Frank Golden, Michael Tipton, 2002 *Essentials of Sea Survival* contains original scientific research and investigations from two internationally recognized experts on cold water survival. In addition to having practical personal experience with cold water immersion, Frank Golden and Michael Tipton regularly lecture at various international conferences about water survival and they are frequently called on for expert commentary on television and radio. The majority of books on this subject are personal survival accounts; few relate to scientific studies. This book is different. Using reader-friendly language, two leading environmental physiologists present the facts and dispel the myths of surviving a sea accident. The book thanks to the real-life stories and easy-to-read format will appeal primarily to the layperson who works or plays on or near the water. The text will also be of interest to an academic audience who will appreciate the original research and up-to-date physiological and medical information. *Essentials of Sea Survival* is a compelling, informative, and comprehensive guide to open water survival. Drawing from classic maritime disasters and personal accounts of near-miraculous survival, as well as carefully controlled laboratory experiments, it offers practical advice for avoiding as well as surviving a cold water accident. It is an important reference for anyone associated with open-air aquatic activities, such as members of the Coast Guard, Navy, and Marines, offshore oil rig employees, fishermen, divers, amateur and professional sailors, water safety instructors, and life guards, water rescue personnel, boaters, water skiers, outdoor survival course instructors, and other recreational water sports enthusiasts.

Seafarers must be prepared to cope with the worst situations that the sea can offer. In this new edition of *Survival Guide for the Mariner*, author Robert J. Topics include abandon ship procedures, crew overboard search and rescue techniques, and survival methods.
