Serials in the British Library British Library. Bibliographic Services Division,1997 Computers for Librarians Stuart J. Ferguson,Rodney Hebels,2003-08-01 Computers for Librarians is aimed primarily at students of library and information management and at those library and information service professionals who feel the need for a book that will give them a broad overview of the emerging electronic library It takes a top down approach starting with applications such as the Internet information sources and services provision of access to information resources and library management systems before looking at data management computer systems and technology data communications and networking and library systems development It also provides an interesting set of case studies which help to put theoretical and technical issues into context Computers for Librarians can be read as a survey of where we are in terms of the electronic library but it is also intended as an educational resource and includes self learning aids such as learning objectives keywords and review questions for each chapter

ESSENTIALS OF AI AND SOFT COMPUTING SHARMA, ANUJ,2024-09-25 The book has been primarily designed for the beginners in the subject It has been written from the students perspective making it easy to understand The contents are briefly explained with the help of examples in a direct and a pragmatic approach Each chapter begins with the basics and is standalone the dependence of the chapters on previous concepts has been minimized The text is aimed to balance the mix of notation and words in mathematical statements Artificial Intelligence and Soft Computing topics are often expressed in terms of algorithms hence key algorithms are introduced with their explanations These algorithms are expressed in words and in an easy to understand form of structured psuedocodes The students should easily grasp the psuedocodes used in the text to express the algorithms regardless of whether they have formally studied programming languages

KEY FEATURES Short and concise explanation with examples Direct and pragmatic writing style Structured psuedocodes for explaining algorithms Balanced mix of notation and words in mathematical statements Meticulously organised chapter for effective teaching and learning Chapter end Exercises to help students practice and assess their knowledge
