Cinema Medievalia Kevin J. Harty, Scott Manning, 2024-11-11 This collection of original essays presents new scholarship on nearly three dozen feature length films including silent films animated films films in black and white and films in technicolor along with other shorter examples of cinematic medievalism Written by contributors from around the globe with a wide variety of backgrounds the essays in this volume take a critical approach to one of the most popular forms of medievalism This book presents a full century of cinematic depictions of the Middle Ages with new examinations of works such as *The Seventh Seal* *God's Fool* *La Passion de Jeanne d'Arc* *Saladin the Victorious* *Dante's Inferno An Animated Epic* and *A Knight's Tale* among others **Poetry and British Nationalisms in the Bardic Eighteenth Century** Jeff

Strabone, 2018-10-26 This book offers a radical new theory of the role of poetry in the rise of cultural nationalism With equal attention to England Scotland and Wales the book takes an Archipelagic approach to the study of poetics print media and medievalism in the rise of British Romanticism It tells the story of how poets and antiquarian editors in the British nations rediscovered forgotten archaic poetic texts and repurposed them as the foundation of a new concept of the nation now imagined as a primarily cultural formation It also draws on legal and ecclesiastical history in drawing a sharp contrast between early modern and Romantic antiquarianisms Equally a work of literary criticism and history the book offers provocative new theorizations of nationalism and Romanticism and new readings of major British poets including Allan Ramsay Thomas Gray and Samuel Taylor Coleridge *The Beginnings of Western Science* David C. Lindberg, 2010-02-15 The most comprehensive account of ancient and medieval science a standard work for understanding the history of science *The Beginnings of Western Science* is a landmark the best book to ever to present a unified account of both ancient and medieval science in a single volume Chronicling the development of scientific ideas practices and institutions from pre Socratic Greek philosophy to late Medieval scholasticism David C Lindberg surveys all the most important themes in the history of science including developments in cosmology astronomy mechanics optics alchemy natural history and medicine In addition he offers an illuminating account of the transmission of Greek science to medieval Islam and subsequently to medieval Europe For decades this book has shaped the way students and scholars understand these critically formative periods of scientific development and it continues to be essential to an understanding of the field this updated second edition includes revisions on nearly every page as well as several sections that have been completely rewritten For example the section on Islamic science was thoroughly retooled to reveal the magnitude and sophistication of medieval Muslim scientific

achievement And the book now reflects a sharper awareness of the importance of Mesopotamian science for the development of Greek astronomy In all the second edition of *The Beginnings of Western Science* captures the current state of our understanding of more than two millennia of science and promises to continue to inspire both students and general readers

The Individual and Society in the Middle Ages Walter Ullmann,2019-12-01 Originally published in 1966 *The Individual and Society in the Middle Ages* based on three guest lectures given at Johns Hopkins University in 1965 explores the place of the individual in medieval European society Looking at legal sources and political ideology of the era Ullmann concludes that for most of the Middle Ages the individual was defined as a subject rather than a citizen but the modern concept of citizenship gradually supplanted the subject model from the late Middle Ages onward Ullmann lays out the theological basis of the political theory that cast the medieval individual as an inferior abstract subject The individual citizen who emerged during the late Middle Ages and the Renaissance by contrast was an autonomous participant in affairs of state Several intellectual trends made this humanistic conception of the individual possible among them the rehabilitation of vernacular writing during the thirteenth century and the growing interest in nature natural philosophy and natural law However Ullmann points to feudalism as the single most important medieval institution that laid the groundwork for the emergence of the modern citizen

Refugees or Migrants Robert Chazan,2019-01-08 A leading historian argues that historically Jews were more often voluntary migrants than involuntary refugees For millennia Jews and non Jews alike have viewed forced population movement as a core aspect of the Jewish experience This involuntary Jewish wandering has been explained as the result of divine punishment or as a response to maltreatment of Jews by majority populations or as the result of Jews acceptance of their minority status perpetuating the maltreatment and forced migration In this absorbing book Robert Chazan explores these various accounts and argues that Jewish population movement was in most cases voluntary the result of a Jewish sense that there were alternatives available for making a better life

One Firm Anchor RWH Miller,2012-10-25 *One Firm Anchor* is a fantastic introduction to the history of chaplaincy at sea and what preceded it Miller argues that the fractious period of the Reformation was pivotal before there was no formal ministry and only scattered welfare provision for seafarers afterwards chaplains were increasingly found at sea and seafarers became increasingly the recipients of the modern approach to mission *One Firm Anchor* adds substantially to the seminal work of Peter F Anson and Roald Kverndal Published to coincide with the 2012 International Conference of the Apostleship of the Sea this is an important new work for all involved in seafaring as well as maritime historians

The Imperial Abbey of Farfa Charles B. McClendon,1987-01-01 The Benedictine abbey of Farfa was one of the most important monastic centers of medieval Europe As an imperial establishment patronize and protected by Charlemagne and his successors yet situated only thirty miles northeast of Rome Farfa was often found at the center of events involving the papacy and the Empire While its historical importance has long been recognized the physical remains of the abbey have received little attention until now This book by Charles B McClendon

is unique in combining an assessment of Farfa's place in the overall development of medieval architecture with an analysis of the abbey's historical role McClendon has based his study on a detailed architectural survey of the medieval abbey church and on the extensive excavations of the site carried out under his co-direction between 1978 and 1983 By examining archaeological architectural and historical sources McClendon reconstructs the various phases in the growth of the monastic layout from late antiquity to the early Renaissance analyzes the circumstances under which they were built and relates his findings to the architectural currents of the day He shows for example that the ninth century additions to the abbey church by Abbot Sichardus reflect the Carolingian revival of the plan of Old St Peter's in Rome that the design of other features points to influence from north of the Alps that the east end of the abbey church extensively rebuilt in the mid eleventh century should be considered a major monument of the early Romanesque period Demonstrating that each phase of the architectural history of Farfa reflects the latest developments not only in Italy but also in the north McClendon makes clear that Farfa provides a valuable understanding of the dynamic forces that helped shape the architecture of the early Middle Ages Scholarship at its best This volume will be the standard reference for many years to come Richard Krautheimer New York University

Dickens and the City Jeremy Tambling, 2017-03-02 Dickens's relationship to cities is part of his modernity and his enduring fascination How he thought about grasped and conceptualised the rapidly expanding and anonymous urban scene are all fascinating aspects of a critical debate which starting virtually from Dickens's own time has become more and more active and questioning of the significance of that new thing the unknown and unknowable city Although Dickens was influenced by several European and American cities the most significant city for Dickens was London the city he knew as a boy in the 1820s and which developed in his lifetime to become the finance and imperial capital of the nineteenth century His sense of London as monumental and fashionable modern and anachronistic has generated a large number of writings and critical approaches Marxist sociological psychoanalytic and deconstructive Dickens looks at the city from several aspects as a place bringing together poverty and riches as the place of the new and of chance and coincidence and of secret lives exposed by the special figure of the detective Another crucial area of study is the relationship of the city to women and women's place in the city as well as the way Dickens's London matches up with other visual representations This anthology of criticism surveys the field and is a major contribution to the study of cities city culture modernity and Dickens It brings together key previously published articles and essays and features a comprehensive bibliography of work which scholars can continue to explore

The New Cambridge Bibliography of English Literature: Volume 4, 1900-1950 George Watson, I. R. Willison, 1972-12-07 More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to

the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries **Models in Archaeology** David L. Clarke,2014-10-24 This major study reflects the increasing significance of careful model formation and testing in those academic subjects that are struggling from intuitive and aesthetic obscurantism toward a more disciplined and integrated approach to their fields of study The twenty six original contributions represent the carefully selected work of progressive archaeologists around the world covering the use of models on archaeological material of all kinds and from all periods from Palaeolithic to Medieval Their common theme is archaeological generalisation by means of explicit model building testing modification and reapplication The contributors seek to show that it is the use of certain models in particular ways that defines archaeology as the practice of one discipline with a set of general tenets that are as applicable in Peru as in Persia Australia as Alaska Sweden as Scotland on material from the second millennium B C to the second millennium A D They assert that careful model formulation within archaeology and the cautious exchange and testing of models within and beyond the discipline provides the only route to the formation of the common internationally valid body of theory which defines a vigorous and coherent discipline and distinguishes it from being a collection of merely regionally applicable special cases
