Philosophypsychology And Mysticism:

The Sufi Message of Hazrat Inayat Khan: Philosophy, Psychology and Myst Hazrat Inayat Khan, 2020-09-28 There are three steps which lead the seeker to the altar of divine wisdom One is philosophy the next is psychology and the third is mysticism Philosophy is learned by the analysis and synthesis of all that we perceive through the five senses Psychology is learned by the analysis and synthesis of all that we can feel in human nature and in our character and mysticism is learned by the analysis and synthesis of the whole of life both that which is seen and that which is unseen Philosophy therefore is learned by the study of things psychology is learnt by thinking and mysticism is learned by meditation The one who takes these three steps towards divine knowledge completes his life s study but he omits the first or the second step philosophy or psychology and arrives directly at mysticism he leaves behind some knowledge that could have helped him impart his knowledge to others Therefore it is most essential that these threes steps be taken one after the other The words philosophy psychology and mysticism should not be interpreted in the sense in which they are generally used today By philosophy is not meant a certain philosophy By psychology is not meant a certain system By mysticism is not meant a certain occult science But by philosophy is meant the knowledge of things perceived through the intelligence or intuition by psychology the knowledge of the human character and of human nature and by mysticism the knowledge of being **Philosophy, Psychology, Mysticism** Inayat Khan, 1956 *Philosophy, Psychology and Mysticism* Inayat Khan, 1995 There are three steps which lead the seeker to the altar of divine wisdom philosophy referring to the perception and study of things psychology learnt by thinking and feeling what is in our human nature and character mysticism acquired and learnt through meditation and the study of the whole of life both seen and unseen The book opens new avenues of thought attitude and life to the reader with open mind and heart First aspects of the physical nature of life as perceived through the five sences are discussed They are surprisingly modern although they have been given as lectures in the twenties **Philosophy, Psychology and Mysticism** Hazrat Inayat Khan, 1995 Reflections on Philosophy, Psychology and Mysticism Hidayat Khan, 2004 Short meditations on philosophy psychology and mysticism based on Sufi teachings and the writings of Inayat Khan by his son the leader of the International Sufi movement It is wisdom which respects all faiths The Innate Capacity Robert K. C. Forman, 1998 This book is the sequel to Robert Forman s well received collection *The Problem of Pure Consciousness* Oxford 1990 The essays in the earlier volume argued that some mystical experiences do not seem to be formed or shaped by the language system a thesis that stands in sharp contradistinction to deconstruction in general and to the constructivist school of mysticism in particular which holds that all mysticism is the product of a cultural and linguistic process In *The Innate Capacity* Forman and his colleagues put forward a hypothesis about the formative causes of these pure consciousness experiences All of the contributors agree that mysticism is the result of an innate human capacity rather than a learned socially conditioned and constructive process The innate capacity is understood in several different ways Many

perceive it as an expression of human consciousness per se awareness itself Some hold that consciousness should be understood as a built in link to some hidden transcendent aspect of the world and that a mystical experience is the experience of that inherent connectedness Another thesis that appears frequently is that mystics realize this innate capacity through a process of releasing the hold of the ego and the conceptual system The contributors here look at mystical experience as it is manifested in a variety of religious and cultural settings including Hindu Yoga Buddhism Sufism and medieval Christianity Taken together the essays constitute an important contribution to the ongoing debate about the nature of human consciousness and mystical experience and its relation to the social and cultural contexts in which it appears

Philosophy, Psychology, Mysticism Hazrat Inayat Khan,1990 *Depth Psychology and Mysticism* Thomas

Cattoi,David M. Odorisio,2018-05-16 Since the late 19th century when the new science of psychology and interest in esoteric and occult phenomena converged leading to the discovery of the unconscious the dual disciplines of depth psychology and mysticism have been wed in an often unholy union Continuing in this tradition and the challenges it carries this volume includes a variety of inter disciplinary approaches to the study of depth psychology mysticism and mystical experience spanning the fields of theology religious studies and the psychology of religion Chapters include inquiries into the nature of self and consciousness questions regarding the status and limits of mysticism and mystical phenomenon and approaches to these topics from multiple depth psychological traditions **The Sufi Message of Hazrat Inayat Khan: Sufi Mysticism**

Hazrat Inayat Khan,2020-09-28 Mysticism is the essence and the basis of all knowledge science art philosophy religion and literature These all come under the heading of mysticism When one traces the origin of medicine which has developed into the pure science it is today one will find that its source was in intuition It is the mystics who have given it to the world For instance Avicenna the great Persian mystic has contributed more to medicine than any other man in the world history of medicine We know the meaning of science to be a clear knowledge based on reason and logic but at the same time where did it start Was it by reason and logic First there was intuition then came reason and finally logic was applied to it Furthermore in the lower creation there are no doctors yet the creatures are their own physicians The animals know whether they will best be cured by standing in the sun by bathing in a pool of water by running in the free air or by sitting quietly under the shade of a tree I once knew a sensible dog who used to fast every Thursday No doubt many people of the east would say he was an incarnation of a Brahmin but to me it was a puzzle how the dog knew it was Thursday People think a mystic means a dreamer an impractical person who has no knowledge of worldly affairs But such a mystic I would call only half a mystic A mystic in the full sense of the word must have balance He must be as wise in worldly matters as in spiritual things People have had many misconceptions of what a mystic is They have called a fortune teller a mystic or a medium a clairvoyant a visionary I do not mean that a mystic does not possess all of these qualities but these qualities do not make a mystic A real mystic should prove to be an inspired artist a wonderful scientist an influential statesman He should be just as qualified for

business industry social and political life as is the materially minded man When people say to me You are a mystic I thought you would take no notice of this or that I do not like it Why should I not take notice of it I take notice of every little detail although every little detail does not occupy my mind so much that I take notice of nothing else It is not necessary to be unconscious of the world while being conscious of God With our two eyes we see one vision so we should see both aspects God and the world as a clear vision at the same time It is difficult but not impossible

The Sufi Message of Hazrat

Inayat Khan: The Alchemy of Happiness Hazrat Inayat Khan, 2020-09-28 THE SOUL in Sanskrit in the terms of the Vedanta is called Atman which means happiness or bliss itself It is not that happiness belongs to the soul it is that the soul itself is happiness Today we often confuse happiness with pleasure but pleasure is only an illusion a shadow of happiness and in this delusion man may pass his whole life seeking after pleasure and never finding satisfaction There is a Hindu saying that man looks for pleasure and finds pain Every pleasure seems happiness in outward appearance it promises happiness for it is the shadow of happiness but just as the shadow of a person is not the person though representing his form so pleasure represents happiness but is not happiness in reality According to this idea one rarely finds souls in this world who know what happiness is they are constantly disappointed in one thing after another That is the nature of life in the world it is so deluding that if man were disappointed a thousand times he would still take the same path for he knows no other The more we study life the more we realize how rarely there is a soul who can honestly say I am happy Almost every soul whatever his position in life will say he is unhappy in some way or another and if you ask him why he will probably say that it is because he cannot attain to the position power property possessions or rank for which he has worked for years Perhaps he is craving for money and does not realize that possessions give no satisfaction perhaps he says he has enemies or that those whom he loves do not love him There are a thousand excuses for unhappiness that the reasoning mind will make But is even one of these excuses ever entirely correct Do you think that if these people gained their desires they would be happy If they possessed all would that suffice No they would still find some excuse for unhappiness all these excuses are only like covers over a man's eyes for deep within is the yearning for the true happiness which none of these things can give He who is really happy is happy everywhere in a palace or in a cottage in riches or in poverty for he has discovered the fountain of happiness which is situated in his own heart As long as a person has not found that fountain nothing will give him real happiness

The Sufi Message of Hazrat Inayat Khan: The Sufi Teachings

Hazrat Inayat Khan, 2020-09-28 SUFISM has never had a first exponent or a historical origin It existed from the beginning because man has always possessed the light which is his second nature and light in its higher aspect may be called the knowledge of God the divine wisdom in fact Sufism Sufism has always been practiced and its messengers have been people of the heart thus it belonged to the masters as well as to others Tradition states that Adam was the first prophet which shows that wisdom was already the property of the first man There have always been some among the human race who have

desired wisdom These sought out spiritual beings in their solitude serving them with reverence and devotion and learning wisdom from them Only a few could understand those spiritual beings but many were attracted by their great personalities They said We will follow you we will serve you we will believe in you we will never follow any other and the holy ones said to them My children we bless you Do this do that This is the best way to live And they gave their followers precepts and principles such as might produce in them meekness and humility In this way the religions were formed But in the course of time the truth was lost The tendency to dominate arose and with it the patriotism of the community and prejudice against others and thus wisdom was gradually lost Religion was accepted though with difficulty but the evolution of the world at that time was not such as could understand the Sufis They were mocked at ill treated ridiculed they were obliged to hide themselves from the world in the caves of the mountains and in the solitude At the time of Christ there were Sufis among the first of those who gave heed to him and in the time of Muhammad the Sufis on Mount Zafah were the first to respond to his cry One of the explanations of the term Sufi is this association with Mount Zafah Muhammad was the first to open the way for them in Arabia and they had many followers among them Sadik and Ali **Philosophy, psychology, mysticism.**

Jones, 2016-03-23 A comprehensive exploration of the philosophical issues raised by mysticism This work is a comprehensive study of the philosophical issues raised by mysticism Mystics claim to experience reality in a way not available in normal life a claim which makes this phenomenon interesting from a philosophical perspective Richard H Jones s inquiry focuses on the skeleton of beliefs and values of mysticism knowledge claims made about the nature of reality and of human beings value claims about what is significant and what is ethical and mystical goals and ways of life Jones engages language epistemology metaphysics science and the philosophy of mind Methodological issues in the study of mysticism are also addressed Examples of mystical experience are drawn chiefly from Buddhism and Advaita Vedanta but also from Christianity Judaism Islam and Daoism This is a significant extension of the seminal work by Walter Stace *Mysticism and Philosophy* That work has stimulated much literature all of which Jones manages to review here He critically extends Stace s universal core and embeds it in a sophisticated discussion of the extent range and metaphysical implications of mysticism Ralph W Hood Jr coauthor of *The Psychology of Religion An Empirical Approach* **Mysticism Examined** Richard H. Jones, 1993-01-01 *Mysticism* presents a challenge to anyone who is interested in fundamental questions about the nature of reality knowledge and how we should live In this book the author examines questions posed by mysticism He clarifies the nature of the claims advanced by Western and Asian mystics and explores the beliefs and values of classical

mystical ways of life for their interconnections and reasonableness Jones discusses whether all mystical experiences and all mystical claims of knowledge are similar and examines the relation of concepts and experiences in mystics claims Also presented are standards for evaluating competing mystical claims and mystics problems with language Whether mystics arguments are rational is investigated along with the relation of moral and non moral values and the role of beliefs and values in enlightened mystics ways of life Mysticism s relation to the enterprises of science theology psychology and ethics is also examined
