Bookseller & Stationer and Office Equipment Journal, 1929 *Santeria Enthroned* David H. Brown, 2003-10-15 Ever since its emergence in colonial era Cuba Afro Cuban Santeria or Lucum has displayed a complex dynamic of continuity and change in its institutions rituals and iconography. In *Santeria Enthroned* David H. Brown combines art history cultural anthropology and ethnohistory to show how Africans and their descendants have developed novel forms of religious practice in the face of relentless oppression. Focusing on the royal throne as a potent metaphor in Santeria a belief and practice Brown shows how negotiation among ideologically competing interests have shaped the religion's symbols rituals and institutions from the nineteenth century to the present. Rich case studies of change in Cuba and the United States including a New Jersey temple and South Carolina's Oyotunji Village reveal patterns of innovation similar to those found among rival Yoruba kingdoms in Nigeria. Throughout Brown argues for a theoretical perspective on culture as a field of potential strategies and usable pasts that actors draw upon to craft new forms and identities a perspective that will be invaluable to all students of the African Diaspora. Motion Picture Herald, 1935 **That Which Roots Us** Marion Dresner, 2023-12-05 A work of natural and environmental history *That Which Roots Us* is a work of natural and environmental history that explores the origins of and resolutions to some of the United States environmental problems. Marion Dresner discusses the roots of Euro American environmental exploitative action starting with the environmental consequences of having treated Pacific Northwest forests as commodities. She shares her experiences visiting sites where animal centered ice age culture changed to human centered culture thousands of years ago with the advent of farming. The book explores the origins of the romantic philosophical movement which arose out of the debilitating conditions of the industrial era. Those romantic attitudes toward nature inspired the twentieth century preservation movement and America's progressively modern conservation attitudes. The book is centered around environmental issues in the Pacific Northwest contrasting utilitarian views of nature with Native American practices of respect and reciprocity. The elements that make *That Which Roots Us* a truly unique and important contribution to environmental literature are the author's personal recollections and interactions with the landscape. Ultimately Dresner offers hope for a new stewardship of the land and a focus on science literacy and direct experience in the natural world as the most grounded way of knowing the planet.
