MANUAL COMPLETO DE EJERCICIOS HIDRODINÁMICOS Lynda Huey, Robert Forster, 2003-08-30 Trabajar contra la resistencia natural del agua da lugar a una sesión de ejercicios más sana y equilibrada de lo que es posible en tierra sin casi riesgo alguno de daños para el cuerpo. Hacer prácticas en el agua resulta tan seguro que médicos y fisioterapeutas lo están prescribiendo como parte de los programas de rehabilitación de lesiones. La primera parte de este manual le enseña a confeccionar un programa de entrenamiento en el agua para todo el año. Conocer los diversos aspectos de la condición física y cómo modificar las prácticas para culminar cada uno de ellos evitando el sobreentrenamiento y las lesiones. La segunda parte del libro. Curación en el agua le da a conocer los principios de las lesiones su rehabilitación y su curación. Las prácticas específicas de rehabilitación aquí contenidas cuando son realizadas en el contexto de los ejercicios de curación en el agua reportan beneficios terapéuticos para su lesión al tiempo que le ayudan a mantener el estado de forma. Con doscientas fotografías e instrucciones fáciles de seguir. El Manual Completo de Ejercicios Hidrodinámicos constituye la guía definitiva que usted necesita.

La educación integral y la motivación en las actividades acuáticas Enrique Muñoz Herrera, 2011-10-19 Esta obra es fruto de varios años de trabajo reflexivo e investigación en un intenso proceso de innovación en el ámbito de las actividades acuáticas infantiles. Teniendo presentes la objetividad, fiabilidad y validez como principales premisas de la metodología científica de investigación, el autor ha planteado por un lado una necesaria reflexión de las formas de trabajo tradicionales en el ámbito de la natación infantil y por otro una búsqueda fundamental de las nuevas formas de enseñanza más respetuosas con las edades iniciales. Precisamente esta obra nos muestra con detalle el proceso de investigación seguido. Contenido: Fundamentación teórica. Justificación. Antecedentes sobre la práctica infantil en el medio acuático. Iniciación a la natación a través del juego Francisco Ignacio Martínez Cabrera, Julio Ángel Herrador Sánchez, 2022-02 Se debe adecuar el deporte a un nuevo marco social posmoderno donde los jóvenes han encontrado otras maneras más satisfactorias de cubrir su tiempo de ocio siendo peligroso para caer en conductos más sedentarios y poco educativos cibermodernos. Por ello debemos favorecer una práctica deportiva que se adapte a la época actual que favorezca la tolerancia multicultural y la atención a la diversidad donde la competición no sea un fin sino un medio educativo con adaptación de los deportes tradicionales, reglas, espacios en busca de formas más recreativas lúdicas y

participativas promocionando actitudes humanizadoras y valorando más las relaciones sociales que el rendimiento. El profesor de EF a veces de forma inconsciente ejerce una trascendente función como agente socializador para despertar dichos hábitos haciendo o no atractiva esta asignatura ya que aquellos adolescentes atraídos hacia la actividad física son los que en su mayoría han percibido las clases de EF como una experiencia positiva. En función de la percepción que el alumno tenga de su experiencia en clase atractiva, aversiva o neutra se puede predecir con bastante certeza su actitud futura hacia la práctica o no de actividad física en su tiempo libre. A veces los programas son excesivamente competitivos y orientados hacia la adquisición de complejas destrezas deportivas y motrices lo que favorece el fracaso de los perdedores o los que son menos competentes motrizmente y con ello su rechazo a una implicación deportiva futura. En algunas ocasiones las clases de EF manifiestan un espacio para la discriminación en lugar de un espacio para la integración. Por ello parece acertado orientar los contenidos de forma atractiva y lúdica hacia el ocio activo tal como refleja este libro. Se debe primar la satisfacción por el movimiento siendo conveniente basar el programa en los intereses y necesidades de los niños principalmente los lúdicos propiciar caras felices. Si conseguimos incrementar la motivación intrínseca del joven a través de la diversión y el placer de estas actividades lúdicas podremos incidir definitivamente en la autoestima y salud emocional del niño, elementos claves para la felicidad y el bienestar futuro de dicha persona. Ahora bien los juegos que aquí se presentan no deben ser una receta sino una extraordinaria herramienta metodológica que favorezca la creatividad del profesor y monitor deportivo por la enorme incidencia socializadora que representa para sus alumnos.

Iniciación a los deportes individuales, de raqueta y de lucha, a través del juego Julio Ángel Herrador Sánchez (Coord.), 2011-10-13 Aunque para la redacción del texto hemos seguido el modelo tradicional es decir Descripción y desarrollo del juego, material empleado, organización de los participantes, reglas y variantes, hemos incluido como novedades la aportación de una extensa bibliografía de referencia o complementaria presentamos en la portada de cada uno de los deportes una frase relacionada con los mismos, incluimos un apartado interesante relacionado con los beneficios para la formación humana y deportiva: Desarrollo Físico, Motriz, Desarrollo Psicológico y Desarrollo Técnico Táctico Individual. Por último para facilitar la comprensión del texto presentamos cada uno de los juegos con una representación gráfica mediante la fotografía.

Técnicas de relajación y trabajo corporal en el medio acuático José Antonio Prieto Saborit, 2009-09-28 El medio acuático se ha convertido en la revolución de nuestro siglo. Hasta hace muy pocos años el agua de las piscinas no dejaba de ser un medio donde simplemente se nadaba. En cambio en la actualidad es un medio que todos los especialistas de la salud coinciden en recomendar para mejorar nuestro estado de bienestar. Esta situación ha contribuido a la proliferación de espacios acuáticos: balnearios, spas, centros de talasoterapia, piscinas especiales, etc., dedicados a la salud y el relax y a la aparición de nuevas técnicas terapéuticas y actividades acuáticas que buscan como objetivo la salud y no el rendimiento deportivo. En esta obra pretendemos mostrar unas novedosas técnicas relacionadas con la relajación y el trabajo corporal acuático que están despertando gran interés a nivel mundial. El libro se

divide en tres grandes bloques En el primero de ellos nos centrarnos en los aspectos b sicos de la relajaci n en la idiosincrasia del cuerpo y en las situaciones tanto psicol gicas como fisiol gicas que contribuyen al dominio de nuestras emociones En el segundo bloque abordamos el medio acu tico en toda su magnitud describiendo las peculiaridades f sicas que presenta este medio pasando como no por las instalaciones y lugares que lo utilizan La biomec nica espec fica y el material auxiliar o de flotaci n tambi n son tratados en este apartado El tercer y ltimo bloque se caracteriza por la descripci n de las t cnicas y terapias m s utilizadas para la relajaci n en este medio En cada cap tulo se a aade una pizca de magia pretendiendo mostrar una filosof a del medio acu tico totalmente distinta a la que est bamos acostumbrados Cada una de las t cnicas intenta plasmar la posibilidad de perderse en un nuevo espacio de emociones dentro del agua
