and the creative power of fantasies were a direct result of his encounter with and treatment of Emma Part 1 presents a historical reconstruction of the practice of castration in the treatment of hysteric women between 1878 and 1895 Part 2 examines the theories and practice produced by Freud between 1895 and 1896 and Part 3 explores and reconstructs Freud's self analysis 1896 1899 The Cut and the Building of Psychoanalysis argues that Freud's unconscious communication with Emma provided him with a crucial framework and path for his self analysis It will appeal to psychoanalysts psychotherapists and psychologists as well as historians of medicine science social scientists and scholars interested in the history of western thought and the mind in general **The Routledge Companion to Research in the Arts** Michael Biggs, Henrik

Wright, 2013-08-21 First published in 2002 Modes and categories inherited from the past no longer seem to fit the reality experienced by a new generation New Accents is intended as a positive response to the initiative offered by such a situation Each volume in the series will seek to encourage rather than resist the process of change to stretch rather than reinforce the boundaries that currently define literature and its academic study The purpose of this book is to give a critical overview of what has become a very wide field the relationship of psychoanalytic theory to the theories of literature and the arts and the way that developments in both domains have brought about changes in critical practice The Monist Paul Carus, 1923 Vols 2 and 5 include appendices *The Analyzing Situation* Jean-Luc Donnet, 2018-04-17 In this book the author explores the

particularities of the status of the method in psychoanalysis linked to the specificity of unconscious psychic processes If the method aims at ensuring a level of technical mastery it must also make sure that analytic treatment does not become an application of knowledge A modern conception of the analytic situation implies going beyond the classical pair of setting interpretation Starting out from the postulate of a transferential dynamic of the encounter the author brings into play the pair analyzing site situation The analyzing situation emerges from the utilization in a found created mode Winnicott of an initial site constituted by a set of means put at the patients disposal The analyzing situation includes patient and analyst in a self organizing structure The notion of a site makes it possible to approach the difference between psychoanalysis and analytic psychotherapy differently each site has a logic an intrinsic functional coherence which have their own incidence on the therapeutic process
