Maurice Merleau Ponty And His Critics An International Bibliography 1942 1976:

Maurice Merleau-Ponty and His Critics François Lapointe, Claire Lapointe, 1976 The A to Z of Existentialism Stephen Michelman, 2010-04-01 Existentialism is the philosophy of human existence which flourished first in Germany in the 1920s and 1930s and then in France in the decade following the end of World War II The operative meaning of existentialism here is thus broader than it was circa 1945 when the term first gained currency in France as a label for the philosophy of Jean Paul Sartre However it is considerably less broad than the view proposed by commentators in the 1950s and 1960s who in an attempt to overcome Sartre's hegemony discovered the seeds of existentialism far and wide in Shakespeare Saint Augustine and the Old Testament prophets In this dictionary existentialism is understood as a decidedly 20th century phenomenon though with roots in the 19th century Effort has been made to understand the philosophy of existentialism as all philosophies should be understood as part of an ongoing intellectual tradition an evolving history of problems concepts and arguments The A to Z of Existentialism explains the central claims of existentialist philosophy and the contexts in which it developed into one of the most influential intellectual trends of the 20th century This is done through a chronology an introductory essay a bibliography and more than 300 cross referenced dictionary entries offering clear accessible accounts of the life and thought of major existentialists like Jean Paul Sartre Martin Heidegger Martin Buber Karl Jaspers Gabriel Marcel Simone de Beauvoir Albert Camus and Maurice Merleau Ponty as well as thinkers influential to its development such as Wilhelm Dilthey Henri Bergson Edmund Husserl and Max Scheler This book affords readers an integrated critical and historically sensitive understanding of this important philosophical movement Continental Philosophy in the 20th Century Richard Kearney, 2003 Continental philosophy is one of the 20th century's most important challenging philosophical movements

Routledge History of Philosophy Volume VIII Richard Kearney, 2003-12-23 Continental philosophy as it has emerged in the twentieth century is less a seamless fabric than a patchquilt of diverse strands Phenomenology hermeneutics existentialism structuralism critical theory deconstruction these are some of the salient movements which have developed in continental Europe between 1900 and the 1990s though their influence is by no means confined to geographic location Continental thought has proved highly exportable circulating far beyond the frontiers of Europe to provoke strong responses in the intellectual world at large The fifteen articles in this volume outline and assess some of the issues and experiments of continental philosophy The first five span the twin movements of phenomenology and existentialism running from Husserl and Heidegger to Sartre Merleau Ponty and Levinas Subsequent essays deal with specific currents of continental thought in such areas as science Marxism linguistics politics aesthetics feminism and hermeneutics A final chapter on postmodernism highlights the manner in which so many concerns of continental thought culminate in a radical anti foundationalism This volume provides a broad scholarly introduction to this period for students of philosophy and related disciplines as well as some original interpretations of these authors It includes a glossary of technical terms and a chronological tube of
