Praxis-oriented Lent Jeevan Babu,1997 **Ontology of Production** Kitarō Nishida,2012-02-17 Nishida Kitarō 1870-1945 was a Japanese philosopher and the founder of what has been called the Kyoto School of philosophy. Haver has selected these three essays for translation because they will be politically and philosophically useful for contemporary theorists. The essays examine philosophical issues concerning the concepts of poesis and praxis relevant to Marx's ideas of production.

Vico and Naples Barbara Ann Naddeo,2011-03-15 Vico and Naples is an intellectual portrait of the Neapolitan philosopher Giambattista Vico 1668-1744 that reveals the politics and motivations of one of Europe's first scientists of society. According to the commonplaces of the literature on the Neapolitan Vico was a solitary figure who at a remove from the political life of his larger community steeped himself in the recondite debates of classical scholarship to produce his magnum opus, the *New Science*. Barbara Ann Naddeo shows, however, that at the outset of his career Vico was deeply engaged in the often tumultuous life of his great city and that his experiences of civic crises shaped his inquiry into the origins and development of human society. With its attention to Vico's historical rhetorical and jurisprudential texts, this book recovers a Vico who was keenly attuned to the social changes transforming the political culture of his native city. He understood the crisis of the city's corporate social order and described the new social groupings that would shape its future. In Naddeo's pages Vico comes alive as a prescient judge of his city and the political conundrum of Europe's burgeoning metropolises. He was dedicated to the acknowledgment and juridical remedy of Naples' vexing social divisions and ills. Naddeo also presents biographical vignettes illuminating Vico's role as a Professor of Rhetoric at the University of Naples and his bid for the prestigious Morning Chair of Civil Law, which foundered on the directives of the Habsburgs and the politics of his native city. Rich with period detail, this book is a compelling and vivid reconstruction of Vico's life and times and of the origins of his powerful notion of the social.

National Council of Churches Review, 2002 **Encountering Poverty** Ananya Roy, Genevieve Negrón-Gonzales, Kwaku Opoku-Agyemang, Clare Talwalker, 2016-03-08 *Encountering Poverty* disrupts the new optimism about poverty action, challenging mainstream frameworks of global poverty. Going beyond poverty as a problem that can be solved through economic resources or technological interventions, the book focuses on the power and privilege underpinning persistent impoverishment. It explores poverty action's place in the opportunities and limits of the current moment with its rapacious market forces and resurgent social and civil rights movements. *Encountering Poverty* invites students, educators, activists, and development professionals to think and act against inequality by foregrounding not sidestepping the long history of development and the ethical dilemmas of poverty action today. Dealing with Wars and Dictatorships Liora Israël,Guillaume Mouralis,2013-12-02 Democratic transitions in Latin America Eastern Europe and South Africa often studied under the conceptual rubric of transitional justice have involved the formation of public policies toward the past that are multifaceted and often ambitious Recent scholarship rarely questions the concepts and categories transposed from one country to another This is true both in the language of political life and in the social sciences examining past oriented public policy especially policy toward ethnic cleansing and the line between the language of political practice legal analysis and scholarly discourse has been quite porous This book examines how these phenomena have been described and understood by focusing recent processes such as the advent of international criminal justice in relation to previous postwar and recent purges By crossing disciplinary approaches and periods the authors pay attention to three main aspects the legal or political concepts used and or the ones mobilized in the academic work the circulation of categories know how and arguments the different levels that can shed light on transitions

The Promise of Pragmatism John P. Diggins,1994-05-02 For much of our century pragmatism has enjoyed a charmed life holding the dominant point of view in American politics law education and social thought in general After suffering a brief eclipse in the post World War II period pragmatism has enjoyed a revival especially in literary theory and such areas as poststructuralism and deconstruction In this sweeping critique of pragmatism and neopragmatism one of our leading intellectual historians traces the attempts of thinkers from William James to Richard Rorty to find a response to the crisis of modernism John Patrick Diggins analyzes the limitations of pragmatism from a historical perspective and dares to ask whether America s one original contribution to the world of philosophy has actually fulfilled its promise In the late nineteenth century intellectuals felt themselves in the grips of a spiritual crisis This confrontation with the acids of modernity eroded older faiths and led to a sense that life would continue in the awareness of absences knowledge without truth power without authority society without spirit self without identity politics without virtue existence without purpose history without meaning In Europe Friedrich Nietzsche and Max Weber faced a world in which God was dead and society was succumbing to structures of power and domination In America Henry Adams resigned from Harvard when he realized there were no truths to be taught and when he could only conclude Experience ceases to educate To the American philosophers of pragmatism it

was experience that provided the basis on which new methods of knowing could replace older ideas of truth Diggins examines how in different ways William James Charles Peirce John Dewey George H Mead and Oliver Wendell Holmes Jr demonstrated that modernism posed no obstacle in fields such as science education religion law politics and diplomacy Diggins also examines the work of the neopragmatists Jurgen Habermas and Richard Rorty and their attempt to resolve the crisis of postmodernism Using one author to interrogate another Diggins brilliantly allows the ideas to speak to our conditions as well as theirs Did the older philosophers succeed in fulfilling the promises of pragmatism Can the neopragmatists write their way out of what they have thought themselves into And does America need philosophers to tell us that we do not need foundational truths when the Founders already told us that the Constitution would be a machine that would depend more upon the counterpoise of power than on the claims of knowledge Diggins addresses these and other essential questions in this magisterial account of twentieth century intellectual life It should be read by everyone concerned about the roots of postmodernism and its links to pragmatism and about the forms of thought and action available for confronting a world after postmodernism
