps and inconsistencies. Thus the field of struggle for good care becomes not only professional but political one. Highlighting the opportunities and barriers for good care in the context of post socialist Russia, this book will be of particular interest to medical anthropologists and sociologists as well as midwives and other health professionals.

Care of the Newborn by Ten Teachers Hilary Lumsden, Debbie Holmes, 2018-09-27. Caring for the well newborn is an essential element of everyday midwifery practice. Providing a comprehensive guide to the problems associated with newborn babies, *Care of the Newborn by Ten Teachers* is a key textbook for trainee midwives. The ten teachers involved in writing this book are drawn from all over the UK and bring together a wide range of experience.

Medical Conditions Affecting Pregnancy and Childbirth Judy Bothamley, Maureen Boyle, 2020-07-24. Midwives are encountering more and more women whose pregnancies are complicated by medical conditions. The number of women with cardiac disease becoming pregnant is growing each year, obesity, older age and the complex health problems of women born outside the United Kingdom have also been identified as key factors and women with serious medical conditions.

Laboratory Manual of Human Anatomy and Physiology II Dr. Remeth J. Dias, Dr. Kuldeep U. Bansod, Dr. Kailas Mali, Mr. Taufik M. Kazi, 2024-02-16

We are very happy to put forth Laboratory Manual of Human Anatomy Physiology II. We have made this manual student friendly and relevant in terms of achieving curriculum outcome. Now we believe that the manual has been fulfilling the aspirations of teachers and students too. This manual is prepared as per PCI Education Regulations 2014 for degree course in pharmacy. The methods of all the experiments are reviewed and added from the recent research papers so that the advancement in the methods or apparatus can be addressed. This manual is designed for Outcome Based Education and each experiment is arranged in a uniform way such as practical significance, practical outcomes, PROs and its mapping with course outcomes, minimum theoretical background, resources used, procedure, precautions, observations, result, conclusion, references, and related questions. Moreover, assessment scheme is also given to help the student and teacher to know what to be assessed. This manual contains all the practicals suggested and given in the syllabus. In addition, we have divided each experiment into various parts that make the students' understanding easier. Moreover, it will also help the students to find out the resource material required and what they should use. In each experiment, the questions are given as Questions Identified that are incorporated for both teacher and students to learn more about the practicals. We have also included the references for learning more if needed by the teacher or student. The manual also focuses on the student's skill and learning; hence each experiment is having activity for the students. In addition, if the teacher feels that he should assign some more activity or other than included in the experiment, he can. We acknowledge the help and co-operation extended by various persons in bringing out this manual. We are highly indebted to the authors of various books and articles mentioned in references or further reading material, which became a major source of information for writing this manual. We also thank the publishers, designers, and printers who graciously worked hard to publish this manual in time.

Human Nutrition John Anderson, Martin Root, Sanford Garner, 2014-02-14

Human Nutrition: Healthy Options for Life provides all the essential information students need regarding foods and nutrients and how the body uses nutrients in relation to both health and chronic diseases. The authors provide a unique focus on the linkages between nutrients, deficits, and/or excesses, and personal health. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

The State and the Body Elizabeth Wicks, 2016-12-15

This book investigates the limits of the legitimate role of the state in regulating the human body. It questions whether there is a public interest in issues of bodily autonomy, with particular focus on reproductive choices, end-of-life choices, sexual autonomy, body modifications, and selling the body. The main question addressed in this book is whether such autonomous choices about the human body are and should be subject to state regulation. Potential justifications for the state's intervention into these issues

through mechanisms such as the criminal law and regulatory schemes are evaluated These include preventing harm to others and or to the individual involved as well as more abstract concepts such as public morality the sanctity of human life and the protection of human dignity The State and the Body argues that the state should be particularly wary about encroaching upon exercises of autonomy by embodied selves and concludes that only interventions based upon Mill s harm principle or in tightly confined circumstances the dignity of the human species as a whole should suffice to justify public intervention into private choices about the body
