year s most compelling biographies Robert Wilson paints a brilliant portrait of Clarence King a scientist explorer whose mountain scaling desert crossing river fording blizzard surviving adventures helped create the new West of the nineteenth century A sort of Howard Hughes of the 1800s Clarence King in his youth was an icon of the new America a man of both action and intellect who combined science and adventure with romanticism and charm The Explorer King vividly depicts King s amazing feats and also uncovers the reasons for the shocking decline he suffered after his days on the American frontier The Yale educated King went west in 1863 at age twenty one as a geologist explorer During the next decade he scaled the highest peaks of the Sierra Nevada published a popular book now considered a classic of adventure literature initiated a groundbreaking land survey of the American West and ultimately uncovered one of the greatest frauds of the century the Great Diamond Hoax a discovery that made him an international celebrity at a time when they were few and far between

Through King's own rollicking tales some true some embroidered of scaling previously unclimbed mountain peaks of surviving a monster blizzard near Yosemite of escaping ambush and capture by Indians of being chased on horseback for two days by angry bandits Robert Wilson offers a powerful combination of adventure history and nature writing He also provides the bigger picture of the West at this time showing the ways in which the terrain of the western United States was measured and charted and mastered and how science politics and business began to intersect and influence one another during this era Ultimately King himself would come to symbolize the collision of science and business possibly the source of his downfall Fascinating and extensive The Explorer King movingly portrays the America of the nineteenth century and the man who for better or worse typified the soul of the era
