Pragmatics Of Left Detachment In Spoken Standard French Pragmatics Beyond:

The Pragmatics of Left Detachment in Spoken Standard French Betsy K. Barnes, 1985-01-01 Left detachment constructions LDs e.g. un buffet de campagne c'est un meuble are examined in a corpus of informal spontaneous conversation between educated native speakers of French. The overwhelming majority of these constructions are shown to have a clearly pragmatic motivation. The author's observations support a view of LD in French as a particular type of paratactic structure which should be seen primarily as a feature of unplanned discourse. The analysis partly builds on views expressed by Knud Lambrecht in an earlier contribution to this series.

On Spoken French William J. Ashby, 2023-03-15 This scholarly edition invites us to reconsider our assumptions about the French language by showcasing the oeuvre of one of the pioneers of diachronic Spoken French corpus linguistics. William J. Ashby and the ground-breaking findings to come out of his influential Tours corpora 1976-1995, including two real-time studies appearing for the first time in English translation. To help readers visualize just how radically different the morphosyntax, morphophonology, and semantics of Spoken French are from French on the page, the editor has developed a glossing framework designed to capture the systemic, radically prefixal morphology of Spoken French and the variability of change in progress. The model presented here and used to gloss the examples from the Tours corpus is also suitable for corpus tagging. The volume is organized into sections preceded by an Editor's note and followed by suggestions for further reading and closes with an appendix of French corpora. This scholarly edition was written for advanced undergraduates, graduate students, and scholars in the field.

French Dislocation Cécile de Cat, 2007-08-23 The pervasive use of dislocations as in *Le chocolat c'est bon* is a key characteristic of spoken French. This book offers various new and well-motivated insights based on tests conducted by the author on the syntactic analysis, prosody, and the interpretation of dislocation in spoken French. It also considers important aspects of the acquisition of dislocation by monolingual children learning different French dialects. The author argues that spoken French is a discourse-configurational language in which topics are obligatorily dislocated. She develops a syntactically parsimonious account which maximizes the import of interfaces involved with discourse and prosody. She proposes clear diagnostics following a reexamination of the status of subject clitics and a reevaluation of the characteristic prosody of dislocated constituents. The theoretical arguments throughout the book rest on data that comes from corpora of spontaneous production and from various elicitation experiments. This book throws new light on French syntax and prosody and makes an important and original contribution to the study of linguistic interfaces. Clearly expressed and tightly argued, it will interest scholars and advanced students of French and of its acquisition as a first language as well as linguistic theorists interested in the interfaces between syntax, discourse, and phonology.

Linguistic Perspectives on Romance Languages William J. Ashby, Marianne Mithun, Giorgio Perissinotto, 1993-07-08 This volume presents a selection of the best papers from the 1991 Linguistic Symposium on Romance Languages held in Santa Barbara. In addition, the volume contains revised versions of three of the keynote papers. A

welcome aspect of this collection reflective of the conference itself is the recurrent incorporation of historical and social factors into explanations of linguistic form

Pedagogical Norms for Second and Foreign Language Learning and Teaching Susan M. Gass, Kathleen Bardovi-Harlig, Sally Sieloff Magnan, Joel Walz, 2002-09-03 The concept of Pedagogical Norm is grounded in both sociolinguistic and psycholinguistic principles Pedagogical norms guide the selection and sequencing of target language features for language teaching and learning This book both situates and expands on this concept highlighting the interaction of research and pedagogy The papers collectively illustrate how the concept of pedagogical norm applies to all components of language including phonology morphology syntax and discourse The book begins with a discussion of definitions including papers that trace the history of the concept and define what is meant by norms Also included are papers that apply the concept of pedagogical norms in specific contexts e g intonation morphology and to specific languages Finally pedagogical norms are extended beyond the more traditional areas of grammatical competence to such disparate areas as listening discourse and circumlocution

Information Structure and its Interfaces Lunella Mereu, 2009-02-26 The volume presents recent results in the field of Information Structure based on research on Italian and Italian dialects and on further studies on several typologically different languages The central idea is that Information Structure is not an exclusive matter of syntax but an interface issue which involves the interplay of at least the phonological morpho syntactic and semantic pragmatic levels of analysis In addition the volume is based on the study of actual language use and it adopts a cross linguistic point of view

From Discourse Process to Grammatical Construction Ronald Geluykens, 1992 This study deals with interactional processes in conversational discourse and the way they may get syntacticized into grammatical constructions It investigates the link between discourse function and syntactic form and the ways in which grammatical form is a reflection on communicative function through examining the communicative functions of Left Dislocation in English The investigation is corpus based and focuses on spontaneous conversation but other discourse types are also taken into account The overall perspective is resolutely empirical and preconceptions about the possible functions of Left Dislocation are avoided Contents 1 Theoretical preliminaries 2 Referent introduction 1 interaction 3 Referent introduction 2 recoverability 4 Referent introduction 3 topicality 5 Other functions of LD 6 Prosodic aspects of LD 7 LD in other discourse types 8 A broader perspective 9 General conclusion Notes Appendices References Subject and author indices

Romance Languages and Linguistic Theory 2000 Claire Beyssade, 2002-01-01 This volume presents a selection of the best papers from the 2000 Going Romance conference held in Utrecht The papers discuss current topics in formal syntax in Romance languages

Usage-based and Typological Approaches to Linguistic Units Tsuyoshi Ono, Ritva Laury, Ryoko Suzuki, 2021-04-15 The chapters in this volume focus on how we might understand the concept of unit in human languages It is an analytical notion that has been widely adopted by linguists of various theoretical and applied orientations but has recently been critically examined by both typologically oriented and interactional linguistics This volume contributes

to and extends this discussion by examining the nature of units in actual usage in a range of genetically and typologically unrelated languages English Finnish Indonesian Japanese and Mandarin engaging with fundamental theoretical issues The chapters show that categories originally created for the description of Indo European languages have limited usefulness if our goal is to understand the nature of human language in general The authors thus question the status of traditionally accepted linguistic units especially their static understanding as a priori entities and suggest instead that an emergent and interactional view of both structure and function offers a better fit with the data from the languages examined Originally published as special issue 43 2 2019 of *Studies in Language* **Detachments for Cohesion** M. Fernandez-Vest, 2015-02-24 This monograph is intended as a reference book on Detachment Constructions DEC's in the Information Structuring of oral and spoken languages Focusing on DEC's in a textual perspective the book is an innovative contribution to the knowledge of oral and spoken languages some of them widespread Indo European others less taught Finno Ugric *Analyticity and Syntheticity* Armin Schwegler, 2013-02-06 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics *Universals of Language* Michel Kefer, 1989 *Fachkommunikation im Betrieb* Britta Thörle, 2005

Phrase' across Languages Tsuyoshi Ono, Sandra A. Thompson, 2020-07-15 The NP is one of the least controversial grammatical units that linguists work with The NP is often assumed to be universal and appears to be robust cross linguistically compared to VP or even clause in that it can be manipulated in argument positions in constructed examples Furthermore for any given language its internal structure order and type of modifiers tends to be relatively fixed Surprisingly however the empirical basis for NP has never been established The chapters in this volume examine the NP in everyday

interactions from diverse languages including little studied languages as well as better researched ones in a variety of interactional settings Together these chapters show that cross linguistically the category NP is not as robust as has been assumed in the context of temporally unfolding human interaction its structural status is constantly negotiated in terms of participants evolving social agendas

Information Structure and Sentence Form Knud Lambrecht, 1996-11-13 Why do speakers of all languages use different grammatical structures under different communicative circumstances to express the same idea Professor Lambrecht explores the relationship between the structure of the sentence and the linguistic and extra linguistic context in which it is used His analysis is based on the observation that the structure of a sentence reflects a speaker's assumption about the hearer's state of knowledge and consciousness at the time of the utterance This relationship between speaker assumptions and formal sentence structure is governed by rules and conventions of grammar in a component called information structure Four independent but interrelated categories are analysed presupposition and assertion identifiability and activation topic and focus
