**Physical Education** W. P. Welpton, 1913      **Principles and Methods of Physical Education and Hygiene** William P. Welpton, 1916      *The Massachusetts Teacher*, 1850      Becoming Critical Wilfred Carr, Stephen Kemmis, 2003-09-02 First published in 1986 Routledge is an imprint of Taylor Francis an informa company      **Report of the Commissioner of Education** United States. Office of Education, 1892      **Vision of a School** Jasper Ungoed-Thomas, 1998-01-01 Arguing that a good school is one with recognizable moral and intellectual traits the author outlines his view of how schools should be organized as a whole and in every field of education to encourage these traits      Leaders in Philosophy of Education, 2008-01-01 Since the 1960s we have witnessed the development of philosophy of education as a vital intellectual field Beginning with the work of Israel Scheffler at Harvard and spreading rapidly to the United Kingdom under the influence of R S Peters and Paul Hirst at the London Institute of Education analytical philosophers of education worked toward a new understanding of such central educational concepts as teaching learning explanation curriculum aims and objectives freedom and authority equality and liberal education They also examined theoretical issues in educational research and critiqued reigning ideas in educational psychology By the 1970s interest in the analysis of educational concepts and research methods had waned A new generation of philosophers of education turned to new issues including intellectual and practical virtues individual well being the education of girls and women the ethics of care creative thinking and imagination multicultural education globalization and many others In this book 24 leading philosophers of education since 1970 who remain influential today present the fascinating stories of their lives and important new contributions to the field They trace their early experiences initial encounters with philosophy and philosophy of education creative directions in their work mature ideas and perceptions of future directions for the field Each chapter contains a list of works chosen by the authors as their personal favorites      *Philosophy and the Spiritual Life* Victoria S. Harrison, Tyler Dalton McNabb, 2023-07-01 This book breaks new ground for the philosophy of religion by showcasing work that engages with the lived reality of the spiritual life It demonstrates that philosophy's relationship with spirituality is more than a historical curiosity and that in the twenty first century it is still meaningful to think about philosophy in connection with spirituality The chapters are organised around the following themes spiritual practice and philosophical understanding philosophical reflections on living a spiritual life philosophical problems concerning the spiritual life The first part discusses whether or not the topic of spirituality should be given a more fundamental role within the philosophy of religion and if so how that might be accomplished The second part addresses fundamental issues concerning human beings their lives and their self understanding in relation to the spiritual life The final part considers philosophical problems that emerge when discussing the spiritual life By bringing together discussions of these topics this volume constitutes a valuable resource for scholars in disciplines in which the spiritual life is a focus of interest particularly philosophy theology and religious studies      The Philosophy of Physical Education Steven

Stolz,2014-07-11 The discipline area of physical education has historically struggled for legitimacy sometimes being seen as a non serious pursuit in educational terms compared to other subjects within the school curriculum This book represents the first attempt in nearly thirty years to offer a coherent philosophical defence and conceptualisation of physical education and sport as subjects of educational value and to provide a philosophically sound justification for their inclusion in the curriculum The book argues that rather than relegating the body to un thinking learning a person s essential being is not confined to their rationality but involves an embodied dimension It traces the changing conceptions of the body in philosophy and theology that have influenced our understanding of physical education and sport and investigates the important role that embodiment and movement play in learning about through and in physical education Physical education is defended as a vital and necessary part of education because the whole person goes to school not just the mind but the thinking feeling and acting facets of a person It is argued that physical education has the potential to provide a multitude of experiences and opportunities for students to become aware of their embodiment explore alternative modes of awareness and to develop insights into and new modes of being not available elsewhere in the curriculum and to influence moral character through the support of a moral community that is committed to that practice Representing a sophisticated and spirited defence of the educational significance and philosophical value of physical education and sport this book will be fascinating reading for any advanced student or researcher with an interest in physical education the philosophy of sport or the philosophy of education

**The Cornell University** Cornell University,1869      **Register** Cornell University,1869      **Register and Catalogue** Cornell University,1870      *Reasons for Belief* Andrew Reisner,Asbjørn Steglich-Petersen,2011-06-02 Philosophers have long been concerned about what we know and how we know it Increasingly however a related question has gained prominence in philosophical discussion what should we believe and why This volume brings together twelve new essays that address different aspects of this question The essays examine foundational questions about reasons for belief and use new research on reasons for belief to address traditional epistemological concerns such as knowledge justification and perceptually acquired beliefs This book will be of interest to philosophers working on epistemology theoretical reason rationality perception and ethics It will also be of interest to cognitive scientists and psychologists who wish to gain deeper insight into normative questions about belief and knowledge      [Ancient Ethics](#) Susan Sauvé Meyer,2007-11-13 This is the first comprehensive guide and only substantial undergraduate level introduction to ancient Greek and Roman ethics It covers the ethical theories and positions of all the major philosophers including Socrates Plato and Aristotle and schools Stoics and Epicureans from the earliest times to the Hellenistic philosophers analyzing their main arguments and assessing their legacy This book maps the foundations of this key area which is crucial knowledge across the disciplines and essential for a wide range of readers      *Practicality of Grace in Protestant Theology* Michael G. Maness,Kevaughn Mattis,2021-05-20 These 15 articles were chosen by Testamentum Imperium Founder Kevaughn Mattis with Michael G Maness from among 163 articles

**Teacher Personal Theorizing** Gail MacCutcheon, 1992-01-01 This book examines the relationship between teacher theorizing and teacher action as illustrated by the curricular and instructional practices of teachers The authors show that all teaching is guided by theory developed by the teachers Teachers could not begin to practice without some knowledge of the context of their practice and without ideas about what can and should be done in those circumstances In this sense teachers are guided by personal practical theories that structure their activities and guide them in making decisions This literature is very significant in explaining and interpreting many phenomena of schooling such as why teachers alter curriculum documents and other policies how inservice education can be improved how supervisors can help teachers to improve their practices and how administrators can become leaders to improve education This perspective has broad and specific implications for every facet of education Those interested in teacher education and development in supervision in curriculum and in administration will find it especially relevant

*Wasted* Frank Furedi, 2009-01-01 Never has so much attention been devoted to education Everyone government ministers social commentators and parents obsess about its problems Yet we rarely ask why Why is education a source of such concern Why do many of the solutions proposed actually make matters worse Tony Blair s education education education slogan placed education at the forefront of political agendas But perhaps the policisation of education is part of the problem Today education is valued for its potential contribution to economic development but it is no longer considered important for itself Increasingly the promotion of education has little to do with the value of learning per se or with the importance of being taught about societies achievements so future generations have the intellectual ability to advance still further Education has been emptied of its content This book is a brilliant piece of analysis It peers into the hollowness of the education debates and drawing on thinkers from the ancient Greeks to modern critics it sets out what we need from our schools

**West-East Reciprocal Learning in a Canada-China Sister School Network** Yishin Khoo, Michael Connelly, Shijing Xu, 2025-07-18 This volume provides a comprehensive cross cultural knowledge base and understanding of school education teacher education and the cultural contexts of education in China and the West It achieves this by bringing together diverse Chinese and Canadian school

educators and educational researchers to reframe Sino Western relationships within the Canada China Sister School Network especially during a time of geopolitical tensions and uncertainties The authors demonstrate that intercultural reciprocal learning between Western and Chinese education is not merely a theoretical concept but a tangible reality embedded in the daily practices and actions of school educators and researchers It is this practical experiential and embodied understanding of West East reciprocal learning that holds educational hope and promise for the future forming the essence of this book     *Educational Times* ,1907     Education and the Voice of Michael Oakeshott Kevin Williams,2024-08-14 The work of Michael Oakeshott has retained a striking currency in philosophical discourse about education This is hardly surprising in view of his influence on Paul Hirst and Richard Peters two philosophers whose work had an enormous impact on educational thinking and practice in the English speaking world And although much of the detail in educational debate may change the fundamental underlying concerns regarding the conception of the person the nature of knowledge and the moral life and their expression in educational institutions and activities remain subject of disagreement In the light of this continuing interest and of Oakeshott s extensive writing on so many aspects of education it is timely that a book be published on his thinking on the subject
