Anthony Blair, 2011-10-20 J Anthony Blair is a prominent international figure in argumentation studies He is among the originators of informal logic an author of textbooks on the informal logic approach to argument analysis and evaluation and on critical thinking and a founder and editor of the journal *Informal Logic* Blair is widely recognized among the leaders in the field for contributing formative ideas to the argumentation literature of the last few decades This selection of key works provides insights into the history of the field of argumentation theory and various related disciplines It illuminates the central debates and presents core ideas in four main areas Critical Thinking Informal Logic Argument Theory and Logic Dialectic and Rhetoric *Argumentation and Education* Nathalie Muller Mirza, Anne-Nelly Perret-Clermont, 2009-06-19 During the last decade argumentation has attracted growing attention as a means to elicit processes linguistic logical dialogical psychological etc that can sustain or provoke reasoning and learning Constituting an important dimension of daily life and of professional activities argumentation plays a special role in democracies and is at the heart of philosophical reasoning and scientific inquiry Argumentation as such requires specific intellectual and social skills Hence argumentation will have an increasing importance in education both because it is a critical competence that has to be learned and because argumentation can be used to foster learning in philosophy history sciences and in many other domains Argumentation and Education answers these and other questions by providing both theoretical backgrounds in psychology education and theory of argumentation and concrete examples of experiments and results in school contexts in a range of domains It reports on existing innovative practices in education settings at various levels Studyguide for Practical Study of Argument by Govier, Trudy Cram101 Textbook Reviews, 2013-05 Never HIGHLIGHT a Book Again Includes all testable terms concepts persons places and events Cram101 Just the FACTS101 studyguides gives all of the outlines highlights and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanies 9780872893795 This item is printed on demand **Problems in Argument Analysis and Evaluation** Trudy Govier, 2018-06-22 We are pleased to publish this WSIA edition of Trudy's Govier's seminal volume *Problems in Argument Analysis and Evaluation* Originally published in 1987

by Foris Publications this was a pioneering work that played a major role in establishing argumentation theory as a discipline Today it is as relevant to the field as when it first appeared with discussions of questions and issues that remain central to the study of argument It has defined the main approaches to many of those issues and guided the ways in which we might respond to them From this foundation it sets the stage for further investigations and emerging research This is a second edition of the book that is corrected and updated by the author with new prefaces to each chapter

Argument Structure: James B. Freeman, 2011-03-23 This monograph first presents a method of diagramming argument macrostructure synthesizing the standard circle and arrow approach with the Toulmin model A theoretical justification of this method through a dialectical understanding of argument a critical examination of Toulmin on warrants a thorough discussion of the linked convergent distinction and an account of the proper reconstruction of enthymemes follows

Methods of Argumentation Douglas Walton, 2013-08-26 Argumentation which can be abstractly defined as the interaction of different arguments for and against some conclusion is an important skill to learn for everyday life law science politics and business The best way to learn it is to try it out on real instances of arguments found in everyday conversational exchanges and legal argumentation The introductory chapter of this book gives a clear general idea of what the methods of argumentation are and how they work as tools that can be used to analyze arguments Each subsequent chapter then applies these methods to a leading problem of argumentation Today the field of computing has embraced argumentation as a paradigm for research in artificial intelligence and multi agent systems Another purpose of this book is to present and refine tools and techniques from computing as components of the methods that can be handily used by scholars in other fields

Proof, Evidence and Hate Crime Tshepo Bogosi Mosaka, 2025-07-18 Proof is the property of a disputed fact being established inferentially from an extant fact This book explicates the structural components of this phenomenon in the context of hate crimes across various jurisdictions around the world It departs from the orthodox conception of evidence and proof as being a general value neutral or non normative and epistemic subject and offers a relativistic conception of this area of law The core argument is that proof is both semantically and methodologically determined by three conditions of materiality process and probativity This argument is then justified by the context specific application of this relativistic theory of proof to hate crimes This theoretical application of proof is sustained throughout the book using multiple examples and illustrations of hate crimes around the world The discussion both at the level of proof and hate crimes while focusing on the grounds of race religion and ethnicity specifically is framed in jurisprudential cross jurisdictional and interdisciplinary terms The book will be of interest to academics and researchers working in the areas of criminal law legal philosophy and procedural law

Argumentation Strategies in the Classroom Chrysi Rapanta, 2019-09-01 Argumentation as a teaching and learning method in the K 12 curriculum has received increasing attention across the globe The reason for this is simple argumentation helps students develop necessary critical thinking skills However teaching this method is not as straightforward as it may appear Placing

the classroom at the centre of the investigation this book seeks to throw light onto argumentation as a teaching practice by asking What does it take to teach as argument What does it mean to be argumentative teachers And how can we create classroom environments that will help and encourage young people to develop their argument skills Based on first hand experience and extensive research this volume guides the reader through argumentation with the focus placed on the relationship between this teaching method and effective learning and the need to investigate the role of teachers in encouraging argumentation in the classroom Although there are a considerable number of tools and techniques that promote argumentation in the K 12 classroom many teachers struggle to successfully implement them in the classroom Aimed at addressing this issue this book endeavours to instruct teachers on how to apply argumentation effectively in their day to day classes and to clarify argumentation as a teaching and learning strategy As an important contribution to the field of argumentation and education this book will be of interest to researchers post graduate students and secondary school teachers alike

The Logic of Real Arguments Alec Fisher,2004-09-23 Publisher Description Dialog Theory for Critical Argumentation Douglas N. Walton,2007 Because of the need to devise systems for electronic communication on the internet multi agent computing is moving to a model of communication as a structured conversation between rational agents For example in multi agent systems an electronic agent searches around the internet and collects certain kinds of information by asking questions to other agents Such agents also reason with each other when they engage in negotiation and persuasion It is shown in this book that critical argumentation is best represented in this framework by the model of reasoned argument called a dialog in which two or more parties engage in a polite and orderly exchange with each other according to rules governed by conversation policies In such dialog argumentation the two parties reason together by taking turns asking questions offering replies and offering reasons to support a claim They try to settle their disagreements by an orderly conversational exchange that is partly adversarial and partly collaborative

Deliberative Rhetoric Christian Kock,2017-11-09 Christian Kock s essays show the essential interconnectedness of practical reasoning rhetoric and deliberative democracy They constitute a unique contribution to argumentation theory that draws on and criticizes the work of philosophers rhetoricians political scientists and other argumentation theorists It puts rhetoric in the service of modern democracies by drawing attention to the obligations of politicians to articulate arguments and objections that citizens can weigh against each other in their deliberations about possible courses of action

Start with a Story Clyde Freeman Herreid,2007 Kipp Herreid learned other ways to teach much better ways His favorite approach puts science in vivid context through case studies which he calls stories with an educational message This compilation of 40 plus essays examines every aspect of the case study method back cover

Rigour and Reason: Essays in Honour of Hans Vilhelm Hansen J. Anthony Blair ,Christopher W. Tindale,2020-06-11 Built in the centre of Copenhagen and noted for its equestrian stairway the Rundetaarn Round Tower was intended as an astronomical observatory Part of a complex of buildings that once included a

university library it affords expansive views of the city in every direction towering above what surrounds it The metaphor of the towering figure who sees what others might not whose vantage point allows him to visualize how things fit together and who has an earned stature of respect and authority fits another Danish stalwart Hans Vilhelm Hansen whose contributions to the fields of informal logic and argument theory have earned the gratitude of his colleagues and inspired this collection of essays written to express the appreciation of its authors and of the many many colleagues they represent

Coalescent Argumentation Michael A. Gilbert, 2013-11-05 Coalescent Argumentation is based on the concept that arguments can function from agreement rather than disagreement To prove this idea Gilbert first discusses how several components emotional visceral physical and kisceral intuitive are utilized in an argumentative setting by people everyday These components also characterized as modes are vital to argumentative communication because they affect both the argument and the resulting outcome In addition to the components modes this book also stresses the goals in argumentation as a means for understanding one s own and one s opposer s positions Gilbert argues that by viewing positions as complex human events involving a variety of communicative modes we are better able to find commonalities across positions and therefore move from conflict to resolution By focusing on agreement and shared goals in all modes arguers can coalesce diverse positions and more easily distinguish between minor or unrelated differences and core disagreements This permits much greater latitude for locating shared beliefs values and attitudes that will lead to conflict resolution

Reasonableness and Effectiveness in Argumentative Discourse Frans H. van Eemeren, 2015-08-27 This volume presents 50 contributions on the themes of reasonableness and effectiveness and their connections which are central issues in argumentation theory It discusses van Eemeren s views on the study of argumentation the approach to argumentation adopted in pragma dialectics pragma dialectical perspectives on the dialectical and pragmatic dimensions of argumentative discourse the notion of strategic maneuvering the pragma dialectical method of analyzing argumentative discourse the treatment of fallacies as violations of rules for critical discussion pragma dialectical views on context the role of logic verbal indicators of argumentative moves and argument schemes and the process of writing and rewriting argumentative texts The pragma dialectical quantitative approach to empirical research on argumentative discourse is illustrated by reporting on selected illustrative experimental studies as well as qualitative studies of historical cases
