People, Plants and Genes

Denis J Murphy,2007-07-19 This book provides a comprehensive interdisciplinary overview of human plant interactions and their social consequences from the hunter gatherers of the Palaeolithic Era to the 21st century molecular manipulation of crops It links the latest advances in molecular genetics climate research and archaeology to give a new perspective on the evolution of agriculture and complex human societies across the world Even today our technologically advanced societies still rely on plants for basic food needs not to mention clothing shelter medicines and tools This special relationship has tied together people and their chosen plants in mutual dependence for well over 50 000 years Yet despite these millennia of intimate contact people have only domesticated and cultivated a few dozen of the tens of thousands of potentially available edible plants This limited domestication process led directly to the evolution of the complex urban based societies that have dominated much of human development over the past ten millennia Thanks to the latest genomic studies we can now begin to explain how when and where some of the most important crops came to be domesticated and the crucial roles of plant genetics climatic change and social organisation in these processes Indeed it was their unique genetic organisations that

ultimately determined which plants eventually became crops rather than any conscious decisions by their human cultivators. The book is aimed at a wide audience ranging from plant specialists such as geneticists, molecular biologists, and agronomists to a more general readership of archaeologists, anthropologists, historians, and others who wish to explore the complex processes that have shaped the often crucial relationships between plants and human societies over the past hundred millennia.

Mountain States Medicinal Plants Briana Wiles, 2018-03-07. A practical guide to using medicinal herbs as well as a powerful reminder of our reciprocal relationship with the natural world. Rosalee de la Forêt, author of *Alchemy of Herbs*. In *Mountain States Medicinal Plants*, Briana Wiles is your trusted guide to finding, identifying, harvesting, and using 120 of the region's most powerful wild plants. You'll learn how to safely and ethically forage and how to use wild plants in herbal medicines, including teas, tinctures, and salves. Plant profiles include clear color photographs, identification tips, medicinal uses, and herbal preparations and harvesting suggestions. Lists of what to forage for each season make the guide useful year-round. Thorough, comprehensive, and safe, this is a must-have for foragers, naturalists, and herbalists in Idaho, Montana, Wyoming, Utah, Colorado, eastern Oregon, eastern Washington, and northern Nevada.
