Journal Journalism permeates our lives and shapes our thoughts in ways we've long taken for granted. Whether we listen to National Public Radio in the morning, view the lead story on the Today show, read the morning newspaper headlines, stay up to the minute with Internet news, browse grocery store tabloids, receive Time magazine in our mailbox, or watch the nightly news on television, journalism pervades our daily activities. The six-volume Encyclopedia of Journalism covers all significant dimensions of journalism, including print, broadcast, and Internet journalism; U.S. and international perspectives; history; technology; legal issues and court cases; ownership and economics. The set contains more than 350 signed entries under the direction of leading journalism scholar Christopher H. Sterling of The George Washington University. In the A to Z volumes 1 through 4, both scholars and journalists contribute articles that span the field's wide spectrum of topics, from design, editing, advertising, and marketing to libel, censorship, First Amendment rights, and bias to digital manipulation, media hoaxes, political cartoonists, and secrecy and leaks. Also covered are recently emerging media such as podcasting, blogs, and chat rooms. The last two volumes contain a thorough listing of journalism awards and prizes, a lengthy section on journalism freedom around the world, an annotated bibliography, and key documents. The latter edited by Glenn Lewis of CUNY Graduate School of Journalism and York College. CUNY comprises dozens of primary documents involving codes of ethics, media and the law, and future changes in store for journalism education. Key Themes: Consumers and Audiences; Criticism and Education; Economics; Ethnic and Minority Journalism; Issues and Controversies; Journalist Organizations; Journalists' Law and Policy; Magazine Types; Motion Pictures; Networks; News Agencies and Services; News Categories; News Media; U.S. News Media; World Newspaper Types; News Program Types; Online Journalism; Political Communications; Processes and Routines of Journalism; Radio and Television Technology.

Dead Men Don't Eat Lunch Geoffrey Gilson, 2014-05-01. Dead Men Don't Eat Lunch paints a devastating picture of how British Governments have been corrupted for 30 years by huge bribes from the international arms trade, and how that corruption may even now be tainting the Liberal Conservative Coalition Government of David Cameron and Nick Clegg. Special emphasis is given in Dead Men to the role of Al Yamamah, the notorious 150 billion arms contract between Great Britain and Saudi Arabia, which still generates 300 million in kickbacks every year. The author sets out in gripping detail his own discovery that the mysterious death of his close colleague and former rising British political star, Hugh Simmonds CBE, was the direct consequence of his deadly role as British Prime Minister Margaret Thatcher's personal arms dealer, money launderer, and assassin.

Handbook of Global Media Ethics Stephen J.A. Ward, 2021-09-02. This handbook is one of the first comprehensive research and teaching tools for the developing area of global media ethics. The advent of new media that is global in reach and impact has created the need for a journalism ethics that is global in principles and aims. For many scholars, teachers, and journalists, the existing journalism ethics, e.g., existing codes of ethics, is too parochial and national. It fails to provide adequate normative guidance for a media that is digital, global, and practiced by professional and citizen. A global media ethics is being constructed to define what responsible public journalism means for a

new global media era Currently scholars write texts and codes for global media teach global media ethics analyse how global issues should be covered and gather together at conferences round tables and meetings However the field lacks an authoritative handbook that presents the views of leading thinkers on the most important issues for global media ethics This handbook is a milestone in the field and a major contribution to media ethics *The Rise of Business Ethics* Bernard Mees,2019-11-28 In 1973 Daniel Bell argued that corporations in post industrial societies increasingly needed to behave in accord with widely accepted social norms particularly in terms of ethical behavior and social responsibility Yet widespread criticism of business behavior was not an invention of the 1960s and 70s or a product of changing commercial norms The key feature historically has been business scandal Understandings of how the field of business ethics has emerged are undeveloped however This book is the first attempt to explain the conditions which saw a focus develop on business ethics especially in the 1960s and 70s and how the broader field developed to encompass related notions such as corporate governance corporate social responsibility ethical leadership sustainable business and responsible management education The Rise of Business Ethics provides an introduction and analysis of the key developments in contemporary business ethics by examining them in terms of their diachronic development the key thinkers the key issues the key institutions and how they each contributed to contemporary understandings of business ethics governance and practice Addressing the topic from a European as well as North American perspective The Rise of Business Ethics will be of interest to researchers academics and students in the fields of business ethics business and society business history organization studies and political economy

department circumvented the U S Government Printing Office to the causes behind the conspicuous lawlessness of government publication to how the folkways of science served to constrict the sphere of government publication to a narrow strip

The Future of Resource Sharing Shirley K. Baker, Mary E. Jackson, 2019-12-06 This book first published in 1995 addresses the key issue facing libraries on how to survive in an age of interdependence Increasingly individual libraries must act as if each is part of a world library Instead of being self sufficient each library from the small public library to the large research library must find ways to put materials from this world library into the hands of its patrons and must stand ready to supply materials from its own collection to others both quickly and cost effectively through interlibrary loan It explores the critical questions for making resource sharing work with particular emphasis on interlibrary loan Cooperative collection development economic decision models consortial arrangements copyright dilemmas and the possibilities of technology are explored and a national project to revamp interlibrary loan and document delivery is described and future directions posited Authors present historical perspective explore the future and report from multiple perspectives

Profile Pieces Sue Joseph, Richard Lance Keeble, 2015-10-14 This book examines the history theory and journalistic practice of profile writing Profiles and the practice of writing them are of increasing interest to scholars of journalism because conflicts between the interviewer and the subject exemplify the changing nature of journalism itself While the subject often through the medium of their press representative struggles to retain control of the interview space the journalist seeks to subvert it This interesting and multi layered interaction however has rarely been subject to critical scrutiny partly because profiles have traditionally been regarded as public relations exercises or as soft journalism However chapters in this volume reveal not only that profiling has historically taken many different forms but that the idea of the interview as a contested space has applications beyond the subject of celebrated individuals The volume looks at the profile s historical beginnings at the contemporary manufacture of celebrity versus the ordinary at profiling communities countries and movements at profiling the destitute at sporting personalities and finally at profiling and trauma
