Sculpture Machine:

The Sculpture Machine Michael Anton Budd, 1997-03 Michael Anton Budd's *THE SCULPTURE MACHINE* traces the tension between the modern world and the classical interpretation of physicality as influenced by technological forces of industry and revolution. This insightful work illustrates how ideas about bodies influence the building of identities in concert with the construction of a larger consumer culture. Illustrations Copyright Libri GmbH All rights reserved. *The Sculptural in the (Post-)Digital Age* Mara-Johanna Kölmel, Ursula Ströbele, 2023-06-19 Digital technologies have profoundly impacted the arts and expanded the field of sculpture since the 1950s. Art history however continues to pay little attention to sculptural works that are conceived and materialized using digital technologies. How can we rethink the artistic medium in relation to our technological present and its historical precursors? A number of theoretical approaches discuss the implications of the so-called Aesthetics of the Digital referring above all to screen-based phenomena. For the first time, this publication brings together international and trans-historical research perspectives to explore how digital technologies reconfigure the understanding of sculpture and the sculptural leading into the post-digital age. Up-to-date research on digital technologies expansion of the concept of sculpture. Linking historical sculptural debates with discourse on the new media and post-digital culture.

Machine Art, 1934 Jennifer Jane Marshall, 2019-01-23 In 1934 New York's Museum of Modern Art staged a major exhibition of ball bearings, airplane propellers, pots and pans, cocktail tumblers, petri dishes, protractors, and other machine parts and products. The exhibition titled *Machine Art* explored these ordinary objects as works of modern art, teaching museumgoers about the nature of beauty and value in the era of mass production. Telling the story of this extraordinarily popular but controversial show, Jennifer Jane Marshall examines its history and the relationship between the museum's director Alfred H. Barr Jr. and its curator Philip Johnson, who oversaw it. She situates the show within the tumultuous climate of the interwar period and the Great Depression, considering how these unadorned objects served as a response to timely debates over photography, abstract art, the end of the American gold standard, and John Dewey's insight that how a person experiences things depends on the context in which they are encountered. An engaging investigation of interwar American modernism, *Machine Art 1934* reveals how even simple things can serve as a defense against uncertainty.

Dress & Vanity Fair, 1924 Alloys Marin R. Sullivan, 2022-03-01 A new look at the interrelationship of architecture and sculpture during one of the richest periods of American modern design. *Alloys* looks at a unique period of synergy and exchange in the postwar United States when sculpture profoundly shaped architecture and vice versa. Leading architects such as Gordon Bunshaft and Eero Saarinen turned to sculptors including Harry Bertoia, Alexander Calder, Richard Lippold, and Isamu Noguchi to produce site-determined large-scale sculptures tailored for their buildings, highly visible and well-traversed threshold spaces. The parameters of these spaces, atriums, lobbies, plazas, and entryways, led to various designs like sculptural walls, ceilings, and screens that not only embraced new industrial materials and processes but also demonstrated

art's ability to merge with lived architectural spaces. Marin Sullivan argues that these sculptural commissions represent an alternate history of midcentury American art. Rather than singular masterworks by lone geniuses, some of the era's most notable spaces—Philip Johnson's Four Seasons Restaurant in Mies van der Rohe's Seagram Building, Max Abramovitz's Philharmonic Hall at Lincoln Center, and Pietro Belluschi and Walter Gropius's Pan Am Building—would be diminished without the collaborative efforts of architects and artists. At the same time, the artistic creations within these spaces could not exist anywhere else. Sullivan shows that the principle of synergy provides an ideal framework to assess this pronounced relationship between sculpture and architecture. She also explores the afterlives of these postwar commissions in the decades since their construction. A fresh consideration of sculpture's relationship to architectural design and functionality following World War II, *Alloys* highlights the affinities between the two fields and the ways their connections remain with us today.

Walker,2001-04-02 Those people in uniforms who ring bells and raise money for the poor during the holiday season belong to a religious movement that in 1865 combined early feminism street preaching holiness theology and intentionally outrageous singing into what soon became the Salvation Army In *Pulling the Devil s Kingdom Down* Pamela Walker emphasizes how

thoroughly the Army entered into nineteenth century urban life She follows the movement from its Methodist roots and East London origins through its struggles with the established denominations of England problems with the law and the media and public manifestations that included street brawls with working class toughs The Salvation Army was a neighborhood religion with a battle plan especially suited to urban working class geography and cultural life The ability to use popular leisure activities as inspiration was a major factor in the Army s success since pubs music halls sports and betting were regarded as its principal rivals Salvationist women claimed the right to preach and enjoyed spiritual authority and public visibility more extensively than in virtually any other religious or secular organization Opposition to the new movement was equally energetic and took many forms but even as contemporary music hall performers ridiculed the Hallelujah Lasses the Salvation Army was spreading across Great Britain and the Continent and on to North America The Army offered a distinctive response to the dilemmas facing Victorian Christians in particular the relationship between what Salvationists believed and the work they did Walker fills in the social cultural and religious contexts that make that relationship come to life

Manliness in Britain, 1760-1900 Joanne Begiato, 2020-02-28 This book offers an innovative account of manliness in Britain between 1760 and 1900 Using diverse textual visual and material culture sources it shows that masculinities were produced and disseminated through men s bodies often working class ones and the emotions and material culture associated with them The book analyses idealised men who stimulated desire and admiration including virile boxers soldiers sailors and blacksmiths brave firemen and noble industrial workers It also investigates unmanly men such as drunkards wife beaters and masturbators who elicited disgust and aversion Unusually *Manliness in Britain* runs from the eras of feeling revolution and reform to those of militarism imperialism representative democracy and mass media periods often dealt with separately by historians of masculinities

Physical Culture and Sport in Soviet Society Susan Grant, 2013 From its very inception the Soviet state valued the merits and benefits of physical culture which included not only sport but also health hygiene education labour and defence Physical culture propaganda was directed at the Soviet population and even more particularly at young people women and peasants with the aim of transforming them into ideal citizens By using physical culture and sport to assess social cultural and political developments within the Soviet Union this book provides a new addition to the historiography of the 1920s and 1930s as well as to general sports history studies
