Modality in Grammar and Discourse Joan L. Bybee, Suzanne Fleischman, 1995-08-21 This volume brings together a collection of 18 papers that look into the expression of modality in the grammars of natural languages with an emphasis on its manifestations in naturally occurring discourse Though the individual contributions reflect a diversity of languages of synchronic and diachronic foci and of theoretical orientations all within the broad domain of functional linguistics they nonetheless converge around a number of key issues the relationship between mood and modality the delineation of modal categories and their nomenclature the grounding of modality in interactive discourse the elusive category irrealis and the relationship of modal notions and categories to other categories of grammar

Complementizer Semantics in European Languages Kasper Boye, Petar Kehayov, 2016-07-11 Complementizers may be defined as conjunctions that have the function of identifying clauses as complements In recent years it has become increasingly clear that they have additional functions Some of these functions are semantic in the sense that they represent conventional contributions to the meanings of the complements The present book puts a focus to these semantic complementizer functions

Modality Aspect Interfaces Werner Abraham, Elisabeth Leiss, 2008-06-26 The main topics pursued in this volume are based on empirical insights derived from Germanic logical and typological dispositions about aspect modality links These are probed in a variety of non related languages The logically establishable links are the following Modal verbs are aspect sensitive in the selection of their infinitival complements embedded infinitival perfectivity implies root modal reading whereas embedded infinitival imperfectivity triggers epistemic readings However in marked contexts such as negated ones the aspectual affinities of modal verbs are neutralized or even subject to markedness inversion All of this suggests that languages that do not or only partially bestow upon full modal verb paradigms seek to express modal variations in terms of their aspect oppositions This typological tenet is investigated in a variety of languages from Indo European German Slavic Armenian African Asian Amerindian and Creoles Seeming deviations and idiosyncrasies in the interaction between aspect and modality turn out to be highly rule

Markedness in Canaanite and Hebrew Verbs Paul D. Korchin, 2018-08-14 Semitic linguistics is arguably involved in its own version of a maximalist versus minimalist controversy with respect to verbal morphology. Dissent persists about whether and to what degree the Northwest Semitic verb paradigms underlying languages such as Biblical Hebrew and Amarna Canaanite *yaqtul yaqtulu yaqtula* are themselves determinative of tense aspect mood values as opposed to extra verbal structures ranging from syntax to discourse. To label a verb form as marked or unmarked for these values is to evoke a bountiful yet nebulous complex of theories about how language is built and employed. But Semitists have often unwittingly bleached markedness terms of their full historical and technical significance, reducing them to generic appellations that are invoked in sporadic and nearly random fashions. By applying markedness to Semitic morphology in a consistent and rigorous manner, this innovative book brings to bear a venerable linguistic construct on a persistent philological crux in order to achieve deeper clarity in the structures and workings of Canaanite and Hebrew verbs. Korchin's arguments hold relevance for translating and interpreting nearly every sentence in ancient texts such as the Hebrew Bible and the Amarna letters.

World Lexicon of Grammaticalization Tania Kouteva, Bernd Heine, Bo Hong, 2019-08-08 Based on analysis of more than 1 000 languages, this volume reconstructs more than 500 processes of grammatical change in the languages of the world.

The Syntax of Volitives in Biblical Hebrew and Amarna Canaanite Prose Hélène M. Dallaire, 2014-10-30 During the past century, numerous books and articles have appeared on the verbal system of Semitic languages. Thanks to the discovery of Ugaritic texts, Akkadian tablets, Canaanite letters found at Tell el Amarna in Egypt, Hebrew and Aramaic inscriptions, and the Dead Sea Scrolls, our understanding of the phonology, morphology, and syntax of the Semitic languages has increased substantially. Dallaire focuses primarily on prose texts in Biblical Hebrew and Amarna Canaanite, in which the verbal system morphemes syntax expresses nuances of wishes, desires, requests, and commands. According to her volitional concepts are found in every language and are expressed through verbal morphemes, syntagmas, intonation, syntax, and other linguistic means. *The Syntax of Volitives in Biblical Hebrew and Amarna Canaanite Prose* attempts to answer the following questions: Do volitives function in a similar way in Biblical Hebrew and Amarna Canaanite? Where and why is there overlap in morphology and syntax between these two languages? What morphological and syntactical differences exist between the volitional expressions of the languages? In attempting to answer these questions, the author bears in mind the fact that within each of these two languages, scribes from different areas used specific dialectal and scribal traditions, for example, northern versus southern, peripheral versus central.

Impersonal Constructions Andrej Malchukov, Anna Siewierska, 2011-07-20 This volume offers a much needed typological perspective on impersonal constructions which are here viewed broadly as constructions lacking a referential subject The contributions to this volume deal with all types of impersonality namely constructions featuring nonagentive subjects including those with experiential predicates A impersonals presentational constructions with a notional subject deficient in topicality T impersonals and constructions with a notional subject lacking in referential properties R impersonals i e both meteo constructions and man constructions The typological discussion benefits from a good coverage of impersonality in European languages but also includes considerations of several African American South East Asian Australian and Oceanic languages The variation in the cross linguistic realization of impersonality and the diachronic pathways leading to and from impersonality documented in this volume point to a novel perspective on impersonals as transitional structures or an intermediate stage of a more basic diachronic change be it from transitive to intransitive or from active to passive or participant to event centered construction

The Pragmatics of Modals in Shakespeare Minako Nakayasu, 2009 Modals and related phenomena are without doubt one of the most complicated issues in the grammar of language This study provides a reappraisal of the modals in Shakespeare s language from the pragmatic viewpoint both micropragmatic and macropragmatic The material selected for analysis are modals SHALL SHOULD WILL WOULD and their contracted forms Micropragmatic aspects such as speech acts seem relatively easily accessible to historical researchers however this study moves further into the macropragmatic dimensions of language use than the earlier ones and covers politeness dialogue and discourse analysis
