Exploring Ancient Skies David H. Kelley, Eugene F. Milone, 2011-02-16 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 A D the lion horoscope and the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and as a text for students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history Peer Polity Interaction and Socio-political Change Colin Renfrew, John F. Cherry, 1986-05-29 Thirteen leading archaeologists have contributed to this innovative study of the socio political processes notably imitation competition warfare and the exchange of material goods and information that can be observed within early complex societies particularly those just emerging into statehood The common aim is to explain the remarkable formal similarities that exist between institutions ideologies and material remains in a variety of cultures characterised by independent political centres yet to be brought under the control of a single unified jurisdiction A major statement of the conceptual approach is followed by ten case studies from a wide variety of times and places including Minoan Crete early historic Greece and Japan the classic Maya the American Mid west in the Hopewellian period Europe in the Early Bronze Age and Early Iron Age and the British Isles in the late Neolithic

knowledge Mexican physicians Hernan Garcia Antonio Sierra and Hiberto Balam discovered that the similarities between Mayan medicine and traditional Chinese medicine were profound and helpful in their medical work **Word and Image in Maya Culture** William F. Hanks, Don Stephen Rice, 1989 Explores the extent and pattern of job discrimination against people with cancer Part one reviews work histories of cancer patients with chapters on recovered patients and survivors of childhood and adolescent cancer Part two makes research and policy recommendations to maximize the productive activity of cancer patients This volume brings together studies of the linguistic and compositional principles of written discourse iconography and symbolic representation linking these to cosmology and the institutional context of Maya kingship Architectural artistic and glyphic archeological data are brought to bear on the character of Maya civilization Handsomely produced with many glyphic and iconographic figures Not indexed Annotation copyrighted by Book News Inc Portland OR

Maya Christians and Their Churches in Sixteenth-Century Belize Elizabeth Graham, 2020-03-17 It is widely held that Christianity came to Belize as an extension of the conquest of Yucatan and that adherence to Christian belief and practice was abandoned in the absence of enduring Spanish authority An alternative view comes from the excavations of Maya churches at Tipu and Lamanai which show that the dead were buried in Christian churchyards long after the churches themselves fell into disuse and pre Columbian ritual objects were cached in Christian sacred spaces both during and after Spanish occupation Excavations also reveal that the architectural style of these early churches is Franciscan in inspiration but nonetheless the product of continuing community efforts at construction and repair A conclusion difficult to ignore is that the Maya of Tipu and Lamanai considered themselves Christians with or without Spanish presence Viewing historical and archaeological data through the lens of her personal experience of Roman Catholicism and informed by feminist approaches Elizabeth Graham assesses the concept of religion the significance of doctrine the empowerment of the individual and the process of conversion by examining the meanings attributed to ideas objects and images by the Maya by Iberian Christians and by archaeologists Graham s provocative study also makes the case that the impact of Christianity in Belize was a phenomenon that uniquely shaped the development of the modern nation A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase *The Illustrated Encyclopedia of Mankind* Richard Carlisle, Yvonne Deutch, 1989

Archaeology, Annales, and Ethnohistory A. Bernard Knapp, 1992-04-16 This collection considers the relevance of the Annales school for archaeology The Annales movement regarded orthodox history as too much concerned with events too narrowly political too narrative in form and too isolated from neighbouring disciplines Annalists attempted to construct a total history dealing with a wide range of human activity and combining divergent material documentary and theoretical approaches to the past Annales oriented research utilizes the techniques and tools of various ancillary fields and integrates temporal spatial material and behavioural analyses Such an approach is obviously attractive to archaeologists for even though they deal with material data rather than social facts they are just as much as historians interested in understanding social economic and political factors such as power and dominance conflict exchange and other human activities Three introductory essays consider the relationship between Annales methodology and current archaeological theory Case studies draw upon methodological variations of the multifaceted Annales approach The volume concludes with two overviews one historical and the other archaeological *Human-Environmental Interactions in Prehistoric Periods* Guanghui Dong, Jade

D'Alpoim Guedes, 2022-05-27 **Isis Cumulative Bibliography 1976-1985: Subjects, periods and civilizations** John Neu, 1990 [Archaeology at El Perú-Waka'](#) Olivia C. Navarro-Farr, Michelle Rich, 2015-08-15 Archaeology at El Per Waka is the first book to summarize long term research at this major Maya site The results of fieldwork and subsequent analyses conducted by members of the El Per Waka Regional Archaeological Project are coupled with theoretical approaches treating the topics of ritual memory and power as deciphered through material remains discovered at Waka The book is site centered yet the fifteen wide ranging contributions offer readers greater insight to the richness and complexity of Classic period Maya culture as well as to the ways in which archaeologists believe ancient peoples negotiated their ritual lives and comprehended their own pasts El Per Waka is an ancient Maya city located in present day northwestern Pet n Guatemala Rediscovered by

petroleum exploration workers in the mid 1960s it is the largest known archaeological site in the Laguna del Tigre National Park in Guatemala's Maya Biosphere Reserve The El Per Waka Regional Archaeological Project initiated scientific investigations in 2003 and through excavation and survey researchers established that Waka was a key political and economic center well integrated into Classic period lowland Maya civilization and reconstructed many aspects of Maya life and ritual activity in this ancient community The research detailed in this volume provides a wealth of new substantive and scientifically excavated data which contributors approach with fresh theoretical insights In the process they lay out sound strategies for understanding the ritual manipulation of monuments landscapes buildings objects and memories as well as related topics encompassing the performance and negotiation of power throughout the city's extensive sociopolitical history

Verging on Extra-Vagance James A. Boon, 2021-06-08 In this book James Boon ranges through history and around the globe in a series of provocative reflections on the limitations attractions and ambiguities of cultural interpretation The book reflects the unusual keyword of its title extra vagance a term Thoreau used to refer to thought that skirts traditional boundaries Boon follows Thoreau's lead by broaching subjects as diverse as Balinese ritual Montaigne Chaucer Tarzan Perry Mason opera and the ideas of Jacques Derrida Ruth Benedict Kenneth Burke and Mary Douglas He makes creative and often playful leaps among eclectic texts and rituals that do not hold single fixed meanings but numerous changing and exceedingly specific ones Boon opens by exploring links between ritual and reading focusing on commentaries about the seclusion of menstruating women in Native American culture trance dances in Bali and circumcision or lack of it in contrasting religions He considers the ironies of first person ethnography by telling stories from his own fieldwork reflecting on ethnological museums and making seriocomic connections between Mark Twain and Marcel Mauss In expansive discussions that touch on Manhattan and Sri Lanka the Louvre and the World of Coca Cola museum willfully obscure academic theory and shamelessly commercial show business Boon underlines the inadequacies of simple ideologies and pat generalizations The book is a profound and eloquent exploration of cultural comparison by one of America's most original and innovative anthropologists

Bodies of Maize, Eaters of Grain: Comparing material worlds, metaphor and the agency of art in the Preclassic Maya and Mycenaean early civilisations Marcus Jan Bajema, 2017-09-30 This book offers a comparative study of the civilisations of the Late Preclassic lowland Maya and Mycenaean Greece The approach used here seeks to combine traditional iconographic approaches with more recent models on metaphor and the social agency of things *Egypt as a Monster in the Book of Ezekiel* Safwat Marzouk, 2015-06-05 Appealing to Monster Theory and the ancient Near Eastern motif of Chaoskampf Safwat Marzouk argues that the paradoxical character of the category of the monster is what prompts the portrayal of Egypt as a monster in the book of Ezekiel While on the surface the monster seems to embody utter difference underlying its otherness there is a disturbing sameness Though the monster may be defeated and its body dismembered it is never completely annihilated Egypt is portrayed as a monster in the book of Ezekiel because Egypt represents the threat of religious

assimilation Although initially the monstrosity of Egypt is constructed because of the shared elements of identity between Egypt and Israel the prophet flips this imagery of monster in order to embody Egypt as a monstrous Other In a combat myth YHWH defeats the monster and dismembers its body Despite its near annihilation Egypt in Ezekiel's rhetoric is not entirely obliterated Rather it is kept at bay hovering at the periphery questioning Israel's identity
