 study systematically treats recent policymaking trends starting with a reconsideration of salient theoretical issues of  
 policymaking and its study and culminating with a survey of current policy related predicaments in various countries Dror  
 proposes that the task for social science research is to uncover underlying causes of policymaking inadequacies Standard  
 research methods Dror states have been unable to uncover the realities of important decisions made inside governments In  
 order to gain an understanding of pressing predicaments he believes that policymakers need to examine the foundations of  
 contemporary practices of present assumptions and that they need a multiplicity of approaches to policymaking After  
 prescribing a set of requirements that policymaking must satisfy in order to adequately respond to challenges Dror posits  
 several improvements needed in education and in policy decision making The book concludes with an extensive bibliography  
 including numerous important German works not found in other English language studies This book supplements the earlier
