**Three Proofs for the Existence of God** Uchemadu Chée Kamanu, 2020-12-24 Three Proofs for the Existence of God gives scientific historic and prophetic proofs for the existence of God If we do not think that a computer or even a bicycle could have come up by chance without a designer could we think that man who made the computer could have come up by chance without a designer Chance and design are mutually exclusive the disproof of the one is the proof of the other There is no third option In biogenesis genetics dendrochronology geophysics and thermodynamics evolution theory has been disproved experimentally and observationally By default therefore design has been proven Any attempt by evolutionists to experimentally disprove design or prove chance ends up proving design The one conducting the experiment is the designer of that experiment and the result is his design If the experiment is left to chance nothing happens With historic data from the Bible added up we show the year God created man and other things Acts and relationships between God and his creation show up in other chapters to remind us that the Creator God lives and wills One of these chapters Black History in Scripture disproves the saying that Christianity is the white man s religion We show that the scriptures were translated into three African languages for ten centuries before there was an English Bible among other facts Did Jesus not live in Israel and Africa only
