Practice Of Death:

The Practice of Death Eike-Henner W. Kluge, 1975-02-01 *Jan Patočka and the Phenomenology of Life After Death* Gustav Strandberg, Hugo Strandberg, 2023-12-12 This volume contains for the first time in English Jan Patočka's seminal essay *The Phenomenology of Afterlife* as well as contributions surrounding and analyzing this text. In his essay Patočka reflects on our relation to the dead and on how the departure of a loved one affects our continued existence. The premise of Patočka's investigation is that our existence always takes place by and through an originary and reciprocal being for others. The contributors in the volume extend the field of inquiry into the wider phenomenological and post phenomenological discussion of death by being cognizant of how works of literature can broaden our understanding of the care of death, grief, forgiveness, and non-reciprocal love. Also included are reflections on issues of philosophical anthropology, community, collective memory, and the ecstatic nature of life, issues that can all be related back to Patočka's initial reflections but which nonetheless radiate into a myriad of directions. This volume appeals to students and researchers in the field.

Death, Contemplation and Schopenhauer R. Raj Singh, 2016-05-13 The connections between death contemplation and the contemplative life have been a recurrent theme in the canons of both western and eastern philosophical thought. This book examines the classical sources of this philosophical literature in particular Plato's *Phaedo* and the *Katha Upanishad* and then proceeds to a sustained analysis and critical assessment of the sources and standpoints of a single thinker, Arthur Schopenhauer, whose work comprehensively pursues this problem. Going beyond the well-examined western influences on Schopenhauer, Singh offers an in-depth account of Schopenhauer's references to eastern thought and a comprehensive examination of his eastern sources, particularly Vedanta and Buddhism. The book traces the pivotal issue of death through the whole range of Schopenhauer's writings, uncovering the deeper connotations of his crucial notion of the will to live.

The Meanings of Death in Rabbinic Judaism David Kraemer, 2002-01-04 There are many books devoted to explicating Jewish laws and customs relating to death and mourning, and a wealth of studies addressing the significance of death practices around the world. However, never before has there been a study of the death and mourning practices of the founders of Judaism, the Rabbis of late antiquity. *The Meanings of Death in Rabbinic Judaism* fills that gap. The author examines the earliest canonical texts, the Mishnah, the Tosefta, the Midrashim, and the Talmud of the Land of Israel. He outlines the rituals described in these texts, from preparation for death to reburial of bones and the end of mourning. David Kraemer explores the relationships between the texts and interprets the rituals to uncover the beliefs which informed their foundation. He discusses the material evidence preserved in the largest Jewish burial complex in antiquity, the catacombs at Beth Shearim. Finally, the author offers an interpretation of the Rabbis' interpretations of death rituals, those recorded in the Babylonian Talmud. *The Meanings of Death in Rabbinic Judaism* provides a comprehensive and illuminating introduction to the formation, practice, and significance of death rituals in Rabbinic Judaism.

Death and Religion in a Changing World Kathleen Garces-Foley,2014-12-18 This comprehensive study of the intersection of death and religion offers a unique look at how religious people approach death in the twenty first century Previous scholarship has largely focused on traditional beliefs and paid little attention to how religious traditions evolve in relation to their changing social context Employing a sociological approach *Death and Religion*

in a Changing World describes how people from a wide variety of faiths draw on and adapt traditional beliefs and practices as they deal with death in modern societies The book includes coverage of newly emerging social and religious phenomena that are only just beginning to be analyzed by religion scholars such as public shrines the role of the media spiritual bereavement groups and the use of the Internet in death practices **The Medicalization of Birth and Death** Lauren K.

Hall,2019-12-17 Improving how individuals give birth and die in the United States requires reforming the regulatory reimbursement and legal structures that centralize care in hospitals and prevent the growth of community based alternatives In 1900 most Americans gave birth and died at home with minimal medical intervention By contrast most Americans today begin and end their lives in hospitals The medicalization we now see is due in large part to federal and state policies that draw patients away from community based providers such as birth centers and hospice care and toward the most intensive and costliest kinds of care But the evidence suggests that birthing and dying people receive too much even harmful medical intervention In *The Medicalization of Birth and Death* political scientist Lauren K Hall describes how and why birth and death became medicalized events While hospitalization provides certain benefits she acknowledges it also creates harms limiting patient autonomy driving up costs and causing a cascade of interventions many with serious side effects Tracing the regulatory legal and financial policies that centralize care during birth and death Hall argues that medicalization reduces competition stifles innovation and prevents individuals from accessing the most appropriate care during their most vulnerable moments She also examines the profound implications of policy enforced medicalization on informed consent and shows how medicalization challenges the healthcare community's most foundational ethical commitments Drawing on interviews with medical and nonmedical healthcare providers as well as surveys of patients and their families Hall provides a broad overview of the costs benefits and origins of medicalized birth and death *The Medicalization of Birth and Death* is required reading for academics patients providers policymakers and anyone else interested in how policy shapes healthcare options and limits patients and providers during life's most profound moments *The Death of Sacred Texts* Kristina

Myrvold,2010 *The Death of Sacred Texts* draws attention to a much neglected topic in the study of sacred texts the religious and ritual attitudes towards texts which have become old and damaged and can no longer be used for reading practices or in religious worship This book approaches religious texts and scriptures by focusing on their physical properties and the dynamic interactions of devices and habits that lie beneath and within a given text In the last decades a growing body of research studies has directed attention to the multiple uses and ways people encounter written texts and how they make them alive even as social actors in different times and cultures Considering religious people seem to have all the motives for giving their sacred texts a respectful symbolic treatment scholars have paid surprisingly little attention to the ritual procedures of disposing and renovating old texts This book fills this gap providing empirical data and theoretical analyses of historical and contemporary religious attitudes towards and practices of text disposals within seven world religions Judaism

Islam Christianity Hinduism Buddhism Jainism and Sikhism Exploring the cultural and historical variations of rituals for religious scriptures and texts such as burials cremations and immersion into rivers and the underlying beliefs within the religious traditions this book investigates how these religious practices and stances respond to modernization and globalization processes when new technologies have made it possible to mass produce and publish religious texts on the Internet

Death and Changing Rituals J. Rasmus Brandt, Håkon Roland, Marina Prusac, 2014-07-31 The forms by which a deceased person may be brought to rest are as many as there are causes of death In most societies the disposal of the corpse is accompanied by some form of celebration or ritual which may range from a simple act of deportment in solitude to the engagement of large masses of people in laborious and creative festivities In a funerary context the term ritual may be taken to represent a process that incorporates all the actions performed and thoughts expressed in connection with a dying and dead person from the preparatory pre death stages to the final deposition of the corpse and the post mortem stages of grief and commemoration The contributions presented here are focused not on the examination of different funerary practices their function and meaning but on the changes of such rituals how and when they occurred and how they may be explained Based on case studies from a range of geographical regions and from different prehistoric and historical periods a range of key themes are examined concerning belief and ritual body and deposition place performance and commemoration exploring a complex web of practices
