Legal Capital in Europe Marcus Lutter, 2011-12-22 Europe has known very different systems of company laws for a long time These differences do not only pertain to the board structures of public companies where single tier and two tier structures can be distinguished they also pertain to the principles of fixed legal capital Fixed legal capital is not a traditional ingredient of English and Irish company law and had to be incorporated into these legal systems only for public limited companies according to the Second European Company Law Directive of 1976 Both jurisdictions have never really embraced these rules Against this background the British Accounting Standards Board ASB and the Company Law Centre at the British Institute of International and Comparative Law BIICL have initiated and supported a study of the benefits of this legal system by a group of experts led by Jonathan Rickford The report of this group has been published in 2004 Its result was that legal capital was costly and superfluous hence the Second Directive should be repealed The British government has adopted this view and wants the European Commission to act accordingly Against this background a group of German and European company law experts academics as well as practitioners have come together to scrutinise sense and benefits of fixed legal capital and all its specific elements guided by the following questions What is the relevant legal concept supposed to achieve What does it achieve in reality What criticisms are there Which proposals or alternatives are available From the outset the group of experts has endeavoured to cooperate with foreign colleagues which resulted in very fruitful and pleasant exchanges This volume contains besides an executive summary of the results 16 essays on specific aspects of legal capital in Germany covering also neighbouring fields of law e g accounting insolvency 7 reports on fixed legal capital in other jurisdictions France Great Britain Italy the Netherlands Poland Spain and the U S A addressing the same questions as the essays on German law The British initiative disapproves of the Second Directive The Directive does only deal with public limited companies in Europe which is reflected in the analysis presented here It is only concerned with the fixed legal capital of public limited companies not with capital issues of private companies The study has arrived at a result that differs completely from that of the Rickford group It verifies the usefulness of the concept of fixed legal capital and wishes to convince the European Commission of the benefits of the Second Company Law Directive

Corporate Attribution in Private Law Rachel Leow, 2022-02-24 Looking at key questions of how companies are held accountable under private law this book presents a succinct and accessible framework for analysing and answering corporate attribution

problems in private law Corporate attribution is the process by which the acts and states of mind of human individuals are treated as those of a company to establish the company's rights duties and liabilities But when and why are acts and states of mind attributed in private law Drawing on a wide range of material from across the disparate areas of company law agency law and the laws of contract tort unjust enrichment and equitable obligations this book's central argument is that attribution turns on the allocation and delegation of the company's own powers to act This approach allows for a much greater and clearer understanding of attribution A further benefit is that it shows attribution to be much more united and coherent than it is commonly thought to be Looking at corporate attribution across the broad expanse of the common law this book will be of interest to lawyers across the common law world including the United Kingdom Australia Canada and Singapore **A**

Paradigm Shift of Auditors' Role, Duties and Liabilities in Malaysia Loganathan Krishnan, 2025-08-30 This book contributes to the legal discourse on the role duties and liabilities of auditors in Malaysia from multiple perspectives Challenges faced by auditors and their responses will also be discussed The relevant provisions in the Companies Act 2016 Capital Market and Services Act 2007 Financial Services Act 2013 Central Bank of Malaysia's Guidelines and the Malaysian Code of Corporate Governance 2021 and By Laws are examined and where necessary reforms are proposed Thus this book will serve as a helpful guide for practitioners in advising their clients who are auditors The book will also serve as a reference point for regulators and policy makers on the issues raised by the author on the approaches taken in other jurisdictions Judges may also refer to this book to obtain a holistic view on auditors legal position Other researchers may develop further research gaps pointed out by the author and elevate the research to greater heights in order to garner changes in the laws Researchers from other jurisdictions may refer to this book to obtain a vivid view on the legal position of auditors in Malaysia Finally auditors may take a leaf or two from this book in managing their role duties and liabilities more effectively

a company the requirement to disclose relevant tax information to investors or the necessity to establish a management system for tax risks have given rise to an emerging strand of literature both from an economic and a legal background This situation has led the Max Planck Institute for Intellectual Property Competition and Tax Law Department of Accounting and Taxation in Munich to organize a conference on this topic jointly with the International Network for Tax Research and the International Fiscal Association German Branch in December 2006
