Marshall, 2024-01-21 From exotic wild species inhabiting unfamiliar settings to elusive forms still unknown to science or thought to be extinct, the Felidae, better known as cats, have been reported in sightings from around the world. According to conventional wisdom, they do not exist, but mystery cats of all sizes have attracted increasing attention from naturalists and laypersons alike, and the evidence for these animals is becoming more substantial and increasingly difficult to deny. Now one of the world's leading cryptozoological investigators and field researchers offers a comprehensive field guide and overview of these mysterious cat-like creatures. *Mysterious Creatures* George M. Eberhart, 2002-12-17 A comprehensive guide to cryptozoology, the quest to identify animals that have not been officially catalogued by science and to place these unknown animals into their proper zoological categories. In this fascinating two-volume encyclopedia, author George M. Eberhart provides a comprehensive catalog of nearly 1,000 cryptids, unknown animals usually reported through eyewitness accounts and not yet described by science. Cryptids are the stuff of folklore, hoaxes, and genuine scientific breakthroughs. There are 400 now classified cryptids, once considered either extinct or pure fantasy. The cryptozoologist's job is to strip away the myth, misidentification, and mystery and separate fact from fiction. *Mysterious Creatures* covers everything from dinosaurs and the mammoth, an elephant-killing dinosaur-like animal of central Africa, to searches for the Loch Ness monster, Bigfoot, and other cryptozoological hoaxes. Entries about specific animals include the derivation or meaning of each cryptid's name, its scientific name, variant names, a physical description, behavior description, of tracks, habitat, significant sightings, present status, and possible explanations. Illustrations and photographs accompany many entries. The book also includes resources and references for further information.
