Praxis And Reason Studies In The Philosophy Of Nicholas Rescher:

Idealism and Praxis Michele Marsonet, 2013-05-02 This work manages to present a complete and informative overview of Nicholas Rescher's philosophy. A prominent representative of contemporary pragmatism and of 20th century's thought at large, Rescher wrote an impressive amount of volumes and essays on a wide variety of philosophical topics. The present book purports to make his theses and theories accessible in one single volume. Moreover, it provides an apparatus of references to the relevant literature produced by Rescher's critics and positions his work in the wider setting of its links with various contemporary American and European philosophers. The mixture of pragmatism and idealism typical of Rescher's stance is carefully taken into account along with his contributions to logic, philosophy of science, metaphysics, theory of knowledge, ethics, social and political philosophy.

Rescher Studies Robert Almeder, 2013-05-02 In a career extending over almost six decades, Nicholas Rescher has conducted researches in almost every principal area of philosophy, historical and systematic alike. In this extraordinary volume, two dozen scholars join in offering penetrating discussions of various facets of Rescher's investigations. The result is an instructively critical panorama of the many faceted contributions of this important American philosopher. Born in Germany in 1928, Nicholas Rescher came to the U.S. at the age of nine. He is University Professor of Philosophy at the University of Pittsburgh, where he has also served as Chairman of the Philosophy Department and as director and currently chairman of the Center for Philosophy of Science. In a productive research career extending over six decades, he has established himself as a systematic philosopher of the old style. His work represents a many-sided approach to fundamental philosophical issues that weaves together threads of thought from continental idealism and American pragmatism. And apart from this larger program, Rescher has made various specific contributions to logic, the conception of autodescriptive systems of many-sided logic, the history of logic, the medieval Arabic theory of modal syllogistic, to the theory of knowledge, epistemology as a quantitative approach in theoretical epistemology, and to the philosophy of science, the theory of a logarithmic retardation of scientific progress. Rescher has also worked in the area of futuristics and, along with Olaf Helmer and Norman Dalkey, is co-inaugurator of the so-called Delphi method of forecasting. Ten books about Rescher's philosophy have been published in four languages. Rescher earned his doctorate at Princeton in 1951, while still at the age of twenty-two, a record for Princeton's Department of Philosophy. He has served as a President of the American Philosophical Association, the American Catholic Philosophy Association, the American G. W. Leibniz Society, the C. S. Peirce Society, and of the American Metaphysical Society. He was the founder of the American Philosophical Quarterly. An honorary member of Corpus Christi College, Oxford, he has been elected to membership in the European Academy of Arts and Sciences, Academia Europaea, the Royal Society of Canada, the Institut International de Philosophie, and several other learned academies. Having held visiting lectureships at Oxford, Constance, Salamanca, Munich, and Marburg, he has been awarded fellowships by the Ford, Guggenheim, and National Science Foundations. Author of some hundred books ranging over many

areas of philosophy over a dozen of them translated from English into other languages he is the recipient of eight honorary degrees from universities on three continents He was awarded the Alexander von Humboldt Prize for Humanistic Scholarship in 1984 the Belgian Prix Mercier in 2005 and the Aquinas Medal of the American Catholic Philosophical Association in 2007

Reason, Truth, and Theology in Pragmatist Perspective Paul D. Murray, 2004 In this work Paul Murray explores which style of rationality is most appropriate to Christian theology in the contemporary pluralist postfoundationalist postmodern context At its heart is a fresh consideration of the American pragmatist tradition focussing on the writings of Richard Rorty and Nicholas Rescher Where Rorty correctly diagnoses the failures of foundationalist objectivism Rescher's pragmatic idealism is presented as healing the ills in Rorty's own neo pragmatism The significant resonance between Rescher's view of rationality and Christian understanding of the trinity is explored In turn Donald MacKinnon's influential writings are presented as exemplifying just such an approach to theology Murray both articulates an enriched form of Christian postliberalism committed to receiving and learning from other traditions of thought and practice and probes the claim that the dynamics of human rationality can be expected to reflect the Trinitarian dynamics of God's being Paul Murray presents us here with an exhaustive and insightful study of recent pragmatic theory in which he sets up rhythms of healing and completion as well as interrogation particularly remarkable is his exploration of Christianity as the deep and in some sense final interlocutor of pragmatic tradition I strongly recommend this book Olivier Davis Professor of Christian Doctrine King's College London This is a mature wide ranging work that by uniting the intellectual and the practical carries both rational and ethical conviction It does equal justice to the classic teachings of Christianity and to the challenges to rethink them in dialogue with modern and postmodern approaches The result is a conception of Christianity both generously orthodox and deeply engaged with contemporary life and thought It is especially good to see the profound contribution of Donald MacKinnon understood and developed with such perception and relevance David F Ford Regius Professor of Divinity University of Cambridge Paul Murray is currently Lecturer in Systematic Theology within the Department of Theology at the University of Durham England He has previously held posts at St Cuthbert's Seminary Ushaw College Durham and Newman College of Higher Education Birmingham Essays of his exploring issues in philosophical theology science and theology and contemporary Roman Catholic theology have appeared in leading journals and edited collections This is his first monograph

Kant and the Reach of Reason Nicholas Rescher, 2000 The essays collected in this volume have a strong thematic and interpretative unity Their underlying concern is with the overall nature of Kant s philosophical system and thus with his deepest intentions and basic commitments The book falls into three parts The first three essays deal with Kant s approach to things in themselves and with the realm of noumenal causality The second part considers Kant s approach to the methodology of rational inquiry and in particular his views on cognitive systematization and the limits of philosophizing itself The third section focuses on the role played by the categorical imperative in both the theoretical and practical philosophy The aim throughout one that many Kant scholars and students will find provocative is to show that in an important sense Kant is prepared to assert the primacy of practical over theoretical philosophy
