

The background of the book cover is a rich, dark blue or black, adorned with intricate medieval manuscript illumination. A large, stylized face with a reddish-brown complexion and a white, patterned headband is the central focus. The face has a serene expression and is surrounded by a golden, swirling border. To the left, there are vertical bands of gold and white floral motifs. To the right, there are red and white geometric patterns. At the bottom, there are more gold and white floral designs. The overall style is reminiscent of the Lindisfarne Gospels or similar medieval art.

The Oxford Illustrated History of English Literature Pat Rogers, 2001 Britain possesses a literary heritage virtually unrivaled in the Western world This lavishly illustrated volume explores the richness diversity and continuity of that tradition Under the general editorship of Pat Rogers some of Britain's foremost literary scholars trace the history of English literature from its first stirrings in Anglo Saxon poetry to the present day The contributors aim to convey to the reader the pleasure and exhilaration of literature rather than to provide a bare outline of schools and periods of writing At the heart of the volume towers the figure of Shakespeare who has a special chapter devoted entirely to himself The volume also offer detailed treatments of other major writers such as Chaucer Milton Donne Wordsworth Dickens Eliot and Auden and up to date discussions of living authors such as Muriel Spark and Seamus Heaney More than a mere chronology this versatile work provides a basic core of information and invaluable supplementary material including suggestions for further reading maps a chronological table of dates and a detailed index with birth and death dates of individuals listed It also moves beyond these facts and events to characterize the broad sweep of ideas and the main concerns of British writers over the past thirteen centuries The illustrations chosen thirty five in color and over two hundred in black and white bring to life the content and concerns of the text They range in subject from manuscripts and book illustrations to works of art and architecture portraits social scenes landscapes and caricatures illuminating not only the literature but also the ideas preoccupations and outlooks that fostered it Rather than simply decorating the text the illustrations complement and enlarge it All experts in their chosen areas the contributors bring to this volume a deep

A Cumulative Bibliography of Medieval Military History and Technology Kelly DeVries, 2001-11-01 There is perhaps no other more lively area for study in medieval history than medieval military history with its attendant and complementary field the history of medieval military technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other historical genre of medieval studies or chronological period of military history What this has meant is that it is now more difficult to keep up with all of the trends and sources in the field than ever before Hence the need for a reference work which covers what has previously been written and which in turn can assist the scholar both the more experienced academic and the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which centers on conventional medieval boundaries Europe Byzantium and the Middle East However the chronology does differ from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense
